The first round was in October 2025. We did a smaller mailing in December to see if we could get more consents in the immediate area.

EXTERNAL

Thank you for the additional information on the number of surveys and responses, this will be helpful to include. Do you also happen to have the date the survey was sent out? Even an approximate timeframe, such as December 2025, would be helpful.

Hana,

We sent out sentiment surveys to 25 parcels in the surrounding area. We received 14 responses only four of which were yes. Of these four, the parcels were not located such that inclusion of any of the parcels in the annexation would result a logical boundary.

As the subject parcel is eligible for annexation, Sonoma LAFCO determined that a single parcel annexation would be appropriate.

Cynthia
