

CITY OF SANTA ROSA
BOARD OF PUBLIC UTILITIES

TO: BOARD OF PUBLIC UTILITIES
FROM: TETYANA MOKVYTS, WATER REUSE ENGINEER

SUBJECT: APPROVAL OF EXCLUSIVE NEGOTIATION AGREEMENT WITH
RENEWABLE SONOMA

AGENDA ACTION: MOTION

RECOMMENDATION

It is recommended by the Water Department and the City Attorney's Office that the Board, by motion, approve an Exclusive Negotiation Agreement with Renewable Sonoma, to facilitate City staff negotiations with Renewable Sonoma regarding potential lease of City property to locate and operate a solids waste receiving and composting facility.

EXECUTIVE SUMMARY

In order to engage in detailed discussions regarding a proposal by Renewable Sonoma that Renewable Sonoma locate, build, and operate a solid waste receiving facility on City-owned property, Renewable Sonoma requests an Agreement that ensures the City will negotiate exclusively with Renewable Sonoma for such use of City-owned land. Renewable Sonoma proposes to locate a solid waste compost and digestion facility on City-owned land currently occupied by the City's composting process, as well as locating a green waste receiving station on other undeveloped City-owned land adjacent to the Laguna Treatment Plant. Renewable Sonoma further proposes to provide operational services under agreement to compensate for the use of the City's compost facility.

BACKGROUND

The Sonoma County Waste Management Agency ("Agency") is a joint powers authority whose mission is to implement waste diversion programs as required by State law, a cornerstone of which is composting. From 1993 until 2015, the Agency contracted with Sonoma Compost to provide composting services for solid organic waste (primarily vegetative matter, including curb-side collection) at the Sonoma County landfill on Meham Road. However, in 2015 the facility was forced to close due to storm water

run-off issues. Since that time, solid organic wastes have been transported to locations outside of Sonoma County as the Agency seeks another site for a similar processing facility.

In May 2017, the Agency issued an RFP soliciting responses from parties interested in owning and operating a solid organic waste compost facility in Sonoma County. In July of that year, in support of the Agency's efforts and believing there could be mutually beneficial synergistic effects from locating such a facility adjacent to the Laguna Treatment Plant (LTP), Santa Rosa Water issued a separate RFP soliciting interest in leasing city property near LTP as the site for the compost facility. Proposals were received by August 2017, reviewed in October, and in December 2017 the Board approved Letters of Intent to Negotiate to four proposers on the Agency's project.

Subsequently, the Agency selected Renewable Sonoma as the most responsive proposer for the solid organic waste compost facility operator. Renewable Sonoma's proposal included locating receiving, composting, and anaerobic digestion facilities adjacent to LTP.

Prior to entering into an agreement with the Agency to provide organic waste processing, Renewable Sonoma must first reach an agreement with the City of Santa Rosa regarding any future use of City-owned property for the facility. As a first step, staff has developed an Exclusive Negotiation Agreement (ENA) with Renewable Sonoma to establish a mutual understanding of the scope of the potential project and basis to negotiate appropriate agreements, including but not limited to a Site Lease. Once the ENA is executed, staff anticipates working toward developing and negotiating a site lease and project agreement.

PRIOR BOARD OF PUBLIC UTILITIES REVIEW

On July 6, 2017, the Board participated in a Staff Briefing to review the status of the City's collaboration with the Agency.

On December 7, 2017, the Board heard a Staff Report and approved four Letters of Intent to Negotiate for location of the organics processing facility.

On October 18, 2018, progress on the selection and siting process was included in a Staff Briefing on biosolids processing.

On January 17, 2019, the Board heard a Study Session on progress of discussions with Renewable Sonoma.

On February 4, 2019, the Contract Review Subcommittee of the Board held a public meeting to review the proposed ENA.

ANALYSIS

With Board approval, Santa Rosa Water has provided Renewable Sonoma with a Letter of Intent to Negotiate regarding locating a solid organic waste processing facility adjacent to LTP in anticipation of mutual benefits derived from synergistic processes between the two facilities. Such benefits remain undefined at this time, but potential benefits are expected to be identified and quantified while formulating a site lease and other agreement(s) between Renewable Sonoma and the City.

FISCAL IMPACT

Staff is in the process of identifying and assembling certain outside services to assist during the negotiation process. Such services may include engineering, environmental and legal services. The specific costs and scope have not yet been determined but will be paid for from the Subregional Capital Improvement Program budget, fiscal year 2018-19. Staff will update the BPU on specific costs and scopes associated with these services once they are available.

ENVIRONMENTAL IMPACT

This action is exempt from the California Environmental Quality Act (CEQA) because it is not a project which has a potential for resulting in either a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment, pursuant to CEQA Guideline section 15378.

BOARD/COMMISSION/COMMITTEE REVIEW AND RECOMMENDATIONS

The Proposed ENA was presented to the BPU Contract Review Subcommittee on February 4, 2019 for recommendation to the Board. The Contract Review Subcommittee supported the proposed ENA and recommended that the item proceed to the full Board.
