

# Regional Recycled Water Storage Update

Board of Public Utilities  
June 18, 2020

Joe Schwall  
Deputy Director  
Regional Operations

OUR FUTURE IN EVERY DRÖP

# 2020 Irrigation Season

---

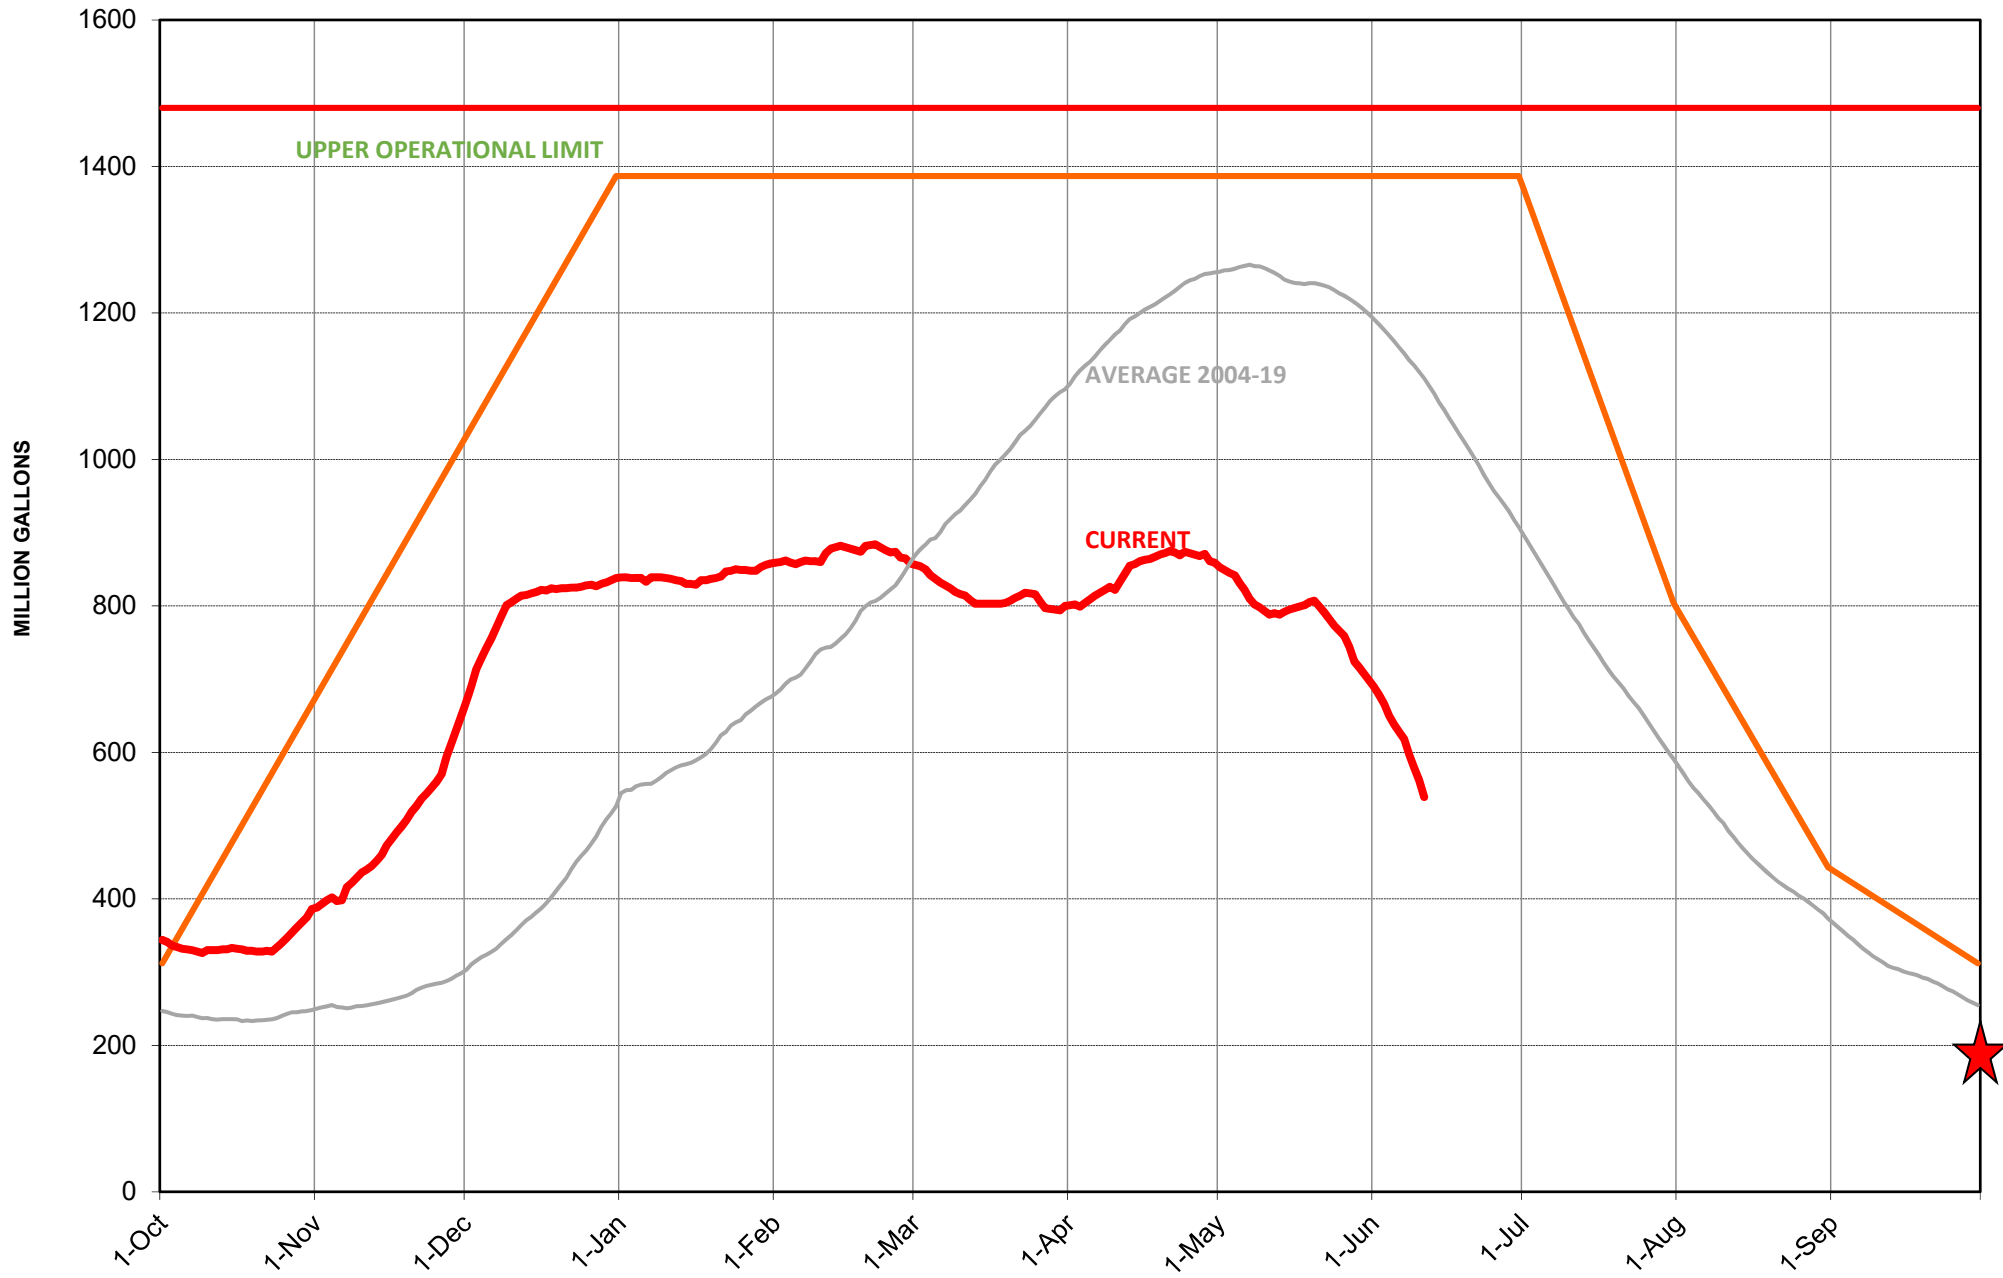

- Current storage volume: ~ 500 MG
  - Steep decrease since last update in May
- Early and ongoing communications with ag customers
  - Dry winter, limited water
  - No allotments set at beginning of irrigation season
- Spring has been warm and dry.
- Irrigation season started heavy and early
  - Nearly 30% of available water has been used through May
- Allotments at 70% of average annual usage have been announced

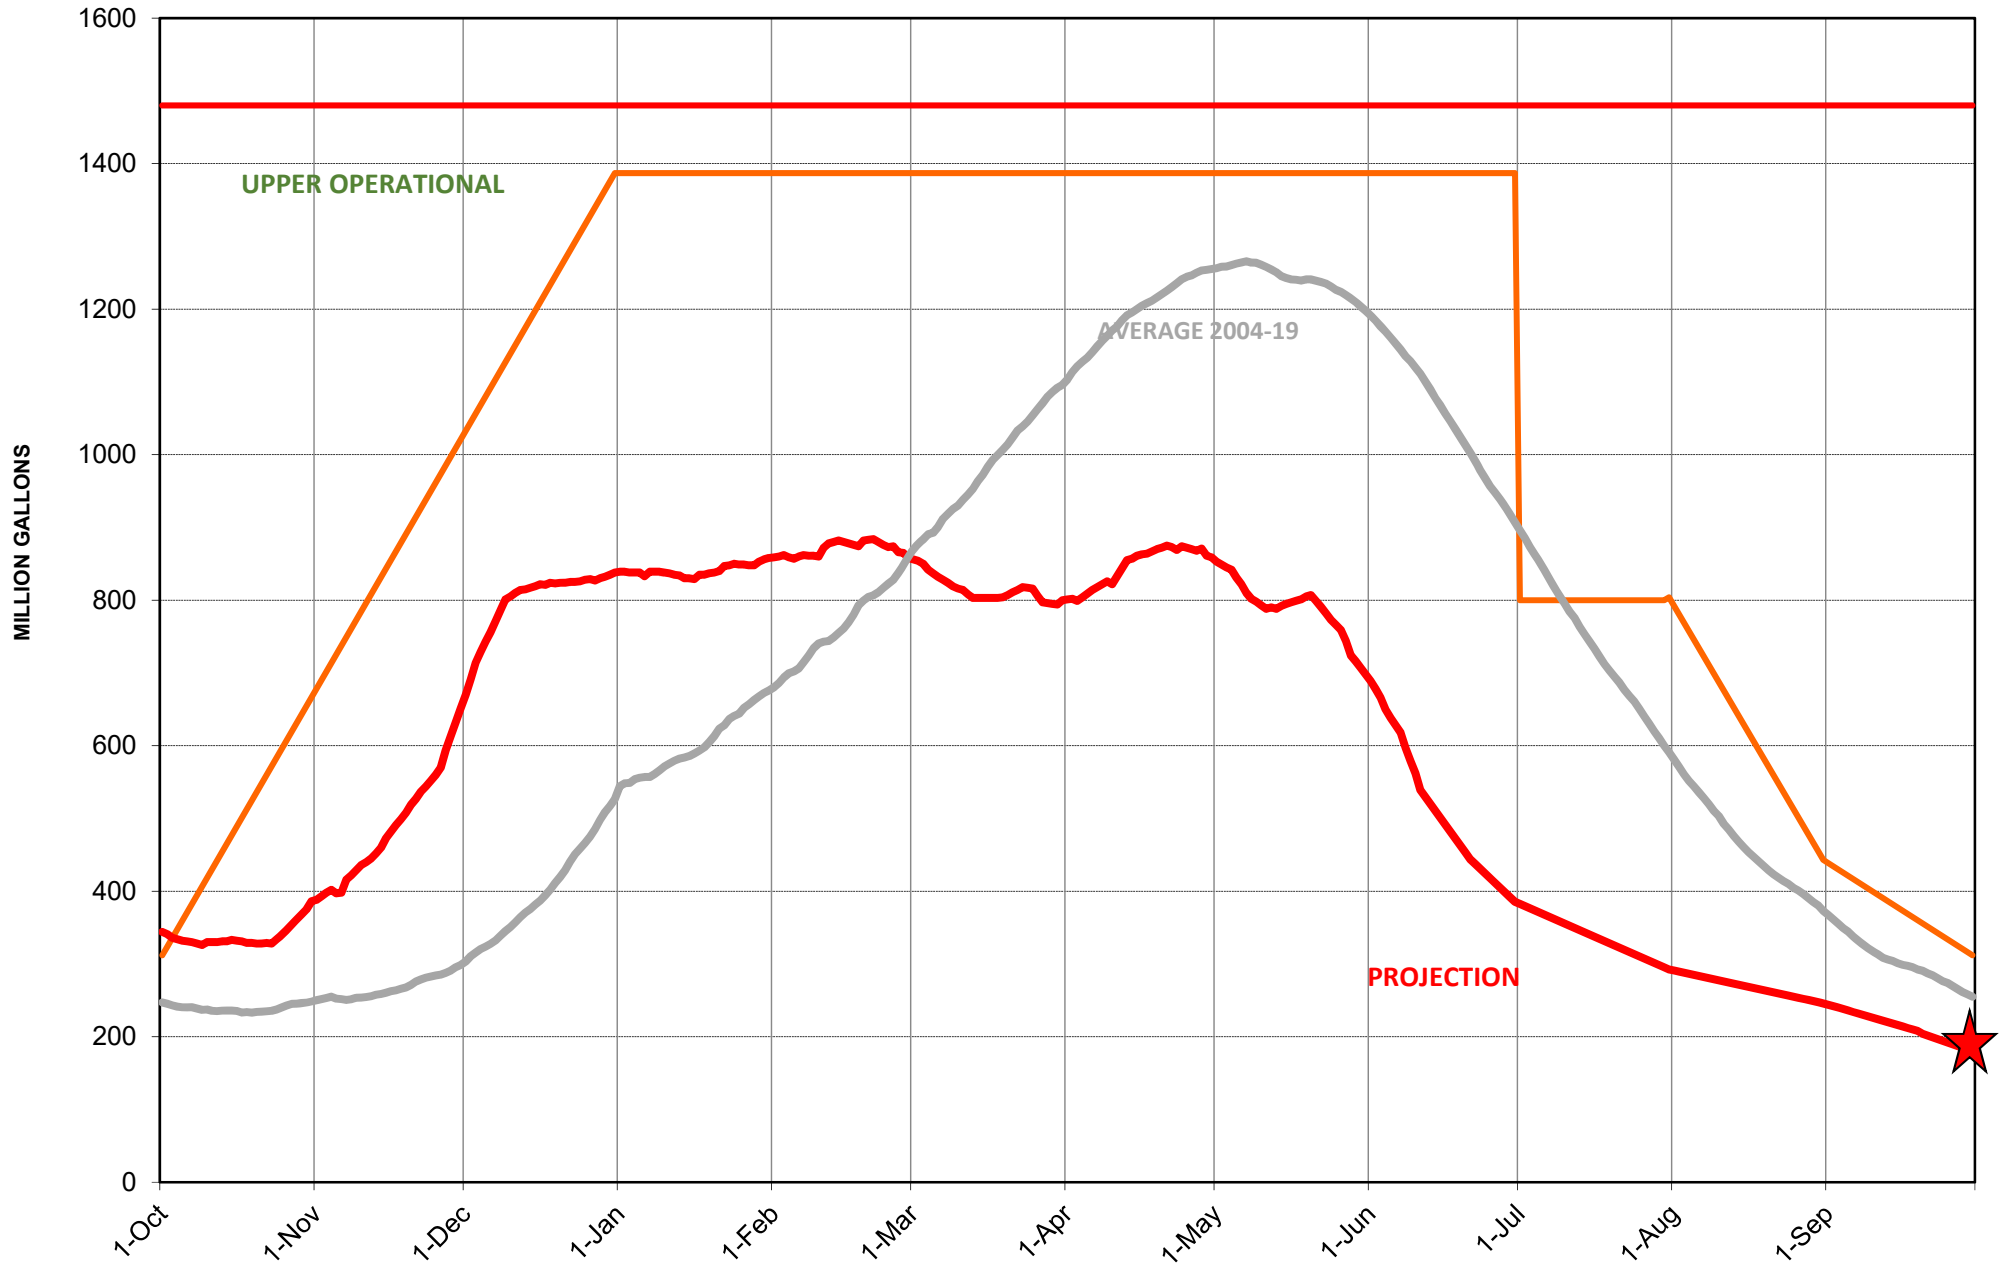

# Recycled Water Storage

June 11, 2020

539 MG

# Recycled Water Storage Projection

# Communications with Ag Customers

- This season: Communications were one-to-one or e-mailings
  - Annual Farmers' Meeting cancelled due to COVID-19
  - Mid-May: Email communications in place of meeting
    - "No allotments this year."
  - Early June: Heavy early season demand necessitated allotments
    - Early warning to large customers for planning purposes
    - Preliminary estimate of allotments was low
    - Followed up with updated information

# Challenging Season Ahead

- Low Supply
- Delta Pond levee repair
- Geysers Pipeline repair
