Subject: [EXTERNAL] City budget - Climate Change

Santa Rosa City Council:

I can NOT think of a single budget item that has more priority that Climate Change.
Simply - it effects every man, woman and child in our city - and our world.

On January 14th the council went on record stating it's intention to act for and form policy with the understanding that - -
Climate Change underscores - every thing we do.

It is imperative that the council construct a budget with the understanding that - every - decision that is made will effect the
Climate Crisis.

Please do your utmost to earmark a significant amount of money to address green house gases and emissions. And
address the severity of putting - our- money where the problem is.

Thank you for running for elected office and being part of our Santa Rosa leadership team.

Sincerely,
Roberta I Clark

Subject: [EXTERNAL] Budget priorities

Dear Council Members,

Climate change is THE issue must take precedence over all of the other pressing issues that we face. Please make the Council's budget priorities reflect this understanding. We are running out of time.

Sincerely,
Ardath Lee

Subject: [EXTERNAL] Feb. Budget Meeting

Regarding Tuesday Council meeting. You will have read these following words before, but they fit my thoughts and feeling exactly:

It will be vital this year to construct the city budget with the understanding that every decision to be made will be affected by the climate crisis. Therefore, we must earmark a significant amount of money to reduce the city's greenhouse gas emissions. Please do your utmost to address the severity of the crisis by putting our money where the greatest problem is.

Many thanks for the hard work that goes into this endeavor.

Sincerely,

Gene Zingarelli, Ph.D.

Subject: [EXTERNAL] climate change and goal-setting

Good evening: First off, thank you all for your hard work on behalf of our city. It is commendable always, and underappreciated at times. I am writing to ask that the goal-setting meeting coming up in mid-March be looked at as a first opportunity to use actions to mitigate climate change as the lens through which goals going forward are set. The climate crisis is an existential threat and our city has an opportunity to lead actions to achieve net zero emissions by 2030, as resolved through the declaration of a Climate Emergency in January.

There are many actions that can be taken that pay for themselves many times over. I am a member of two groups, Friends of the Climate Action Plan, and a new group: Working group for Emergency Climate Action Now (WECAN) which have shared a [List of Actions](#). The goal setting meetings upcoming provide a good opportunity for the council to set goals that will lead to actions to reduce emissions and sequester carbon in our city. It is urgent that we do so. Concerned community members in numerous organizations stand ready to assist with research, building connections, synthesizing complex climate topics and providing political capital to ensure that smart goals become even smarter actions.

Thank you, as always, for your efforts.

Subject: [EXTERNAL] City of Santa Rosa Budget priorities

Finance Department:

I have been heartened by Santa Rosa's Climate Emergency Declaration and am hopeful that this will be reflected in the priorities set by the city's budget for 2020 and beyond. It is essential that all decisions made by the Finance department support our transition towards a sustainable city and community so that we can increase our resilience in the face of the climate crisis.

Funds must be earmarked for reducing our greenhouse gas emissions by electrifying all of our city's vehicles and rapidly adding electric vehicle charging stations; supporting micro-grids and home battery storage; increasing building efficiency standards; increasing public transportation, cycling and pedestrian infrastructure; planting trees and protecting all green spaces, and engaging community support for all of these measures.

There is a lot to be done, but the rewards will be worth it.

Thanks so much for everything that you do to support our community.

Sincerely,

Wendy Armstrong-Herniman

Subject: [EXTERNAL] Council goal setting

Mr. Mayor and City Council Members:

Thank you, for voting to adopt the Climate Emergency Resolution this past January. I am very proud to be in a community whose leaders trust science and are responsive to our current climate emergency. There are many needs in our community that are competing for a finite amount of resources. The decisions you have to make for our community are not easy or simple. I am appreciative of the dedication you have to making the best possible decisions for all of us. I do not envy your task, however, I do have a request. As you begin the budget process and set goals for the City Council please keep in mind that every decision you make will be affected by the climate crisis. It really is the overarching need that encapsulates us all. For example our housing shortage and the need to help people who have no home will only be magnified when huge numbers of people are forced to migrate because of flooding, fires, drought, unlivable heat and pestilence. As you well know, there are current examples of these conditions happening locally and across the planet. Please, continue to take the bold steps needed to address the climate crisis by **funding** the changes needed to preserve life. Thank you.

Sincerely,
Ellen Bailey

Comments & Questions	<p>Re Goal setting for FY 20/21: Please prioritize creating a new Telecommunications Ordinance that protects Residential areas from the coming onslaught of new WTFs (wireless transmission facilities), whether they are 4G or 5G or combined. I'd like to see a setback of 1500 feet from ANY residence/school/day care facility/park/hiking trail/senior residence/senior center/hospital/rehab facility, and 1500 feet between WTFs. I'd also like to see continuous monitoring of wireless emissions by an independent contractor, with current real time results made available to the public 24/7 online. We need an automatic shutoff device that shuts off the WTF if emissions exceed a certain amount. If emissions exceed the maximum a 2nd time, the telecom company gets fined. If emissions exceed the maximum amount three times, the WTF must be removed within 30 days. In the meantime, all applications for WTFs must not be approved until this ordinance is passed. Once they are</p>

approved and built, I understand that the City is locked into long term (10 years or more?) leases and then it's just too late to protect ourselves from the quiet enjoyment of our streets.

Comments & Questions	To whom it may concern,

The city of SR needs to adopt a revised Telecommunications Ordinance As soon as possible. This is important to protect our neighborhoods, schools and our town from cell towers in close proximity. There has been much community opposition to these towers over the past couple of years. During the study session held on December 10, 2019 this opposition was strongly expressed.

This is about protecting our community.

Phone Number	4156373753
Comments & Questions	<p>Dear Council Members and staff, I am pleased to have the opportunity to make suggestions for SR priorities for the budget year. First, under permitting priorities, given the speed with which Verizon is attempting to put 5G compatible antennas throughout SR which will have life time effects on the safety of children, residents and employees as well as negative effects on property values, nature and pollinators needed for successful farming, it is essential that: SR begin planning for a safe alternative: Fiber Optic to and through the premises. FTTP or SafeG is long lasting and does not involuntarily radiate residents. https://safeg.net/home/ It has been established that antennas contributed to many wildfires in California, we do not need to add additional dangers to our fire season. So this may also fall under the priority of fire prevention. Along with planning, it is important that the City Council pass a wireless ordinance that PROTECTS residents, and property</p>

values. There are many provisions which can be incorporated into the ordinance that will do just that, some of which have already been presented at the last study session. The City Council should not be listening to only the industry's position which was presented at the Dec 2019 study session, by the engineers who also work for Verizon. It is a conflict of interest. Second, I would like to commend the moving of the homeless from the Joe Rodota Trail to Los Guilicos and I hope that will become permanent real shelter with support of the St Vincent de Paul and many volunteers.
