Glossary of Terms

Dataset

A dataset is a single physical collection of information, typically modeled as a table of rows and columns of data. Each Socrata Dataset contains queryable data and metadata that is controlled by the dataset publisher. A dataset may have zero or more views – filtered views, maps, charts, calendars or forms. These visualizations are unlimited, whether created by the Customer or their end-users and do not count as datasets.

The following type of datasets count towards the plan's dataset limit:

- Datasets created from an external database using the Socrata API
- Datasets created by uploading a data file (e.g. csv, xls...etc.)
- Datasets that are links to other web resources – referred to as "External Datasets"
- Datasets created by uploading non-data files (ZIP, PDF, ...etc.)
- Datasets created by uploading geospatial files including KML/KMZ, shapefiles. Each of these geospatial files may contain up to 5 layers.
- Datasets created as part of a microsite

The list above applies to any published dataset, whether shared publicly or privately.

The following types of datasets do not count towards the plan's dataset limit:

- File attachments that are added to any published dataset

- Datasets created as a result of the Socrata ArcGIS Connector
- Federated datasets from an external domain
- Datasets that are still in Working Copy mode and have not yet been published
- Datasets created as mashups from other existing datasets.

Socrata and the Customer may agree to break up a very large dataset into multiple smaller datasets to improve performance, without counting these towards the plan's limit.

Open Data API

Application Programming Interface (API) allows authorized computer programs to read and write data from the Socrata system over the Internet. A Socrata Open Data API is automatically created for every published dataset or view.

Premium API

Enterprise-class APIs, created in Socrata API Foundry, to provide scalable, reliable and secure data APIs to mission-critical cloud and mobile applications. Premium APIs can be customized, managed, throttled, and analyzed by Administrators. They also provide full API-specific documentation, client code for developers, a live API console, and an automatically generated API catalog.

Dashboard

An interactive web interface that groups multiple indicator and performance data on a screen. Dashboards show a graphical representation of the current status (snapshot) and historical trends of an organization's key performance indicators using charts and maps.

Goals

Performance achievement targets that are set by the organization and are automatically measured in Socrata GovStat.

Active Form

A collection of input form fields that make up a data capture interface in Socrata DataCollect. Active Forms can be accessed by a user on the web or via a mobile device. Forms can be switched off and archived, in which case the data remains, but the form is no longer active.

Data Collection App

Active Forms and business logic can be grouped together and deployed as a Data Collection App in the field. The app allows the Customer to collect data in stages, validate the input at each stage, and apply rules-based logic to support a business process.

Form Submission

Form Submissions are success events that are triggered when a user completes a form, or a collection of forms that are bound to the same app and submits it to the central system. A Form Submission is registered only upon successful completion and capture of the data on the Socrata DataCollect Customer instance.

Usage Limitations

Storage:	Unlimited
Bandwidth	5 TB
API Calls per Month	100M
Geocoding Requests per month	500,000

If Socrata has the legal obligation to pay or collect taxes for which Customer is responsible, the appropriate amount will be invoiced to and paid by Customer, unless Customer provides Socrata with a valid tax exemption certificate authorized by the appropriate taxing authority. If any charges are not received from Customer by the due date, then at Socrata's discretion, (a) such charges may accrue late interest at the rate of 1% of the outstanding balance per month, or the maximum rate permitted by law, whichever is lower, from the date such payment was due until the date paid.

5. Confidentiality

Each party reserves any and all right, title and interest that it may have in or to any Confidential Information that it may disclose to the other party under this Agreement. The receiving party will protect Confidential Information of the disclosing party against any unauthorized use or disclosure to the same extent that the receiving party protects its own Confidential Information of a similar nature against unauthorized use or disclosure, but in no event will use less than a reasonable standard of care to protect such Confidential Information. The receiving party will use any Confidential Information of the disclosing party solely for the purposes for which it is provided by the disclosing party.
