EXCLUSIONS AND CLARIFICATIONS

1. Taxes are not included.
2. No special testing or x-raying of the metals is included in this quotation unless otherwise stated.
3. Standard welding procedures are performed in the construction of the valve(s) quoted unless otherwise stated.
4. Unless otherwise stated, Bailey Valve is not responsible for any expenses incurred for the factory onsite inspection required or requested on the above quotation. All expenses will be paid either by the district or the customer.
5. Installation of the valve or any related installation of accessories is not included in this quotation and will be performed by others.
6. Field wiring and design are excluded from scope of supply.

7. **Proposed Schedule:** Upon receipt of contract, begin production of new 12" Motor Operated Model B5 Sleeve Valve. Delivery contingent on approval time, estimated at 6 – 8 months. Upon delivery of the new 12" Motor Operated B5, the existing 12" Pilot Operated Model B5 shall be returned to the Fresno factory for inspection and confirmation of dimensions for conversion replacement parts. Once confirmed, the parts for all three conversions will enter production with approximate lead time of 2 – 3 months for parts and an additional 1 – 2 months for assembly and testing. The remaining two conversions will be supplied to Bailey Valve at customers' discretion.
