

CITY OF SANTA ROSA
CITY COUNCIL

TO: MAYOR AND CITY COUNCIL
SUBJECT: AMENDMENT TO COUNCIL POLICY 000-32,
ENVIRONMENTALLY PREFERABLE PURCHASING
STAFF PRESENTERS: JIM WRIGHT, PURCHASING AGENT, FINANCE
DEPARTMENT & ELISE HOWARD, RESEARCH & PROGRAM
COORDINATOR, UTILITIES DEPARTMENT
AGENDA ACTION: RESOLUTION

ISSUE

Should the Council, by resolution, adopt a revised Council Policy 000-32, Environmentally Preferable Purchasing, to incorporate Extended Producer Responsibilities, other applicable updated City Code, policies and procedures, and industry best practices terminology?

BACKGROUND

1. Council Policy 000-32 sets forth the policies and procedures relating to the purchase, when practical, of the most environmentally friendly goods for use by City staff, and the use of procedures on City projects to minimize as much as possible the environmental impacts.
2. All City departments were asked to review the policy and provide feedback on how the policy should be revised to best reflect their current policies, procedures, and goals that apply to environmentally preferable purchasing. Also, the California Product Stewardship Council was asked to review the policy and assist staff with updating terminology to reflect the most current terminology and industry best practices.
3. The City Attorney's Office reviewed the policy and recommended revisions, and provided feedback, which has been incorporated.

ANALYSIS

1. Since the policy was adopted by Council in March of 2007, many changes have occurred in related City policies and procedures, and in industries related to providing and monitoring environmentally friendly products and services. The following represent the most significant recommended policy revisions:

- a. Extended Producer Responsibilities. Goals adopted by Council are incorporated that encourage durability and minimization of waste in product design, take-back services after products are at the end of their useful lives, documentation to ensure products in fact are being reused or recycled, minimization of greenhouse gas emissions, and participation in recycling programs.
- b. Source Reduction. Encourages printing documents on both sides to reduce paper usage, centralized networked printers and copiers rather than multiple desktop printers, and use of the City's "dish library" supply of reusable dinnerware rather than disposable products.
- c. Recycled Content Products. All pre-printed papers intended for distribution shall contain a minimum 50% recycled content, if practical.
- d. Green Building Products and Practices. Encourages the use of the LEED Rating System for building and renovation designs, construction, and operations, and use of the new City Storm Water Low Impact Development Technical Design Manual for site storm water management on City projects.
- e. Water Savings. Requires the compliance with City Code Chapter 14-30, Water Efficient Landscape, on any new or renovated City projects, and the retrofitting when practical of non-efficient water fixtures with water-saving products.
- f. Landscaping. Encourages contractors to participate in the Bay-Friendly Qualified Landscape Professional and Qualified Water Efficient Landscaper programs. Requires compliance with the new City Storm Water Low Impact Development Technical Design Manual guidelines and with City Code Chapter 14-30, Water Efficient Landscape.
- g. Toxics and Pollution. Requires the use of high efficiency vacuum cleaners by City contractors when practical, prohibits the purchase of products, when practical, that use polyvinyl chloride (PVC), like office binders, furniture, flooring, and medical supplies, and requires the purchase of computers that meet all Electronic Product Environmental Assessment Total (EPEAT) criteria.

RECOMMENDATION

It is recommended by the Finance and Utilities Departments that the Council adopt a revised Council Policy 000-32, Environmentally Preferable Purchasing, to incorporate Extended Producer Responsibilities, other applicable updated City Code, policies and procedures, and industry best practices terminology.

COUNCIL POLICY			
Subject:	Policy Number	Effective Date	Number of Pages
Environmentally Preferable Purchasing	000-32	Month March 20, 2013 07	1 of 12

PURPOSE

1. This policy is adopted in order to:
 - Conserve natural resources, such as water, fuels, fiber, and minerals.
 - Encourage waste stream diversions and reduced land filling of waste.
 - Minimize environmental impacts, such as pollution and habitat destruction.
 - Eliminate or reduce toxics that create hazards to workers, our community, and the environment.
 - Support strong recycling markets, reduce City operating costs where possible, and reduce materials that are landfilled.
 - Increase the use and availability of environmentally preferable products, and support Extended Producer Responsibility (EPR) goals adopted on September 28, 2010.
 - Identify environmentally preferable products and distribution systems.
 - Identify, encourage, and give recognition to manufacturers and vendors that reduce environmental impacts in their production and distribution systems or services.
 - Create a model for successfully purchasing environmentally preferable products that encourages other purchasers in our community to adopt similar goals, and support the ~~City Council Greenhouse Gas Reduction Target adopted August 2, 2005.~~City of Santa Rosa Climate Action Plan adopted on June 5, 2012.
 - Consider life cycle cost analysis when making purchasing decisions.

COUNCIL POLICY			
Subject:	Policy Number	Effective Date	Number of Pages
Environmentally Preferable Purchasing	000-32	Month March 20, 2013 07	2 of 12

1. It is the policy of the City of Santa Rosa to:

- ~~Purchase~~Select environmentally preferable products and services that reduce waste, that include recycled content, are durable and long-lasting, conserve energy and water, use agricultural fibers and residues, use unbleached or chlorine-free manufacturing processes, are lead-free and mercury-free, and reduce greenhouse gas emissions, when feasible.
- Promote product efficiency and effectiveness.
- Purchase products and services that minimize environmental impacts, toxics, pollution, waste, and hazards to worker and community safety to the greatest extent practicable.
- Encourage and support standardization and consider life cycle costs when making purchases for the City, such as vehicles, computers, and workstations.
- Encourages diversion to the waste stream through beneficial reuse.

PROCEDURE

1. The health and safety of workers and citizens is of utmost importance and takes precedence over all other policies.

~~2. The City of Santa Rosa has made significant investments in developing a successful recycling system and recognizes that recycled content products are essential to the continuing viability of that recycling system. Therefore, to the greatest extent practicable, recycled content shall be included in products that also meet other specifications, such as chlorine free or agricultural bio-based products.~~

2. By incorporating environmental considerations into public purchasing, the City intends to reduce adverse impacts to human health and the environment, reduce its carbon footprint, remove unnecessary hazards from its operations, reduce costs and liabilities, and improve the environmental quality of the region.

3. Nothing contained in this policy shall be construed as requiring a department, purchaser, or contractor to procure products that do not perform adequately for their intended use, exclude adequate competition, or are not available at a

Formatted: Indent: Left: 0"

reasonable price in a reasonable period of time.

4. Nothing contained in this policy shall be construed as requiring the City, department, purchaser, or contractor to take any action that conflicts with local, state, or federal requirements.
5. This policy is intended to supplement the requirements of the referenced Santa Rosa City Code Chapters.

SPECIFICATIONS

1. Source Reduction

- 1.1 ~~P~~The City shall purchase remanufactured and recycled products, such as laser toner cartridges, tires, motor oil, furniture, equipment, and automotive parts whenever practicable, but without reducing safety, quality, or effectiveness.
- 1.2 ~~R~~The City shall require equipment purchased after the adoption of this policy to be compatible with source reduction targets as referred to in this policy, when practicable.
- 1.3 ~~C~~The City shall consider short-term and long-term costs in comparing product alternatives, when feasible. This includes evaluation of total costs expected during the time a product is owned, including, but not limited to, acquisition, extended warranties, operation, supplies, maintenance, disposal costs, and expected lifetime compared to other alternatives.
- 1.4 Purchase Pproducts that are durable, long lasting, reusable, or refillable ~~are preferred~~ whenever feasible.
- 1.5 ~~R~~The City requests vendors to reduce packaging or use the minimum amount necessary for product protection, to the greatest extent practicable.
- 1.6 Specify Ppackaging that is reusable, recyclable, or able to be composted ~~is preferred~~, when suitable uses and programs exist.

Formatted: Indent: First line: 0"

COUNCIL POLICY			
Subject:	Policy Number	Effective Date	Number of Pages
Environmentally Preferable Purchasing	000-32	Month March 20, 201307	4 of 12

1.7 ~~E~~Vendors shall be encourage vendorsd to take back and reuse pallets and packaging materials, or the City shall find alternatives for landfill disposal.

~~1.8~~ Encourage Ssuppliers of electronic equipment, including, but not limited to, cell

1.8 phones, computers, monitors, printers, and copiers, ~~shall be encouraged to~~ take back equipment for reuse or environmentally safe recycling when the City has completed its use of that equipment ~~or discards or replaces it~~, whenever possible. The City shall encourage the purchase of rechargeable batteries whenever feasible.

1.9 Print and copy all documents on both sides when practical to reduce the use and purchase of paper. Printers and copiers shall be set to default to duplex if possible. Staff is encouraged to use shared network printers and copiers and discouraged from purchasing desktop (non-network) printers.

1.10 When planning City events, staff shall consider products that are either recyclable or compostable. Appropriate disposal receptacles shall be available on-site. Staff shall also utilize the City's re-usable dish library at events and meetings to reduce waste and the purchase of products, when practical.

~~1.9~~

2. Recycled Content Products

2.1 All products for which the United States Environmental Protection Agency (U.S. EPA) has established minimum recycled content standard guidelines, such as those for printing paper, office paper, janitorial paper, construction, landscaping, parks and recreation, transportation, vehicles, miscellaneous, and non-paper office products, shall contain the highest post-consumer content practicable, but no less than the minimum recycled content standards established by the U.S. EPA Guidelines, whenever practical. The EPA has developed the Comprehensive Procurement Guidelines, (CPG) for the designation of products.

2.2 Copiers and printers bought or leased shall be designed for use with recycled content products.

2.3 In accordance with California Public Contract Code, Sec. 10409, the City

shall purchase re-refined lubricating and industrial oil for use in its vehicles and other equipment, as long as it is certified by the American Petroleum Institute (API) as appropriate for use in such equipment, and is not prohibited by vehicle or emission reduction manufacturer warranties.

- 2.4 When specifying asphalt concrete, aggregate base, or Portland cement concrete for road and other construction projects, the City shall use recycled, reusable, or reground materials, when practicable.
- 2.5 The City shall encourage the use of fly ash and other recyclable material content in any concrete foundation projects.
- 2.6 The City shall specify and purchase recycled content transportation products, including signs, cones, parking stops, delineators, and barricades, whenever practical.
- 2.7 All pre-printed recycled content papers intended for distribution that are purchased or produced shall contain a minimum 50% recycled content if practical, and clearly state the paper's environmental attributes. For example, the following can be placed in the document's footer, "Printed on 50% post consumer recycled content and chlorine-free paper."
~~a statement that the paper is comprised of recycled content.~~
- 2.8 Allow, as a general rule, the procurement of a product with a recycled or recyclable content over a virgin product if the price is within 2.5% of the virgin product, when products are equivalent (See 2.1 EPA Guidelines).
- 2.9 The City shall make previously used and/or left-over office supplies available for ~~office reuse, located in each City office building.~~ Examples of these supplies are binders, folders, organizers, etc. The City will also broadcast emails and/or post notes to advertise the availability of reusable products ~~at each work center.~~

3. Energy Savings

- 3.1 Where applicable, energy-efficient equipment shall be purchased with the most up-to-date, economically feasible, and proven energy efficiency functions. This includes, but is not limited to, high efficiency ~~space~~

COUNCIL POLICY			
Subject:	Policy Number	Effective Date	Number of Pages
Environmentally Preferable Purchasing	000-32	Month March 20, 2013 07	6 of 12

heating ~~systems~~ and cooling systems, electronics, and appliances.

- 3.2 When practicable, ~~the City shall~~ replace inefficient lighting with energy-efficient equipment, and avoid unnecessary lighting of architectural landscape features, while providing adequate illumination for safety and accessibility.

- 3.3 All products purchased by the City, and for which the U.S. EPA Energy Star certification is available, shall meet the Energy Star certification and possess the Energy Star label, when practicable. When products with Energy Star labels are not available, choose energy-efficient products that are in the upper 25% of energy efficiency as designated by the Federal Energy Management Program.

4. Green Building Products and Practices ~~Construction and Renovations~~

- 4.1 ~~The City will comply with the adopted Santa Rosa Build It Green (SR BIG) guidelines and green points system for the construction of all permanent municipal building and renovation projects which exceed 2,000 sq. ft in area. Consider green building practices for design, construction, and operation as described in the LEED™ Rating System for all building and renovations undertaken by the City.~~

- 4.2 Site construction for City projects shall include storm water prevention best management practices and comply with City Storm Water Low Impact Development Technical Design Manual requirements adopted on August 30, 2011.

5. Water Savings

- 5.1 The City shall purchase water-saving products, whenever practicable. This includes, but is not limited to, high performance toilets, low-flow faucets, aerators, and upgraded irrigation systems.

- ~~5.2~~ The City shall adhere to applicable provisions of the City of Santa Rosa City Code Chapter 14-30 Water Efficient ~~ey~~

5.2 ~~Landscaping Policy (WELP)~~ on any new or renovated City project.

Formatted: Indent: Left: 0"

5.3 ~~Retrofit non-efficient water fixtures with water saving products when practical.~~

6. Landscaping

6.1 All landscape renovations, construction, and maintenance by the City, including workers and contractors providing landscaping services for the City, shall employ sustainable landscape management techniques for design, construction, and maintenance whenever possible, including, but not limited to, integrated pest management, grass cycling, drip irrigation, composting, and procurement and use of mulch and compost that give preference to those produced from regionally generated plant debris and/or food waste programs.

Formatted: Indent: Left: 0"

6.2 ~~Contractors for City contracts for landscape design and maintenance services are encouraged to participate in the Bay-Friendly Qualified Landscape Professional and Qualified Water Efficient Landscaper programs. Contractors' qualifications should include the knowledge of local landscaping techniques, conserving water and energy, protecting water and air quality, and creating wildlife habitat.~~

6.26.3 ~~Plants should be selected to minimize water waste and increase survivability by choosing species that are appropriate to the microclimate, species that can grow to their natural size in the space allotted them, and perennials rather than annuals for color. Native and drought-tolerant plants that require no or minimal watering once established are preferred. Invasive species shall be avoided.~~

Formatted: Indent: Left: 1"

Formatted: Bullets and Numbering

6.36.4 ~~Hardscapes and landscape structures constructed of recycled content materials are encouraged. The City shall limit the amount of impervious surfaces in the landscape, where practicable and where life cycle costs are considered. PorousPermeable substitutes, such as permeable asphalt pervious pavement or pavers, are encouraged for walkways, patios, and driveways, when practical and considering the Americans with Disabilities Act (ADA), and other code or compliance issues.~~

COUNCIL POLICY			
Subject:	Policy Number	Effective Date	Number of Pages
Environmentally Preferable Purchasing	000-32	Month March 20, 2013 201307	8 of 12

6.5 The City shall create swales in landscape renovations and construction to assist in storm water run-off management when practical and when required by City Storm Water Low Impact Development Technical Design Manual guidelines.

6.5 Comply with the City of Santa Rosa City Code 14-30 Water Efficiency Landscape (reference 3).

7. Toxics and Pollution

7.1 To the extent practicable, no cleaning or disinfecting products (i.e. for janitorial or automotive use) shall contain ingredients that are carcinogens, mutagens, or teratogens. These include chemicals listed by the U.S. EPA, ~~or~~ the National Institute for Occupational Safety and Health on the Toxics Release Inventory, and those listed under Proposition 65 by the California Office of Environmental Health Hazard Assessment.

7.2 The use of chlorofluorocarbon (CFC) containing refrigerants, solvents, and other products shall be phased out, and new purchases shall not contain them.

7.3 All surfactants and detergents shall be biodegradable, where practicable, and shall not contain phosphates.

7.4 When maintaining buildings and landscapes, the City shall manage pest problems through prevention and physical, mechanical, and biological controls. The City Recreation and Parks Department has adopted and implemented an Integrated Pest Management (IPM) policy and practices using the least toxic pest control. The IPM shall be adopted by all other departments and City contractors, whenever practicable. (For a copy of the IPM, contact the Recreation and Parks Department.)

~~7.5~~ When maintaining buildings, the City whenever practical shall use products with the lowest

~~7.6~~ amount of volatile organic compounds (VOCs), highest recycled content, and that are low or formaldehyde free, when purchasing materials such as paint,

carpeting, adhesives, furniture, and casework ~~where~~

Formatted: Bullets and Numbering

COUNCIL POLICY			
Subject:	Policy Number	Effective Date	Number of Pages
Environmentally Preferable Purchasing	000-32	Month March 20, 2013 07	9 of 12

~~practicable.~~ Purchase or require janitorial contractors to purchase whenever practical products that meet Green Seal or EcoLoga TM certification standards for environmental preferability and performance.

- 7.5 Purchase or require janitorial contractors to utilize, when practical, vacuum cleaners that meet the requirements of the Carpet and Rug Institute "Green Label" Testing Program – Vacuum Cleaner Criteria, which are capable of capturing 96% of particulates 0.3 microns in size, and operate with a sound level less than 70dBA. Other janitorial cleaning equipment purchased or utilized, if practical, should be capable of capturing fine particulates, removing sufficient moisture so as to dry within 24 hours, operate with a sound level less than 70dBA, and use high-efficiency, low-emissions engines.

Formatted: Bullets and Numbering

- 7.6 The City shall consider the use of carpet squares where practicable.

- 7.7 City shall reduce or eliminate its use of products that contribute to the formation of dioxins and furans. This includes, but is not limited to:

• Purchasing paper, paper products, and janitorial paper products that are unbleached or that are processed without chlorine or chlorine derivatives, whenever possible.

Formatted: Indent: Left: 1.5"

Formatted: Bullets and Numbering

7.7 The City shall not

• Prohibiting purchase of products that use polyvinyl chloride (PVC) for non-water irrigation purposes such as, but not limited to, office binders, furniture, flooring, and medical supplies, whenever practicable.

Formatted: Indent: Left: 1.5"

Formatted: Bullets and Numbering

- 7.8 The City shall purchase products and equipment with no lead or mercury whenever possible. For products that contain lead or mercury, the City will dispose of these products after use in an environmentally safe manner. (including fluorescent lamps and batteries.)

- 7.9 When purchasing or replacing vehicles, the City shall consider fuel efficient and decreased emission alternatives, such as compressed natural gas, bio-based fuels, hybrids, electric batteries, and fuel cells, as available, and as they meet the City's work needs.

COUNCIL POLICY			
Subject:	Policy Number	Effective Date	Number of Pages
Environmentally Preferable Purchasing	000-32	Month March 20, 201307	10 of 12

7.10 The Fleet Manager will establish a limited number of standard vehicles and equipment and options on those vehicles to streamline the purchase, repair, maintenance, warranty, and operator training.

7.11 Vehicle fuels made from renewable energy sources, such as non-wood, plant-based contents (e.g. vegetable oils), are encouraged whenever practicable and where approved by State air pollution control bodies and the Original Equipment Manufacturer (OEM).

7.12 Purchase desktop computers, notebooks, and monitors that meet, at a minimum, all Electronic Product Environmental Assessment Tool (EPEAT) criteria designated as "required" as contained in the Institute of Electrical and Electronics Engineers (IEEE) 1680 Standard for the Environmental Assessment of Personal Computer Products.

Formatted: Indent: Left: 0", First line: 0"

Formatted: Bullets and Numbering

8. Forest Conservation

To the greatest extent practicable, the City shall not procure wood products such as lumber that originates from forests harvested in an environmentally unsustainable manner. When possible, the City shall give preference to wood products that are certified to be sustainably harvested by a comprehensive, performance-based certification system. The certification system shall include independent third-party audits, with standards equivalent to those of the Forest Stewardship Council (FSC) certification or Programme for the Enforcement o-f Forest Certification (PEFC).

8.1 Purchase or re-use used or salvaged wood and wood products whenever practical.

9. ~~Agricultural~~ Bio-Based Products

9.1 Purchase Pppaper, paper products, and construction products made from non-wood, ~~—~~plant-based contents such as agricultural crops and residues ~~are encouraged,~~ whenever practicable and a proven environmental impact reduction is demonstrated.

Environmentally Preferable Purchasing	000-32	Month March 20, 201307	11 of 12

durability and minimization of waste in the product design,

materials content, manufacturing processes, packaging,

distribution, and end-of-life management. Areas of consideration

include the use of virgin material, water, energy, hazardous

substances, product longevity, recycled content, and recyclability

10.2 Consider free or low-cost product take--back services (e.g. collection, recycling, remanufacturing) and proper product disposal.

10.3 Request documentation that products previously purchased or leased are in fact reused, recycled, or otherwise safely managed at the end of their useful lives using best practices.

10.4 Purchase products that minimize greenhouse gas emissions over the entire product lifecycle.

10.5 Participate in industry-financed recycling programs when possible for paint, carpet, batteries, and thermostats. Current programs are offered by the Rechargeable Battery Recycling Corporation (RBC) and Thermostat Recycling Corporation (TRC)

Formatted: Indent: Left: 1", First line: 0.5", No bullets or numbering

IMPLEMENTATION

1. The City Manager or ~~their~~ designee shall implement this policy in coordination with other appropriate City personnel.
2. Successful bidders shall certify in writing that the environmental attributes claimed in competitive bids are accurate. In compliance with State law, vendors shall be required to specify the minimum or actual percentage of recovered and post-consumer material in their products, even when such percentages are zero.
3. Upon request, City employees making the selection from competitive bids shall be able to provide justification for product choices that do not meet the Environmentally Preferable Purchasing criteria in this policy.
4. Purchasers are encouraged to include businesses certified by the Bay Area Green Business Program, or businesses with a documented corporate sustainability strategy and implementation program in requests for products and services.

COUNCIL POLICY			
Subject:	Policy Number	Effective Date	Number of Pages
Environmentally Preferable Purchasing	000-32	Month March 20, 201307	12 of 12

~~5.~~ Purchasers, when practical, shall incorporate product stewardship measures such as take-back and end-of-life management into all requests for products and services.

Formatted: Indent: Left: 0"

~~5-6~~ Vendors, contractors, and grantees shall be encouraged to comply with applicable sections of this policy for products and services provided to the City, where practicable.

Formatted: Indent: Left: 0.5"

Formatted: Bullets and Numbering

~~6-7~~ The City shall conduct an education program on Environmentally Preferable Purchasing for appropriate City employees and vendors.

Formatted: Indent: Left: 0.5"

Formatted: Bullets and Numbering

PROGRAM EVALUATION

1. The City shall periodically evaluate the success of this policy's implementation.

DEFINITIONS

1. "Bay Area Green Business Program" is a partnership of governments and businesses that certify the environmental performance of government agencies and businesses.

2. "~~Agricultural~~ Bio-Based Products" means commercial or industrial products (other than food or feed) that utilize agricultural crops or residues but do not include products made from forestry materials.

Formatted: Indent: Left: 0.5"

~~3.~~ "~~Bay Area Green Business Program~~" is a partnership of governments and businesses that certify the environmental performance of government agencies and businesses.

~~4.~~

~~5-3.~~ "The Carpet and Rug Institute" (CRI) is the national trade association representing the carpet and rug industry. CRI has developed and administered the "Green Label" indoor air quality testing and labeling program for carpet, adhesives, cushion materials and vacuum cleaners. The "Green Label Plus" testing program incorporates additional requirements to meet California's Collaborative for High Performance Schools low-emitting materials criteria.

Formatted: No bullets or numbering

~~3.~~ "Buyer" means anyone authorized to purchase or contract for purchases on behalf of the

Formatted: Bullets and Numbering

COUNCIL POLICY			
Subject:	Policy Number	Effective Date	Number of Pages
Environmentally Preferable Purchasing	000-32	Month March 20, 201307	13 of 12

~~City and its subdivisions.~~

~~7.4.~~ “Chlorine-free” means products processed without chlorine or chlorine derivatives.

~~8.5.~~ “Contractor” means any person, group of persons, business, consultant, designing architect, association, partnership, corporation, supplier, vendor, or other entity that has a contract with the City or serves in a subcontracting capacity with an entity having a contract with the City for the provision of goods or services.

~~9.6.~~ “Dioxins and furans” are a group of chemical compounds that are classified as persistent, bioaccumulative, and toxic by the Environmental Protection Agency.

~~10.7.~~ “Energy Star” means the U.S. EPA’s energy efficiency product labeling program.

~~898.~~ “Energy Efficient Product” means a product that is in the upper 25% of energy efficiency for all similar products, or that is at least 10% more efficient than the minimum level that meets Federal standards.

~~109.~~ “Electronic Product Environmental Assessment Tool” (EPEAT) is a procurement tool to help institutional purchasers in the public and private sectors evaluate, compare and select desktop computers, notebooks and monitors based on their environmental attributes.

~~104.~~ “Extended Producer Responsibility” (EPR) is the extension of the responsibility of producers, and all entities involved in the product chain, to reduce the cradle-to-cradle impacts of a product and its packaging. The primary responsibility lies with the producer, or brand owner, who makes design and marketing decisions.

~~9112.~~ “Federal Energy Management Program” is a program of the Department of Energy that issues a series of *Product Energy Efficiency Recommendations* that identify recommended efficiency levels for energy-using products.

~~1230.~~ “Forest Stewardship Council” is a global organization that certifies responsible, on-the-ground forest management according to rigorous standards developed by a broad variety of stakeholder groups.

~~143.~~ “Green Seal” is an independent, non-profit environmental labeling organization.

Green Seal standards for products and services meet the U.S. EPA’s criteria for third-party certifiers. The Green Seal is a registered certification mark that may appear only on certified products.

~~15 “Integrated Pest Management” (IPM) is an ecosystem-based strategy that focuses on long-term prevention of pests or their damage through a combination of techniques such as biological control, habitat manipulation, modification of cultural practices, and use of resistant varieties. Pesticides are used only after monitoring indicates they are needed according to established guidelines, and treatments are made with the goal of removing only the target organism. Pest control materials are selected and applied in a manner that minimizes risks to human health, beneficial and non-target organisms, and the environment. (For a copy of the IPM, contact the Recreation and Parks Department.) (move to after GHG)~~

~~14.6~~ “Greenhouse Gases” occur naturally in the atmosphere, while others result from human activities. Naturally occurring greenhouse gases include water vapor, carbon dioxide, methane, nitrous oxide, and ozone. Certain human activities, however, add to the levels of most of these naturally occurring gases.:

~~15. “Integrated Pest Management” (IPM) is an ecosystem-based strategy that focuses on long-term prevention of pests or their damage through a combination of techniques such as biological control, habitat manipulation, modification of cultural practices, and use of resistant varieties. Pesticides are used only after monitoring indicates they are needed according to established guidelines, and treatments are made with the goal of removing only the target organism. Pest control materials are selected and applied in a manner that minimizes risks to human health, beneficial and non-target organisms, and the environment. (For a copy of the IPM, contact the Recreation and Parks Department.)~~

~~Carbon dioxide is released to the atmosphere when solid waste, fossil fuels (oil, natural gas, and coal), and wood and wood products are burned.~~

~~Methane is emitted during the production and transport of coal, natural gas, and oil. Methane emissions also result from the decomposition of organic wastes in municipal solid waste landfills, and the raising of livestock.~~

~~Nitrous oxide is emitted during agricultural and industrial activities, as well as during combustion of solid waste and fossil fuels.~~

~~Very powerful greenhouse gases that are not naturally occurring include hydrocarbons (HFCs), perfluorocarbons (PFCs), and sulfur hexafluoride (SF6), which are generated in a variety of industrial processes.~~

~~Each greenhouse gas differs in its ability to absorb heat in the atmosphere. HFCs and PFCs are the most heat absorbent. Methane traps over 21 times more heat per molecule than carbon dioxide, and nitrous oxide absorbs 270 times more heat per molecule than carbon dioxide. Often estimates of greenhouse gas emissions are presented in units of millions of metric tons of carbon equivalent (MMTCE), which weighs each gas by its GWP value, or Global Warming Potential.~~

167. “LEED~~TM~~ Rating System” means the most recent version of the Leadership in Energy and Environmental Design (LEED~~TM~~) Commercial Rating System, or other related LEED~~TM~~ Rating System, approved by the U.S. Green Building Council and designed for rating new and existing commercial, institutional, and residential buildings.

~~14.17.~~ “Post-consumer Material” means a finished material which would normally be disposed of as a solid waste, having reached its intended end-use and completed its life cycle as a consumer item, and does not include manufacturing or converting wastes.

~~12.18.~~ “Practical” and “Practicable” mean when feasible and compatible with local, state, and federal law, without reducing safety, quality, or effectiveness and where the product or service is available at a reasonable cost in a reasonable period of time, based on life cycle costs.

~~13.19.~~ “Pre-consumer Material” means material or by-products generated after manufacture of a product is completed but before the product reaches the end-use consumer. Pre-consumer material does not include mill and manufacturing trim, scrap, or broke which is generated at a manufacturing site and commonly reused on-site in the same or another manufacturing process.

~~14.20.~~ “Programme for the Endorsement of Forest Certification” (PEFC) is an

~~15.21.~~ "Proposition 65" means a list of chemicals that are known to the State of California to cause cancer, birth defects, or other reproductive harm.

Formatted: Indent: Left: 0.5"

Formatted: Bullets and Numbering

~~16.22.~~ "Recovered Material" means fragments of products or finished products of a manufacturing process, which has converted a resource into a commodity of real economic value, and includes pre-consumer and post-consumer material but does not include excess resources of the manufacturing process.

Formatted: Indent: Left: 0.5"

Formatted: Bullets and Numbering

~~17.23.~~ "Recycled Content" means the percentage of recovered material, including pre-consumer and post-consumer materials, in a product.

Formatted: Indent: Left: 0.5"

Formatted: Bullets and Numbering

~~18.24.~~ "Recycled Content Standard" means the minimum level of recovered material and/or post-consumer material necessary for products to qualify as "recycled products."

Formatted: Indent: Left: 0.5"

Formatted: Bullets and Numbering

~~19.25.~~ "Recycled Product" means a product that meets the City's recycled content policy objectives for post-consumer and recovered material.
