Hello,

I received a notice in the mail of a public hearing for 2220 Fulton Rd. I did have a question regarding the parcel above it which my understanding is state property due to possible plants or animals on the land. Do you know if that is state land and future sites can't be built there or is it possible a builder could build there in the future? I live directly across the parcel on Jaine Ln so I was curious.

Thank you,
Easter Ledesma

Subject: [EXTERNAL] Weed Abatement - Stonebridge Subdivision

Hello Kristinae,

My name is Justin Davis and I live at 2279 Orleans St in Santa Rosa. I am in receipt of your "Notice to Adopt" postcard regarding the development of the property to the north of us (Stonebridge Subdivision at 2220 Fulton Rd.). Our property backs up to the proposed wetlands (East Parcel) section. We are well aware of the project and have attended one of the developers meetings.

The reason I am reaching out to you, is that we need to contact the Developer. They are responsible for weed abatement for the East and West Parcels. The grass is very high behind all of our properties, it is very dry and it is an extreme fire hazard at this time. With the Fourth of July coming up in less than 2 weeks, we are concerned about illegal fireworks catching the field on fire.

If you would be so kind as to put us in touch with the Developer, we would be grateful. Thank you for your assistance.

Regards,

Justin Davis

Good Morning,

I'm reaching out in regards to the 2220 Fulton Road property (Stonebridge Subdivision). Can you contact the owners to make sure weed abatement is conducted? We live in the homes backing up to the property on Orleans Street and the weeds are very tall and dry. In addition, some one has been setting off fireworks at the school bordering the property and we are very concerned about the field catching on fire given how tall and dry the weeds are.

Thank you,
Sama Davis

Subject: [EXTERNAL] Stonebridge project

Hello,

Last year there were scheduled meetings for this project for the community that were canceled at the last minute.

I am seriously considering selling my home which backs up to the project site, before they begin the construction because I have asthma and work from home (construction noise) and would love and update on where this is at?

My understanding was that there would several community meetings prior to the commencement of the project and so far there has been only one.

Thank you very much!

Sincerely,

Julia
