# Slope Analysis Exhibit

1. Site planning minimizes the visual prominence of hillside development by taking advantage of existing site features for screening, including tree clusters, depressions in topography, setback hillside plateau areas, and other natural features;
2. Site development minimizes alteration of topography, drainage patterns, and vegetation on land with slopes of 10 percent or more;
3. Site development does not alter slopes of greater than 25 percent, except in compliance with Section 20-32.020.B (Applicability—Limitations on hillside development);
4. Project grading respects natural features and visually blends with adjacent properties;

5. Building pad location, design, and construction avoids large areas of flat pads, and building forms are instead “stepped” to conform to site topography;
6. The proposed project complies with the City’s Design Guidelines;
7. The proposed project complies with the requirements of this chapter and all other applicable provisions of this Zoning Code;
8. The proposed project is consistent with the General Plan and any applicable specific plan; and
9. The establishment, maintenance, or operation of the use will not, under the circumstances of the particular case, be detrimental to the public health, safety, or general welfare.

# Environmental Review

## California Environmental Quality Act (CEQA)

- CEQA Guidelines Section 15303 (e)
  - Categorically exempt from CEQA it is new construction of various accessory structures

No public comments have been received.

It is recommended by Planning and Economic Development Department that the Zoning Administrator approve the Hillside Development Permit for 3817 Skyfarm Drive.
