

# 2050 General Plan Kaiser Permanente Community Health Needs Assessments Grant

City Council Meeting  
December 17, 2019

Andy Gustavson  
Senior Planner  
Planning & Economic Development

# Background

- Kaiser Permanente's assessments help identify and measure community public health needs and assets.
- The General Plan Update will address impacted economic and environmental conditions in its disadvantaged communities.
- The Grant provides additional funding the City will use to expand its public engagement and promotion of Health City policy in the 2050 General Plan as a means to help identify and correct social and environmental inequity that lead to poor public health outcomes.

# Analysis

- The expanded community engagement will help to ensure the 2050 General Plan will directly benefit lower income residents, who are primarily persons of Hispanic descent and other non-white persons, which comprise 28% and 12% of the City's population, respectively (2010 Census).
- Lower income residents are concentrated in the Roseland, Downtown, West End, and Monroe neighborhoods where public participation in community planning activities is low.

# Recommendation

It is recommended by the Planning and Economic Development Department that the Council, by resolution, approve:

- The acceptance of the \$600,000 Grant.
- Upon receipt of the Grant, amend the Fiscal Year (FY) 2019-20 budget to increase appropriations in General Plan Update JL key 08015.
