- **Neighborhood Meeting – March 2, 2020**
- **Concept Design Review (DRB) – June 4, 2020**

Comments:

- The contrast of the black windows is appreciated.
- Building into existing grade is appreciated.
- Recommended for Building B1 where the podium meets the ground, soften with landscaping or trees at the podium level.
- Consider for the round barn tribute, landscaping and walls to create a void, as a tribute representing the void/loss for the community.
- Consider some restaurants or supportive retails at the Blvd entry at B1 and/or B2 Building.
- The detail and alcoves and balcony areas are appreciated.
- Pay homage to the Round Barn of other iconic structures that were lost, by presenting them on interior/exterior amenity details.
- Consider more native Oaks of varied size and species.
- Include amenities throughout the project. Maybe rethink the proposed fire pit

California Environmental Quality Act (CEQA)

- Project reviewed in compliance with the California Environmental Quality Act (CEQA) and qualifies for streamlining under Sections 15183 and 15168 of the CEQA Guidelines
- Implementation of project is within scope of General Plan and associated environmental impacts were previously reviewed in General Plan EIR
- Environmental Checklist for Streamlined Review prepared for project concludes that the project will not result in new or more severe significant impacts that were not previously identified
- Project required to implement all applicable mitigation measures identified in the EIR

- Future housing would increase traffic in this area
- Question regarding number of affordable units
- Question about Evacuation Plan and permanent generators on site to provide emergency power
- One way in/out for evacuations for Buildings A, B and C is unacceptable
- Santa Barbara Design is not appropriate for Santa Rosa/Sonoma County

The Planning and Economic Development Department recommends that the Zoning Administrator, by resolution, approve the Fountaingrove Inn Multi-Family Rental Housing Project, for a proposed 239-unit development located at 3586 Mendocino Ave, File No. PRJ20-021 (DR20-052 and HDP20-011).
