

Water Transmission FY 2025/2026 Draft Budget and Rates

Sonoma Water

Sonoma Water is a wholesale water supplier to nine cities and water districts that serve more than 600,000 residents in portions of Sonoma and Marin counties. The Russian River provides most of Sonoma Water's water supply with groundwater supply from the Santa Rosa Plain as a secondary source.

Under agreements with the U.S. Army Corps of Engineers, Sonoma Water manages the water supply storage in Lake Mendocino and Lake Sonoma to provide a reliable water supply and maintain minimum instream flow requirements for fish and wildlife protection and recreation in the Russian River and Dry Creek. Sonoma Water holds water-right permits issued by the State Water Resources Control Board that authorize Sonoma Water to store up to 122,500 acre-feet per year of water in Lake Mendocino and up to 245,000 acre-feet/year of water in Lake Sonoma.

The primary points of Sonoma Water's diversion facilities near Forestville include six radial collector wells that extract Russian River underflow that has been filtered through approximately 100 feet of natural sand and gravel. This highly efficient, natural filtration process, with chlorination treatment, produces high-quality, potable water. This water is then fed directly into Sonoma Water's aqueduct system.

The Water Transmission System extends from Sonoma Water's Russian River diversion facilities located near Forestville to the Santa Rosa, Petaluma, and Sonoma valleys. The Water Transmission System consists of over 85 miles of pipelines, seven booster-pump stations, and 18 storage tanks with a combined storage capacity of 128.8 million gallons. The major pipelines that comprise the system and range in diameter from 16 to 54 inches are: the Santa Rosa Aqueduct (built in 1959), the Sonoma Aqueduct (built in 1963), the Petaluma Aqueduct (built in 1962), and the Cotati Intertie (built in 1977).

Sonoma Water remains dedicated to serving our communities and securing our future through responsible resource and environmental stewardship, continued technical innovation, investment in critical infrastructure and effective fiscal management. A few highlights of programs and projects that Sonoma Water accomplishes in collaboration with the water contractors and other partners that benefit the community are summarized below. More information can be found on Sonoma Water's website at: <https://www.sonomawater.org>.

- **Santa Rosa Plain Water Supply Resiliency:** Reactivate three Santa Rosa Plain Wells, utilizing \$6.9 million in Department of Water Resources grant funding for two of the wells, and implement Aquifer Storage and Recovery for additional water supply reliability and alleviate drought impacts to the water contractors and their customers.
- **Regional Water Supply Resiliency:** Sonoma Water has worked collaboratively with the water contractors to improve the region's water supply reliability during periods of water supply shortage due to drought, seismic, and other hazard events. Using Sonoma Water's transmission system as the backbone, Sonoma Water will pursue development of a Regional Water Bank Implementation Strategy to integrate the most significant regional water storage facilities (Lake Sonoma, groundwater basins, Lake Stafford, and Marin Water reservoirs).
- **Hazard Mitigation:** Sonoma Water and its water contractors have invested substantially in efforts to protect water supply infrastructure with continued emphasis on implementing high priority seismic and flood hazard mitigation projects.
- **Sonoma-Marin Saving Water Partnership (SMSWP):** Sonoma Water is administering a \$4 million regional drought resiliency program with a \$2 million United States Bureau of Reclamation grant that is being passed through to the water contractors to implement critical drought resiliency programs.

- Water, Stormwater, and Energy Education Program: Sonoma Water collaborates with the SMSWP and Sonoma Clean Power to bring its education program annually to more than 16,000 local students.
- Dry Creek Habitat Enhancement: Sonoma Water, the water contractors, and the U.S. Army Corps have completed 5 miles of restoration to date. The U.S. Army Corps agreement with Sonoma Water provides a 65 percent cost share to complete fishery habitat restoration work in Dry Creek.

Sonoma Water leverages partnerships to implement programs funded from other sources that also benefit the water contractors and the community they serve:

- Quagga Mussels: Sonoma Water collaborates with the U.S. Army Corps of Engineers, the California Department of Fish and Wildlife, and the California Department of Boating and Waterways on a boat inspection strategy to prevent invasive mussel infestations in Lake Mendocino and Lake Sonoma.
- Forecast Informed Reservoir Operations (FIRO): FIRO is an ongoing collaborative program with Sonoma Water, the U.S. Army Corps of Engineers, and a multi-agency steering committee that began in 2012. FIRO is a flexible water management approach that uses data from watershed monitoring and improved weather forecasting to help water managers selectively retain or release water from reservoirs for increased resilience to droughts and floods.
- San Francisco Bay Advanced Quantitative Precipitation Information System (AQPI): A \$20 million grant from the Department of Water Resources was awarded to Sonoma Water and its partners to install four X-Band radars in the Bay Area to provide improved precipitation and hydrologic information to water agencies, flood control managers, and emergency personnel. The radar data will result in improved management of water supply reservoirs, and improved operations of wastewater systems and flood protection facilities.

Infrastructure Investments

The draft FY 2025/2026 Water Transmission Budget supports Sonoma Water's five-year strategic plan by continuing investments to upgrade aging infrastructure and systems. Sonoma Water's critical water infrastructure, including aqueducts, pipelines, pump stations, storage tanks, and wells supply essential water to all water contractors and ultimately 600,000 residents in Sonoma and Marin county. Undervaluing the actual costs to operate, maintain, and improve this system could jeopardize this essential service with drastic consequences given our role as a wholesaler. Our critical infrastructure is gradually aging after decades of reliable service. A significant portion of it is approaching the end of its useful lifespan. Sonoma Water is currently developing an Asset Management Program. Preliminary assessments of the water production/transmission systems indicate that a large portion is in less than acceptable (i.e. fair, poor, or failed) condition. The age of the infrastructure, current condition of assets, combined with substantial levels of deferred maintenance, underscores the importance of making investments to guarantee a reliable water source for more than 600,000 residents in portions of Sonoma and Marin counties. Furthermore, Sonoma Water is also currently working to prepare a 20-year Comprehensive Water Master Plan on the water production/transmission system. The assessment data collected under the Asset Management Program will be incorporated, along with recommendations of other current seismic and regional resilience planning efforts, into the 20-year Comprehensive Water Master Plan.

Sonoma Water, our water retailers, and the industry at-large are facing very similar challenges: aging infrastructure, rising operating and maintenance costs, water usage fluctuations resulting in lower revenues, etc. These challenges drive rate increases which have a financial impact on end users but are necessary to upgrade infrastructure and ensure reliable service. Similar to the water contractors, Sonoma Water has deferred maintenance and capital projects in an effort to keep water rate increases as low as possible, while providing clean, reliable, essential water for the benefit of the water contractors and the 600,000 customers they serve every day. As presented, the draft budget does not address the full needs of maintenance and improvements for the water transmission system but allows significant progress toward that goal. There will continue to be pressure on rates in the coming years as additional infrastructure investments are required to fully meet the needs of the system. In this budget, Sonoma Water has cut and deferred **more than \$16.69 million in O&M, subfund, and capital projects** from the FY 2025/2026 budget and **\$87.93 million in additional capital project**

costs that would occur in the 3-year required time frame for expending revenue bonds to finance improvements resulting in rate increases of nearly 40 percent, to the proposed rates within this package (7.60% for Sonoma Aqueduct/8.86% for Santa Rosa Aqueduct/9.98% percent for Petaluma Aqueduct).

Sonoma Water works diligently to secure alternate funding and utilize cost effective financing mechanisms to moderate rate increases. Sonoma Water has been successful in securing grants from various sources and has utilized fund balances and bond proceeds in this effort. In fact, Sonoma Water’s wholesale rates (the rates that are charged to water contractors) continue to be among the lowest in the greater Bay Area. Future proposed budgets will continue to prioritize ongoing infrastructure maintenance, replacement, and improvement to ensure a sustainable source of water for the benefit of the communities served.

This draft FY 2025/2026 Water Transmission Budget has been developed based on the 36-month average water deliveries of 42,407 Acre-Feet (AF) and is shown below.

	FY24-25	FY25-26	
	Budget (in Millions)	Budget (in Millions)	Change (in Millions)
Operations and Maintenance	\$45.41	\$45.87	\$0.46
Capital Projects	\$15.66	\$18.28	\$2.62
Biological Opinion Compliance, Water Supply Planning, Water Conservation	\$7.53	\$8.80	\$1.27
Debt Service	\$5.83	\$9.07	\$3.25
Totals	\$74.43	\$82.02	\$7.60
Grants, Use of Fund Balance, and Bond Proceeds	\$18.13	\$21.34	\$3.21

Budget and Rate Reduction Measures: Changes made since January 17, 2025 Draft Water Transmission Budget:

- Reduced rate increase from 10.67% to 8.68% (Santa Rosa Aqueduct), 11.97% to 9.98% (Petaluma Aqueduct) and 9.37% to 7.60% (Sonoma Aqueduct).
- Reduced O&M contract services by an additional \$871,000 by deferring the Collector Capacity Study, and portions of the Natural Hazard reliability study, Wohler-Mirabel Flood Resilience Alternatives Evaluation, Transmission System Condition Assessments, and the Tank Recoating Program. The consequences of reducing the tank recoat program budget are that for the subsequent two fiscal years (FY 2026/2027 and FY 2027/2028), there will be less of a buffer for cost overruns, less water sales revenue, reduced capacity to build fund balance to smooth rates, and on top of the rate increase needed to operate and maintain the water transmission system, there would be up to an additional 3% increase in rates each year just from the tank recoat program. Note that we also deferred Tank recoat costs in the prior year's budget as a rate reduction measure. The additional funding for the tank recoat program has been included in the budget to smooth rates over the 10-year tank recoat program.
- Reduced Watershed Planning/Restoration contract services by \$100,000 for the Dry Creek Habitat Enhancement – Phase 4.
- Reduced Common Facilities FY25/26 budget request by \$1.5 million by deferring design costs for the Water Treatment System Modernization - Phase 2 and deferring project construction of the Collector 3 and 5 Liquefaction Mitigation to FY28/29.
- Incorporated additional revenue of \$860,854 tied to the Warm Springs Dam Hydropower Retrofit Project for FY24/25 in Common Facilities. This revenue reflects a new request for reimbursement from the Power and Water Resources Pooling Authority Cap-and-Trade Program. It has a dollar-for-dollar reduction on the amount of bond funding needed in Common Facilities over the 3-year bond window.
- Revised bond and loan charges: a) updated debt service figures; b) Common Bond Charges are decreasing due to removal of costs tied to the Water Treatment System Modernization - Phase 2 Project, Collector 3 and 5 Liquefaction Mitigation Project, and factoring in the additional revenue to reimburse costs for the Warm Springs Dam Hydropower Retrofit Project.
- Updated Exhibit A to reflect changes noted above and to fix typographical errors in the amount of reductions from the Tank Recoating Program and Ely BPS Flood Control and Electrical Upgrade Project.
- Fixed sum error in calculation of rate for Water Management Planning. This resulted in an additional \$20,000 in expenses, increasing the rate by \$0.47 A/F.
- Various other typographical or sum errors not affecting the rate.

FY 2025/2026 Draft Budget Financial Summary compared to FY 2024/2025 Adopted Budget: Factors affecting the rate increase:

The terms of the Restructured Agreement for Water Supply require that budgeted deliveries be the lesser of the preceding twelve months of water delivered, or the average annual amount of water delivered during the preceding 36 months. This requirement is to ensure Sonoma Water can meet its obligation to set rates at an amount that covers the projected costs for the following year. Sonoma Water must also generate sufficient revenue to cover debt obligations and maintain a debt coverage ratio as stipulated in outstanding bond issuances.

Deliveries remain low by historical standards and trends show negative or flat growth both in the near and long term. Sonoma Water's rate is fully volumetric meaning that lower deliveries drive rates higher. Year-to-year differences in budgeted deliveries averaged over the 3-, 5-, and 10-year periods have been negative, even when

including the deviation proposed and approved in FY 2024/2025 to use the higher of the delivery numbers. Year-to-year differences in actual deliveries inherently have more variability but have also shown flat growth when averaged over the 3-, 5-, and 10-year periods.

Difference in Year-to-Year Budgeted Deliveries			Difference in Year-to-Year Actual Deliveries		
3-year average	5-year average	10-year average	3-year average	5-year average	10-year average
-2.31%	-0.37%	-0.37%	1.30%	0.56%	0.44%

* Increase in actual deliveries in FY20-21 was partially due to the backfilling of Stafford Lake by NMWD. In FY21-22, MMWD took excess winter instream flows. FY22-23 was an historic low at 36,032 AF.

Multiple years of drought and mandated conservation measures resulted in low water deliveries, low water sales revenue, and significantly reduced fund balance reserves. **The FY budgeted deliveries of 42,407 AF represent a 1% decrease (419 AF) from the FY 2024/2025 budget,** and the combination of low reserves, increasing operations and maintenance costs to keep pace with critically needed infrastructure improvements, and capital projects to replace aging infrastructure, has contributed to needed rate increases.

Sources of revenue including water sales and charges for services, federal and state grants, existing fund balances, contributions, interest, and bond financing are detailed below:

Revenues	FY 2025/2026 Draft Budget	Increase/(Decrease) over FY 2024/2025
Water Sales & Charges for Services	\$60,872,586	8.1%
Operating Grants	73,000	(93%)
Capital Grants	0	0%
Contributions	593,870	97.3%
Interest & Investment Earnings	1,100,172	(.8%)
TOTAL	\$62,630,890	6.6%

*Operating Grant decrease associated with \$1 million Sonoma Marin Drought Resiliency USBR WEEG Grant. Grant budgeted in FY24/25. This is a multi-year project and project revenues/expenses will be rolled forward into the adjusted budget.

*Capital Grant figure only reflects new awards. Most capital grants are multi-year projects and project revenues/expenses will be rolled forward into the adjusted budget. New awards not known at budget time will be added to the adjusted budget.

*Contributions include TOW diverted revenue and WUE Passthroughs including the new \$250,000 Spatial Analysis Project which is rate neutral. Without spatial analysis the increase would be 15.7%.

Fund Balance	FY 2025/2026 Draft Budget	Increase/(Decrease) over FY 2024/2025
Use of Fund Balance: 35% from Operating Funds; 65% from Capital Funds	\$ 8,054,728	(24%)

Bond Funds	FY 2025/2026 Draft Budget	Increase/(Decrease) over FY 2024/2025
Use of Bond Funds (FY 2025/2026: issuing \$32.96 million in revenue bonds)	\$ 13,215,000	105%

Budget Requirements:

- Maintain 3-month operating reserve.
- Maintain 1.15x debt coverage bond covenant.
- Rates collect 1.15x debt service in accordance with the provisions of the Water Transmission System Master Ordinance.

Significant efforts have been made to cut and defer **more than \$16.69 million in O&M, subfund, and capital projects** from the FY 2025/2026 budget and **\$87.93 million in additional capital project costs** that would occur in the 3-year required time frame for expending revenue bonds (see Exhibit A). The proposed rate increases are 7.60% to 9.98% for prime contractors served from the three aqueducts. See page xi which also includes rates for Town of Windsor, NMWD, and MMWD. Sonoma Water is not alone in facing rate pressures, as decreasing water sales are forcing other wholesalers and retailers to raise rates beyond historical averages to address maintenance and capital needs.

Operations and Maintenance (O&M)

- 8.1% increase in water sales revenue due to a decrease in deliveries and the rate needed to cover budgeted expenditures.
- 1.0% increase in budgeted expenditures. Budgeted expenditures increase is mostly attributable to cost increases for maintenance equipment, equipment rentals and leases, SCADA system contributions,

utilities, and staff labor costs tied to negotiated labor agreements, offset by decreases in other contract services.

- O&M budget has been reduced by **\$10.04 million** by deferring maintenance costs, studies, and projects. Included in this amount is a **\$3.21 million** reduction to the Tank Recoat Program and a **\$3.05 million** reduction to the SR AQ Cathodic Protection project. These deferrals could result in rate spikes in future years as the projects cannot be deferred indefinitely. See list of deferrals in Exhibit A.
- Deferring maintenance projects reduced the O&M rate increase from more than 21.7% to 1.4%.
- Budgeted projects have been thoroughly reviewed and edited and represent the budgeted work that can reasonably occur in FY 2025/2026. Budgeted maintenance projects are a priority, and further delays and cuts pose detrimental operational impact and risk.
- Must have sufficient net operating revenues to meet 1.15x debt coverage bond covenant requirement. Note that this budget includes a \$32.96M bond issuance to fund the capital program.
- Water Sales Revenue Shortfall:
 - FY 2021/2022: \$1M
 - FY2022/2023: \$10.2M
 - FY 2023/2024: \$1.6M
 - FY 2024/2025: Currently estimating we will meet budgeted deliveries
- FY 2024/2025 expenditures are anticipated to align with the adjusted budget. Unspent budget is rolled forward to subsequent budget years to avoid being included in the rate calculation more than once.

See pages 19-26 for details on major services & supplies, maintenance – equipment, and consulting/contractual services occurring in FY25/26.

Capital Projects

Capital Projects: FY 2025/2026 draft budgeted expenditures of \$18.28 million increased by \$2.62 million or 16.73%. The capital program is fully funded by grants, bonds, and use of fund balance. See detailed list of capital projects on page xvii.

Capital budget has been reduced by **\$5.37 million** by deferring design of Water Treatment System Modernization - Phase 2, construction awards for Collectors 3 and 5 Liquefaction Mitigation, and the Bennett Valley Fault Crossing Project pending availability of grant funding. Capital budget also reduced by **\$87.93 million** in **additional capital project costs** that would have occurred in the 3-year required time frame for expending revenue bonds. See list of deferrals in Exhibit A.

Hazard mitigation projects (\$8.31 million) and infrastructure improvement projects/drought resiliency projects (\$9.97 million) are fully funded by Water Revenue Bonds, Grants, and Fund Balance.

Investing in Infrastructure:

Construction: Hazard Mitigation Projects	\$8,176,284
Ely BPS Flood Control & Electrical Upgrade	426,440
River Diversion Structure (RDS) Upgrade Project	4,000,000
Seismic Retrofit of Storage Tanks	1,057,177
Wilfred Booster Station	2,692,667
Design: Hazard Mitigation Projects	\$130,247
Santa Rosa Creek Crossing	130,247

Construction: Other Capital Projects	\$7,259,724
Mirabel Collector Wells Pump Hoist Upgrades	2,431,357
Occidental Road Well	920,949
Ralphine Tanks Flow Thru Conversion	280,540
Sebastopol Road Well	707,215
Todd Rd Well Discharge Connection	597,110
Warm Springs Dam Hydropower Retrofit	2,322,553
Design Other Capital Projects	\$2,714,165
Kawana-Ralphine SBS Pipeline	767,250
Mirabel/Wohler Storage Building	411,130
Water Treatment System Modernization - Phase 1	526,880
Water Treatment System Modernization - Phase 3 (River Road)	1,008,905

Biological Opinion

- 9.6% increase in revenue due to a decrease in deliveries and the rate needed to cover budgeted expenditures.
- Subfund budget has been reduced by **\$1,062,000** by deferring costs. See list of deferrals in Exhibit A.
- \$3.2 million in Use of Fund Balance reduces rate increase from 202.58% to 14.14%.
- 14.14% rate increase compared to 11.37% increase in FY 2024/2025 when \$1.7 million in Use of Fund Balance was budgeted.
- Expenditures are anticipated to range from \$3 million to \$4.5 million annually in this subfund. A rate of \$45.71/AF at 42,407 AF generates \$1.93 million in revenue. There is a need to increase revenue in this fund to cover a greater portion of annual costs as we continue to utilize fund balance to keep the rate low. If more fund balance were used, there would be a significant rate spike in subsequent years to generate sufficient revenue for the subfund. The rate increase is intended to smooth future rate increases.
- See pages 34-36 for list of consulting/contractual services occurring in FY25/26.

Water Conservation

- 14.1% decrease in revenue due to a reduction in anticipated grant revenue partially offset by rate needed to cover budgeted expenditures.
- 15.11% decrease in expenditures.
- Subfund budget has been reduced by **\$126,000** by deferring costs. See list of reductions in Exhibit A.
- \$210,000 in Use of Fund Balance. Reduces rate increase from 15.51% to 7.20%.
 - FY 2024/2025 Adopted Budget used \$250,000 in Fund Balance to reduce the Water Conservation Rate Increase to 10.11%.
 - Without the Use of Fund Balance in the FY 2024/2025 Adopted budget, the Water Conservation rate increase would have been 20.90%.
- See pages 34-36 for list of consulting/contractual services occurring in FY25/26.

This year the Water Conservation Subfund budget is only inclusive of what is needed to maintain existing successful regional programs of the Partnership, including the Water Education Program, Green Business Program, Garden Sense Program, Water Loss Working Group and Validation Services, QWEL Program, Eco-Friendly Garden Tour, and WaterSmart Plant Label Program. The budget also includes funds to implement a

spatial analysis project for the Sonoma-Marín Saving Water Partnership that has offsetting revenue contributed outside the subfund rate by participating members.

Water Management Planning and Recycled Water and Local Supply

For both of these subfunds, low budgeted expenditures, low rates, and use of fund balance have minimal impact (2.7% and 0.1% respectfully) on the overall rate increase.

Water Management Planning rate is increasing for budget needed for the Annual Water Supply & Demand Assessment and upcoming 2025 Urban Water Management Plan (UWMP). The increase in the rate is to fund a new consultant agreement for these tasks and associated staff time. Sonoma Water used \$156,000 in Fund Balance towards this effort. See pages 34-36 for list of consulting/contractual services occurring in FY25/26.

Recycled Water and Local Supply costs have historically been for Sonoma Water's share of the groundwater sustainability agency's contributions. Sonoma Water's share of mandatory fees has been included in the Agency Operating fund in FY 2024/2025. The rate is set to \$0.14/AF which covers depreciation expenses incurred in the fund.

Debt Service

Debt Service Expenditures increase by \$3.25M or 55.8% resulting from the planned issuance of \$32.96M in 2025 Water Revenue Bonds to fund critical infrastructure projects in Petaluma AQ, and Storage and Common capital funds.

Debt service is driving the majority of the rate increase. A list of capital projects that we anticipate funding with revenue bond proceeds in the 3-year required time frame is shown in the Long-Range Financial Plan.

Summary

The draft proposed budget for FY 2025/2026 is based on accomplishing the required elements of the Biological Opinion, maintenance of facilities, continued implementation of hazard mitigation and reliability projects, and projects to maintain, replace, and improve critical infrastructure.

Significant efforts have been made to cut and defer **more than \$16.68 million in O&M, subfund, and capital projects** from the FY 2025/2026 budget and **\$87.93 million in additional capital project costs** that would occur in the 3-year required time frame for expending revenue bonds (see Exhibit A). The proposed rate increases are 7.60% to 9.98% for prime contractors served from the three aqueducts. See page xi which also includes rates for Town of Windsor, NMWD, and MMWD.

Sonoma Water recognizes the profound impact of natural hazards, the remnants of the COVID-19 pandemic, inflationary pressures, and other economic circumstances to many residents, businesses, and our retail water contractors throughout our county and beyond. In response to the far-reaching financial hardships, Sonoma Water made a conscious effort to reduce rate increases while continuing to maintain system reliability and public health and safety.

Factors affecting the Rate Increase:

- 1.0% decrease in deliveries
- Three years with actual water deliveries at 4%, 21.2%, and 1.2% less than budget. Total budget shortfall over three years is 12,105 AF.
- 1.0% increase in O&M costs.
- 16.7% increase in Capital Project costs mostly attributable to capital project construction costs.
- 16.9% increase in Subfund costs.

- 55.8% increase in debt service tied to 2025 Water Revenue Bond necessary to fund near-term critical capital improvement projects.
- 12.3% of the rate increase is attributable to the O&M budget, 74.9% to capital projects and debt service, and 12.8% to the subfunds (Water Management, Watershed Planning and Restoration, Recycled Water and Local Supply, and Water Conservation).
- Increases in material and equipment costs for aging infrastructure and priority maintenance projects that can no longer be deferred, supply chain disruptions, long lead times on equipment, and the current inflationary environment are putting continued upward pressure on the Water Transmission System budget.

Sonoma Water continues to have one of the lowest wholesale water rates in the San Francisco Bay Area. The chart below compares the proposed FY25/26 (if known) rate per AF to the current rates of other wholesale water agencies in the bay area.

** SFPUC and Valley Water rates for FY25/26 not available and FY24/25 rates are used as a placeholder.*

Proposed rates are shown in the table below:

Charge / Aqueduct	Santa Rosa	Petaluma	Sonoma
Deliveries (Acre-Feet)	42,407		
O&M	\$1,029.16	\$1,029.16	\$1,029.16
Water Management Planning	\$4.57	\$4.57	\$4.57
Watershed Planning & Restoration	\$45.71	\$45.71	\$45.71
Recycled Water and Local Supply	\$0.14	\$0.14	\$0.14
Water Conservation	\$63.83	\$63.83	\$63.83
Total O&M	\$1,143.41	\$1,143.41	\$1,143.41
Storage & Common Bond/Loan Charges	\$246.45	\$246.45	\$246.45
Petaluma Aqueduct Bond/Loan Charge		\$15.66	
Sonoma Aqueduct Bond/Loan Charge			\$144.56
Prime Contractors	\$1,389.86	\$1,405.52	\$1,534.42
Discretionary Charges			
Capital Charges - to build fund balance for future projects	\$11.00	\$0.00	\$34.90
Total Prime Contractors	\$1,400.86	\$1,405.52	\$1,569.32
Total Overall Increase:	8.68%	9.98%	7.60%

Entity	Rate per AF	Rate Increase
Town of Windsor	\$1,400.86	8.68%
Town of Windsor (Diverted Water)	\$114.26	14.32%
NMWD	1,472.48	6.30%
MMWD	\$1,740.53	8.10%

• Deliveries: (Budget Packet Pages 9-14):

FY 2024/2025 Budgeted Deliveries vs FY 2025/2026 Budgeted Deliveries	1.0% decrease
--	---------------

- **Operations and Maintenance (O&M) – Water Transmission O&M Fund (Budget Packet Pages 15-26):**
 - In accordance with the Restructured Agreement for Water Supply:
 - The rate is calculated by dividing operations and maintenance expenditures (less specific cash and noncash revenues and expenditures) by budgeted deliveries.

O&M Fund	Increase (Decrease) in Dollars	Percent Change	Description
Rate per AF	\$13.77	1.36%	Increase is attributable to increased infrastructure maintenance needs.
Revenue	\$4,489,000	7.93%	Increase in revenue is attributable to the rate increase.
Expenditures	\$4,279,000	6.74%	Increase is attributable to cost increases for maintenance equipment, equipment rentals and leases, SCADA system contributions, utilities, staff labor costs tied to negotiated labor agreements, and other expenditures increases described below, offset by decreases in contract services.

Factors affecting the O&M rate:

O&M Fund Expenditures	Increase (Decrease) in Dollars	Percent Change	Description
Labor	\$1,022,000	5.06%	Increase is attributable to an increase in labor costs for maintenance projects, offset by projects deferred to reduce the rate increase. The majority of this increase is due to negotiated labor rates.
Power	\$553,000	13.00%	Power demand and costs expected to increase roughly 13%. The majority of this increase is associated with increased transmission and distribution costs.
Chemicals	(\$1,000)	-0.06%	Costs expected to remain stable after several years of large increases.
Testing/Analysis	\$10,000	4.17%	Increase associated with expanded sampling and analysis tied to the Santa Rosa Plain Wells Projects as well as additional microplastics and Perfluoroalkyl/Polyfluoroalkyl Substances (PFAS) testing.
Contract Services	(\$2,462,000)	-20.46%	Decrease attributable to deferring cathodic protection and tank recoats.
Maintenance - Equipment	\$169,000	6.78%	Increase attributable to increased costs of the Pump 9 replacement offset by \$270,000 in projects that have been deferred to reduce the rate increase.
Rents and Leases - Heavy Eqt	\$175,000	43.75%	Increase to align with FY23/24 actuals.

O&M Fund Expenditures	Increase (Decrease) in Dollars	Percent Change	Description
Equipment Usage Charges	\$105,000	9.55%	Increase attributable to increased use of Sonoma Water equipment to implement routine maintenance projects.
SCADA	\$354,351	16.17%	Increase attributable to water transmission system's share of SCADA maintenance expenses and capital project costs.
Operating Transfers	\$3,824,000	8.00%	Operating Transfers (OT's) move revenue generated by rates into respective funds (debt service funds, subfunds, aqueduct capital funds and Common Facilities) and maintain an appropriate fund balance.

- **Subfunds: (Budget Packet Pages 27-36):**

- Subfund rates are calculated by dividing subfund expenditures minus grant revenue by budgeted water deliveries.
- Water Management Planning:
 - Expenditures are for Urban Water Management Planning (UWMP) which is required to be updated every five years and the Annual Water Supply & Demand Assessment.

Water Management Planning	Increase (Decrease) in Dollars	Percent Change	Description
Rate per AF	\$4.22	1206.1%	Fiscal Year 2024/2025 rate is \$0.35. Fund is for Urban Water Management Plan updates and the Annual Water Supply & Demand Assessment. Using \$156,000 in fund balance. Rate increase is due to use of fund balance to reduce rates in prior years and work needed to submit the 2025 Urban Water Management Plan.
Revenue	\$186,000	803.1%	Increase due to subfund rate increase and decreased interest earnings offset by use of fund balance. Increasing use of fund balance to smooth rate increases.
Expenditures	\$205,000	141.4%	Budget increase is due to contract service and staff time related to the Annual Water Supply & Demand Assessment and 2025 Urban Water Management Plan. Low budgeted expenditures, low rates, and use of fund balance have minimal impact (2.7%) on the overall rate increase.

- Watershed Planning and Restoration:
 - Expenditures are for planning, design, and implementation of watershed restoration projects and projects required under the Biological Opinion.

Watershed Planning and Restoration	Increase (Decrease) in Dollars	Percent Change	Description
Rate per AF	\$5.66	14.1%	Fiscal Year 2024/2025 rate is \$40.04. Rate increase is primarily a result of costs associated with maintenance of Dry Creek Phases 4 and 5, RRIFR Estuary Management & Monitoring, the new Biological Opinion, and fire fuel reduction offset by the increased use of fund balance. Rate of \$121.17/AF based on \$5.1M in expenditures and 42,407 AF is reduced to \$45.71/AF by using \$3.2M in fund balance. In Fiscal Year 2024/2025, \$1.7M in fund balance was utilized to offset rate increases.
Revenue	\$190,000	9.6%	Increase due to subfund rate increase and higher interest earnings offset by use of fund balance to reduce and smooth overall rate increase.
Expenditures	\$1,681,000	48.6%	Increase in expenditures for maintenance of Dry Creek Habitat Enhancement Phases 4 and 5, increased efforts for RRIFR Estuary Management & Monitoring, fire fuel reduction, and required efforts for the new biological opinion.

- Recycled Water and Local Supply:
 - Expenditures are for planning, design, and implementation of recycled water and local supply projects. The fund previously included water contractor projects under the Local Recycled Water Tier 2 (LRT2) Program.

Recycled Water and Local Supply	Increase (Decrease) in Dollars	Percent Change	Description
Rate per AF	\$0.14	NA – last FY rate was \$0.	Fiscal Year 2024/2025 rate is \$0.00. Rate increase of \$0.14 for depreciation.
Revenue	(\$2,000)	-22.2%	Using an estimated \$0 in fund balance. Decrease in revenue is associated with decreased expenses in the subfund.
Expenditures	(\$25,000)	-80.6%	Decrease is due to Sonoma Water's share of Groundwater Sustainability Agency mandatory fees moving to the Agency Operating Fund.

Water Conservation:

- Expenditures are for water use efficiency projects, outreach, and education.

Water Conservation	Increase (Decrease) in Dollars	Percent Change	Description
Rate per AF	\$4.29	7.2%	Fiscal Year 2024/2025 rate is \$59.55. Rate increase is primarily a result of not being able to utilize as much fund balance to offset rate as was used in prior year. Rate of \$68.78/AF based on \$2.9M of net expenditures and 42,407 AF is reduced to \$63.83/AF by using \$210,000 in fund balance. In Fiscal Year 2024/2025, net expenditures were 2.8M and \$250,000 in fund balance was utilized to offset rate increases.
Revenue	(\$539,000)	-14.1%	Decrease due to subfund rate increase offset by lower anticipated grant funding than prior year budget.
Expenditures	(\$589,000)	-15.1%	Decrease is associated with decreased planned expenditure due to lack of a new grant funded project. Expenditures are used to implement water use efficiency, outreach and education projects, and address ongoing water conservation needs.

- **Storage, Common, and Sonoma Bond/Loan Charges: (Budget Packet Pages 48-62):**
 - The rates are calculated by dividing the annual debt service and reserve requirements (2015A, 2019A, 2022A, and anticipated 2025A Water Revenue Bonds) by water deliveries.

Storage and Common Bond/Loan Charges	Increase (Decrease) in Dollars	Percent Change	Description
Storage Bond/Loan Charge	\$18.63	59.2%	Fiscal Year 2024/2025 rate is \$31.47. Rate is based on revenue requirement for debt service divided by water deliveries. Total Debt service higher than previous year due to issuance of 2025 Bonds for capital projects in the Storage Fund and decrease in budgeted water deliveries.
Common Bond/Loan Charge	\$65.13	49.6%	Fiscal Year 2024/2025 rate is \$131.22. Rate is based on revenue requirement for debt service divided by water deliveries. Total Debt service higher than previous year due to issuance of 2025 Bonds for capital projects in the Common Fund and decrease in budgeted water deliveries.
Petaluma Aqueduct Bond/Loan Charge	\$15.66	NA – last FY rate was \$0.	Fiscal Year 2024/2025 rate is \$0. Petaluma Aqueduct pays an additional revenue bond charge for the bonds associated with Ely BPS Flood Control and Electrical Upgrade and Wilfred Booster Station Projects. Reduced Aqueduct Capital Charge and use of Fund Balance in prior years results in total Debt service and rate increase that are higher in FY 2025/2026 as Petaluma AQ will be bonding for the first time with the 2025 Revenue Bond Issuance.
Sonoma Aqueduct Bond/Loan Charge	(\$0.93)	-0.6%	Fiscal Year 2024/2025 rate is \$145.49. Sonoma Aqueduct pays an additional revenue bond charge for the bonds associated with Sonoma Booster Station Electrical Upgrade and Pumping Reliability Project, Bennett Valley Fault Crossing Project, and other Creek Crossing Projects on the Aqueduct. Total Debt service lower than previous year due to structure of the bond payments and the fact that Sonoma AQ will not be utilizing funds from the 2025 Revenue Bond Issue.

Aqueduct Capital Charge: (Budget Packet Page 1):

- A discretionary charge is added by the water contractors to build fund balance for future aqueduct capital projects and to provide rate stabilization capacity.
 - The FY 2024-2025 budget included an \$11 per Acre-Foot charge for the Santa Rosa Aqueduct, a \$0 per Acre-Foot charge for the Petaluma Aqueduct, and a \$34.90 per Acre-Foot charge for the Sonoma Aqueduct.
 - The FY 2025-2026 draft budget includes a \$11 per Acre-Foot charge for the Santa Rosa Aqueduct, a \$0 per Acre-Foot charge for the Petaluma Aqueduct, and a \$34.90 per Acre-Foot charge for the Sonoma Aqueduct pending input from the water contractors
- **Overall Draft Proposed Rate Increases: (Budget Packet Pages 1-8):**
 - 8.68% (Santa Rosa Aqueduct); 9.98% (Petaluma Aqueduct); 7.60% (Sonoma Aqueduct)
 - FY2025/2026 budgeted deliveries are based on 36-month average water deliveries (42,407 AF). FY2025/2026 budgeted deliveries are 1.0% less than FY 2024/2025 budgeted deliveries.

FY 2025-2026 Capital Projects

(Budget Packet Pages 37-46):

Water Transmission Budget		FY25-26	
Capital Projects Summary			
Project	Category	Amount	Status
Santa Rosa Creek Crossing	Santa Rosa AQ	130,247	Funding de-obligated; re-evaluating project design and schedule
Ely BPS Flood Control & Electrical Upgrade	Petaluma AQ	426,440	Awarded Q3 FY21/22; Delayed due to Elec Supply Chain issues; Substantial Completion anticipated Oct 2025
Wilfred Booster Station	Petaluma AQ	2,692,667	90% design; Prepurchase Elec Equip in fabrication; Anticipate Construction Award Q1 FY25/26
Kawana-Ralphine SBS Pipeline	Storage	767,250	Consultant Selection 24/25; multi year design; construction award anticipated FY28/29
Seismic Retrofit of Storage Tanks	Storage	1,057,177	Site specific geotech planned at each tank; seismic upgrades tied to Tank Recoat schedule
Ralphine Tanks Flow Thru Conversion	Storage	280,540	1st tank design underway; flow mixing system upgrades tied to Tank Recoat schedule
Mirabel Collector Wells Pump Hoist Upgrades	Common	2,431,357	Design agrmt anticipated Q3 FY24/25; construction award anticipated Q4 FY25/26
Mirabel/Wohler Storage Building	Common	411,130	Design Advancing; CEQA/permitting commencing Q4 FY24/25; Anticipate award FY26/27
River Diversion Structure (RDS) Upgrade Project	Common	4,000,000	Design Advancing; Anticipate award in FY25/26
Occidental Road Well	Common	920,949	Well drilling contract complete FY23/24; topside design complete FY24/25; construction award in Q4 FY24/25
Sebastopol Road Well	Common	707,215	Construction ongoing; delays in electrical equipment delivery; Substantial Completion anticipated Q4 FY24/25
Todd Rd Well Discharge Connection	Common	597,110	Design and Construction award in 25/26
Warm Springs Dam Hydropower Retrofit	Common	2,322,553	Switchgear pre-purchased in FY24/25. Design being finalized; Anticipate award in Q2 FY25/26
Water Treatment System Modernization - Phase 1	Common	526,880	Design agrmt anticipated Q4 FY24/25; construction award anticipated FY26/27
Water Treatment System Modernization - Phase 3 (River Road)	Common	1,008,905	Land acquisition being explored in FY25/26
	TOTAL	18,280,420

FY25-26

Asset Management Program

250,000

The primary objectives of Sonoma Water's Asset Management Program (AMP) are to improve the cost-effective management of assets throughout their life cycle, promote data sharing and interconnectivity, and demonstrate fiscal responsibility. Phase 1 included review of Sonoma Water's current asset management practices, development of an AMP vision and charter, asset management framework. Phase 2 included condition assessment of the water production facilities (Mirabel & Wohler); assessment of the water tanks, booster stations, and other miscellaneous water facilities; and of several of the wastewater treatment facilities. In addition, the new Computerized Maintenance Management System (CMMS) software implementation is underway and is now live.

To date the AMP has delivered: Asset Management Framework Tech Memo; State of the Assets Tech Memos; Asset Management Implementation Plan (AMIP) Report; Asset Management Program Statement of Commitments; assessment of the water and wastewater facilities; and have begun the implementation of the CMMS software. In FY 24/25, Phase 3 will involve integrating the recommendations during Phase 2 into the full roll-out of the enterprise-wide AMP, implementing the selected CMMS software, furthering data management and integration and continuing with additional condition assessments of water and wastewater facilities. Future work for FY 24/25 and 25/26 will involve continued integration with the CMMS software. Additionally, there will be a focus on implementing the AMP. This may require hiring staff or engaging a consultant to launch the program.

Cathodic Protection - SR/Cotati

355,000

Provide improvements to upgrade the cathodic protection system along the existing Santa Rosa Aqueduct and Russian River-Cotati Intertie. The project includes designing and constructing a new corrosion protection system to protect the pipeline from corrosion and monitor the state of the pipelines. The corrosion protection system will have a useful life of approximately 50 years, and will allow for remote assessment and data collection to quantify the condition of the pipeline and state of the cathodic protection system. The project will be constructed in two phases with a completed project that consists of 27 corrosion protection well sites and 51 test stations.

In FY 21-22, design efforts commenced and CEQA environmental review was completed for the project. In FY23-24, Sonoma Water reengaged design consultants to develop 90% plans and specifications for the Phase 1 Project and anticipated advertisement before the end of FY 24/25. Work completed in FY 23/24 and 24/25 includes electrical design, coordination and design approvals from PG&E, and land surveys of rectifier and test station locations.

Work in FY 25/26 will focus on acquisition of necessary rights-of-way to construct phase 2, environmental permitting, and developing plans and specifications for the remaining rectifier and test station locations.

Collector 5 Structural Evaluation

-

Sonoma Water has conducted preliminary structural evaluations of the Collector buildings and hoist support structures within to support a proposed hoist load capacity increase from 10 tons to 12.5 tons. Preliminary analyses suggest the Collector 5 floor slab does not appear to be adequate for the proposed 12.5 ton hoist load or the original building load.

In FY 23/24, a preliminary structural evaluation was conducted. In FY 24/25, Sonoma Water plans on conducting more sophisticated and detailed structural evaluation possibly including finite element modeling to determine what improvements may be needed to meet loading demands.

LHMP Program Planning

-

The LHMP program planning provides for the maintenance and update to the Local Hazard Mitigation Plan (required for FEMA funding) and the preliminary development of mitigation project concepts for the purposes of preparing grant applications and refining projected costs of projects associated with the Natural Hazard Reliability Mitigation Program.

FY 22-23 funding was used to commence development of the 2023 LHMP Update. In FY23-24, the 2023 draft LHMP Update was finalized and was submitted to CalOES for approval. In FY24-25 Sonoma Water expects to receive CalOES and FEMA approval, and funding may be needed to address comments prior to approval as well as to begin discussions and any necessary coordination with the County's Multijurisdictional LHMP update.

51803 Other Contract Services & 51509 SCADA System Contributions Project Information

**FY25-26
FY25-26**

Regional Water Supply Resiliency Implementation

Retail water providers to over 600,000 people in Sonoma and Marin Counties are regionally connected through existing water supply infrastructure. Along with purchasing wholesale water from the Sonoma County Water Agency, each retail provider also has local supplies which are used to meet the demands of their customers. Although these systems are connected, they are not operated or managed in a coordinated manner, especially in times of water shortage.

Funds expended between FY 19/20 and FY24/25 for the Regional Water Supply Resiliency Study were used to build a decision support model to evaluate the region's resiliency to drought, and natural hazards such as seismic events, wildfires and flooding. Based on modeling scenarios completed for the development and evaluation of projects and strategies to improve the regions water supply reliability during periods of water supply shortage due to drought and seismic events, development of regional water banking strategies were identified as priority initiatives to pursue to improve the regions water supply resiliency. Funds budgeted for FY 24/25 and FY 25/26 will be used to implement priority recommendations from the Regional Water Supply Resiliency Study to develop a Regional Water Bank Implementation Strategy, which would provide a mechanism to integrate the most significant regional water storage facilities (Lake Sonoma, Santa Rosa Plain groundwater basin, Sonoma Valley groundwater basin, Petaluma Valley groundwater basin, Lake Stafford, and reservoirs operated and managed by Marin Water), using Sonoma Water's transmission system as the backbone. Surplus surface water during wet periods could be stored in surface reservoirs or groundwater basins and subsequently extracted during critical drought periods or emergencies thus providing improved resilience and reliability to the region. The scope of work will include (1) develop a Regional Water Bank Strategy; (2) support participant and partner benefit statements; (3) develop and apply regional water bank model; (4) support engagement and outreach; (5) develop funding approach and implementation schedule; and (6) prepare implementation strategy report.

250,000

SCADA System Contributions

2,545,700

The SCADA System Contributions line-item funds the Water Transmission System's portion of routine operations and maintenance of Sonoma Water's SCADA system (including SCADA staff labor) as well as capital improvement projects.

Routine work to operate and maintain the SCADA system on an annual basis includes monitoring system performance, performing software updates and patching, maintaining and replacing hardware, troubleshooting issues, providing user training and support, assessing and revamping programming standards to accommodate new/modified processes and current technologies, and implementing new standards to streamline maintenance and operations.

In addition to annual, routine work, Sonoma Water has undertaken several capital improvement projects to improve the SCADA system over the last few years. These projects are identified in Sonoma Water's SCADA Master Plan. During FY21/22, we completed much of the background work necessary to replace Sonoma Water's entire SCADA software system. This included documenting the logic embedded in the existing SCADA system interface, duplicating that logic into a new PLC, and creating new interface graphics. In FY22/23, we began live, side-by-side testing of the new system software and completed the majority of reporting requirements for the new system. In FY23/24, we cut-over the majority of our sites to the new SCADA system and implemented additional improvements including optimizing system performance and hardware replacements and upgrades.

In FY24/25, we completed migration to the new SCADA system which includes historian, dashboards, and reporting. We also began an extensive planning effort to replace the legacy SCADA radio system. The SCADA radio system replacement design kickoff was held in December 2024. The project will include a joint-effort with Sonoma County TCOMM to improve performance and security of Sonoma Water's SCADA radio system. We also kicked-off a separate project for SCADA Network upgrades, including a focus on firewalls and related security improvements.

In FY25/26, we plan to continue making substantial investments in network equipment (firewalls, switches, routers, power supplies, and new dedicated ISP connections), and will begin replacement of legacy SCADA radio equipment.

51803 Other Contract Services & 51509 SCADA System Contributions Project Information

FY25-26

Tank Maintenance Program

1,400,548

Sonoma County Water Agency (Sonoma Water) owns and operates 18 water storage tanks with a total combined capacity of 128.8 million gallons as a part of the water transmission system that provides clean drinking water to approximately 600,000 residents in nine major cities and water districts within Sonoma and Marin counties. Maintaining these tanks is critical. This program covers a 10-year agreement for maintenance services with a Service Provider.

In FY 24/25 Enhanced Washout Cleaning and Inspections were conducted on 2 tanks, and Visual Inspections were conducted on 12 tanks. FY25/26 funding will be used to conduct Enhanced Washout Cleaning and Inspections on 2 tanks and Visual Inspections for remaining tanks.

Tank Recoating Program

3,754,800

Water storage tanks are an integral component of Sonoma Water's transmission and supply system and provide operational flexibility and system supply resiliency when demand exceeds production capacity. In total, Sonoma Water's 18 welded steel water tanks provide 129 million gallons of storage, which is approximately three times the average daily system demand. Welded-steel tanks are susceptible to corrosion and have a limited functional lifespan of approximately 50 years without coatings. With regularly scheduled and targeted maintenance, monitoring, and recoating activities welded-steel tanks can attain a lifespan of over 100 years. Sonoma Water's Tank Recoating Program specifically targets the protection and maintenance of welded-steel tanks by designing and implementing tank rehabilitation projects that include interior and exterior recoating, structural repairs, and installation of cathodic protection systems to maximize the functional life of each facility.

In FY 22/23 and 23/24 Sonoma Water finalized plans and specifications, solicited bids, and entered an agreement to complete recoating Kastania and Cotati No. 1 tank. In FY 24/25 Sonoma water completed recoating at Kastania and Cotati No. 1, developed plans and specifications for Cotati No. 3, advertised for bids, and is scheduled to award the project in January of 2025. Construction is anticipated to last between March of 2025 and February of 2026. During this time, Sonoma Water will finalize plans and specifications, advertise, and enter a construction agreement to commence recoating at Ralphine No. 1 and Sonoma No. 1 tanks in FY 26/27.

Studies/Planning

Arc Flash Studies

116,840

Arc Flash Studies and Arc Flash Labeling for electrical equipment are required to comply with NFPA 70E (National Electrical Safety Code) and OSHA requirements. Performing the study includes data collection of the electrical system, modeling, and calculations. The Code requires that Arc Flash Studies be updated on a 5-year cycle. The scope includes 28 sites in the Water System which will be completed within a 2-year period.

This update cycle began with a project kick-off in October 2024. By February 2025, data collection will be completed for 10 sites in the Water System, including the largest electrical system at Wohler and Mirabel. Draft reports for these sites will be provided in the Spring of 2025, and finalized in Summer 2025.

In the upcoming FY 25/26, studies will be completed for the 18 remaining sites.

Cathodic Protection Assessment

982,733

This is a new request starting in FY 25/26 to establish a long term program to operate and maintain cathodic protection systems for Sonoma Water's water infrastructure. This project seeks to improve the long-term reliability of infrastructure throughout Sonoma Water's water transmission system by evaluating the effectiveness of the existing cathodic protection systems, identifying deficiencies, and developing a strategy and program to maintain systems and implement improvements as needed.

Specific objectives of the initial assessment include:

1. Enhancing system reliability and preventing premature failure by minimizing corrosion to infrastructure.
2. Extending water transmission system infrastructure service life and avoiding the need for costly repairs.
3. Developing a cathodic protection improvement strategy which accounts for corrosion risks, mitigation feasibility, and costs.
4. Improving operational efficiency by expanding Sonoma Water's cloud-hosted Cathodic Protection monitoring system.
5. Identify program operational and maintenance needs and associated budget and staffing required for continued operation of the system.

Natural Hazard Reliability Study**25,000**

The seismic mitigation planning study will advance feasibility evaluation and refine strategic approaches to implementing measures to mitigate failure risks of the water transmission system to specific seismic vulnerabilities identified as part of prior natural hazard reliability studies. Particular focus of the study will evaluate: 1) liquefaction mitigation solutions to protect collector wells at the Wohler-Mirabel production facilities, 2) strategies that best balance risk mitigation of aqueduct failure at numerous locations of potential seismic vulnerability against a cost-effective and timely implementation approach (including conducting a broad CPT investigation at numerous sites), and 3) analyze alternative seismic retrofit solutions at select water storage tanks.

In FY 22/23, a consultant was contracted to initiate the planning study, coordinating geotechnical investigations, and securing necessary permits and permission to enter agreements. In FY23/24, CPT investigations were performed along with seismic assessment of the water storage tanks. Preliminary design of liquefaction mitigation solution of Collector 5 was also commenced to assess feasibility of implementing a secant pile wall concept. In FY24/25, funding will be utilized to finalize the preliminary design of Collector 5, assess the feasibility to expand design concepts to other collectors, and prepare a final report. In FY25/26, funding will be utilized to update the draft Seismic Assessment of Water Storage Tanks report with site specific geotechnical data that is planned to be collected.

Regional Water Supply Resiliency Study

Retail water providers to over 600,000 people in Sonoma and Marin Counties are regionally connected through existing water supply infrastructure. Along with purchasing wholesale water from the Sonoma County Water Agency, each retail provider also has local supplies which are used to meet the demands of their customers. Although these systems are connected, they are not operated or managed in a coordinated manner, especially in times of water shortage.

Funds expended between FY 19/20 and FY24/25 for the Regional Water Supply Resiliency Study were used to build a decision support model to evaluate the region's resiliency to drought, and natural hazards such as seismic events, wildfires and flooding. Based on modeling scenarios completed for the development and evaluation of projects and strategies to improve the regions water supply reliability during periods of water supply shortage due to drought and seismic events, development of regional water banking strategies were identified as priority initiatives to pursue to improve the regions water supply resiliency. Funds budgeted for FY 24/25 and FY 25/26 will be used to implement priority recommendations from the Regional Water Supply Resiliency Study to develop a Regional Water Bank Implementation Strategy, which would provide a mechanism to integrate the most significant regional water storage facilities (Lake Sonoma, Santa Rosa Plain groundwater basin, Sonoma Valley groundwater basin, Petaluma Valley groundwater basin, Lake Stafford, and reservoirs operated and managed by Marin Water), using Sonoma Water's transmission system as the backbone. Surplus surface water during wet periods could be stored in surface reservoirs or groundwater basins and subsequently extracted during critical drought periods or emergencies thus providing improved resilience and reliability to the region. The scope of work will include (1) develop a Regional Water Bank Strategy; (2) support participant and partner benefit statements; (3) develop and apply regional water bank model; (4) support engagement and outreach; (5) develop funding approach and implementation schedule; and (6) prepare implementation strategy report.

51803 Other Contract Services & 51509 SCADA System Contributions Project Information

FY25-26

Transmission System Condition Assessments

200,000

During FY24/25, Sonoma Water under the Asset Management Program developed an Aqueduct Condition Assessment report that reviewed the water system pipeline infrastructure and developed a risk-based prioritization model for inspections. The report evaluated appropriate inspection technologies and developed an inspection projects prioritization plan. The initiation of inspection projects are planned for FY25/26.

Water System Comprehensive Master Plan

400,000

Sonoma Water aims to develop a Comprehensive Water System Master Plan (Master Plan) to define the programs, policies, and projects required to meet the potable water infrastructure needs of Sonoma Water's service area for the next 20-years. Master Plan development will consider future system demands, current system conditions, and required system improvements. This Master Plan will yield a prioritized list of projects, serving as a guide for financial commitments needed to ensure sufficient operation of the water system's infrastructure. In FY23/24, a consultant was brought under contract and a kick off meeting was held. During FY 24/25, data was collected about the Water System and compiled into TM1 to provide a baseline. Coordination with the Water Contracts is underway and task 2 will work to provide a forecast of future water demands on the system. This FY will also begin the work of generating a basis of cost for projects and a methodology for project prioritization. During FY 25/26, the work from the previous four tasks will be used to identify deficiencies in Sonoma Water's facilities and identify various project groupings to meet long-term capital, operations, and maintenance needs for the Water System.

Watershed Water Quality Monitoring - USGS and LBNL

397,500

Sonoma Water's riverbank filtration (RBF) facilities leverage the natural subsurface sediments to remove chemical pollutants and waterborne pathogens via filtration, adsorption, and degradation. RBF is a low cost and sustainable alternative to traditional drinking water treatment because it relies on natural filtration processes rather than a traditionally engineered water treatment system. Unlike an engineered system, the nature of RBF requires scientific study of the natural system processes to demonstrate continued efficacy amidst changing environmental pressures. Sonoma Water has funded studies in collaboration with USGS and LBNL to develop a robust scientific research program to demonstrate the efficacy of RBF to regulators, to understand the processes that contribute to the efficacy of RBF, and to identify any potential vulnerabilities (e.g., drought, wildfire, emerging contaminants of concern). Following the most recent drought, historically low water levels and reductions in collector efficiency were observed in Collector 6 during summer and fall, 2021. In response, USGS and LBNL developed a monitoring program to assess the role of Russian River streambed clogging (both microbial and physical) on observed reductions in collector efficiency at Wohler and Mirabel. Funds budgeted during FY23/24 and FY24/25 were used to deploy >40 sensors to measure streambed infiltration in the river adjacent to Collectors 1, 2, and 6, collect groundwater, surface water, and streambed water chemistry samples, and conduct geophysical surveying to better understand the development, persistence, and impacts of streambed clogging and its potential impacts on RBF. Funds budgeted for FY25/26 will be used to complete data collection and interpretation, ultimately resulting in publication of the study findings in the peer-reviewed scientific literature. Results from this study will help inform operational decision-making and improve system resilience for Sonoma Water's RBF facilities amidst drought and future climate-change impacts.

**Budget
FY25-26**

Water Management Planning

Annual Water Supply and Demand Assessment: Develop scope, cost, and schedule to complete a water supply and demand analysis and preparation and submittal of the required Annual Water Shortage Assessment Report to the Department of Water Resources by July 1 each year. Results of the Annual Assessment are also required to inform the work of Sonoma Water's contractors' Assessment Reports to DWR.

In FY 23-24 the AWSDA report was completed as described and results shared with the water contractors to inform the completion of their reports. Sonoma Water's completed AWSDA was filed with DWR prior to the July 1, 2024 reporting deadline. In FY 24-25 the AWSDA will again be completed as described and results shared with the water contractors to inform the completion of their reports. Sonoma Water's completed AWSDA will be filed with DWR prior to the July 1, 2025 reporting deadline. The same tasks will be completed in FY 25-26.

\$ 30,000

Watershed Planning/Restoration

RRIFR Decision 1610 Change Petition: Russian River Flows and Fish Flow Project EIR: Continued preparation of Environmental Impact Report for Fish Habitat Flows and Water Rights Project (Fish Flow Project EIR) in preparation for any additional impact analysis, flow modeling, and monitoring needed.. The EIR is being prepared by Sonoma Water staff, with assistance from consultants on some areas of analysis. In FY23/24, most of the work focused on submission of annual Temporary Urgency Change (TUC) Petitions to the State Board to approve the requested changes to minimum in-stream flows as identified in the Biological Opinion and fisheries and water quality monitoring and reporting required by any State Board TUC Order. Work being accomplished in FY24/25 includes updates to modeling and project analysis, and lab analysis for water quality monitoring under the multiple TUC Orders issued in 2024. Work anticipated for FY25/26 includes work on the draft EIR, in particular flow modeling, as well as lab analysis for water quality monitoring related to the annual TUC.

\$ 183,000

RRIFR Estuary Management: Required Annual Biological Opinion Activities: Sonoma Water, in consultation with the National Marine Fisheries Service (NMFS), California Department of Fish & Wildlife (CDFW) and the U.S. Army Corps of Engineers (Corps), is required to annually prepare a lagoon outlet adaptive management plan by April 1; conduct and record monthly surveys of the beach topography and the outlet channel; use a time lapse video camera to record the interaction of waves, tides and the river mouth; conduct baseline monitoring of seals and other pinnipeds, conduct estuary water quality monitoring, conduct juvenile steelhead and coho salmon rearing surveys, and prepare annual reports. Other FY23/24 and FY24/25 activities include installation and monitoring of downstream migrant salmonid traps and water quality monitoring stations. Work being completed in FY24/25 includes preparation of the annual adaptive management plan, renewing regulatory permits, and continuation of monitoring and studies. Work anticipated for FY25/26 includes renewing regulatory permits and monitoring studies.

\$ 435,000

Upper Russian River Water Quality Monitoring: This water quality monitoring was conducted for the Upper Russian River, including the East Fork Russian River above Lake Mendocino and Lake Mendocino to contribute to planning and modeling efforts for the Potter Valley Project (PVP), Lake Mendocino management, Fish Habitat Flows and Water Rights Project, the Forecast Informed Reservoir Operations (FIRO) projects, and TUC orders. Monitoring included the deployment of datasondes and collection of grab samples, as well as laboratory analysis. Work anticipated for FY25/26 includes the efforts described above.

\$ 25,000

Water Transmission Budget

2025-26

Itemized Detail for Subfunds Consulting/Contractual Services

	Budget FY25-26
<u>Landscape Resiliency</u> : Multiyear fire landscape resiliency effort at Lake Sonoma to protect source water quality in partnership with the U.S. Army Corps and CalFire. In FY24/25, met with CalFire and USACE to identify areas that require vegetation treatment, conducted vegetation management, and facilitated CalFire controlled burns. The same tasks will be undertaken in FY 25-26.	\$ 200,000
	<hr/> \$ 843,000
<u>Recycled Water and Local Supply</u>	
Recycled Water and Local Supply costs have historically been for Sonoma Water's share of the groundwater sustainability agency's contributions. Sonoma Water's share of mandatory fees has been included in the Agency Operating fund in FY 2025/2026.	\$ -
	<hr/> \$ -
<u>Water Conservation</u>	
<u>51241-Outside Printing and Binding</u>	
WUE/Water Ed Program materials, Eco-Friendly Garden Tour materials, Water Smart Plant Label materials.	\$ 41,000
