

ATTACHMENT 13E - PART 2

Dear Board members,

We, the signatories to this petition, oppose construction of new pickleball courts behind the Central swimming pool. Below are the reasons for our opposition:

1. The cost of the proposed project is prohibitively high. Our community has limited resources which should be spent on higher priority projects, such as the remodel of the Berger Center.
2. The proposed location will greatly interfere with the enjoyment of the Central swimming pool by its users. The current beautiful views of the greenery and surrounding mountains will be replaced by the unsightly views of 10 foot fences. The peace and quiet of the pool will be shattered by the incessant pickleball noise and shouting of the players.
3. The proposed location will greatly interfere with the quiet enjoyment of their properties by the nearby residents. Construction of the pickleball courts will ruin the views currently enjoyed by such properties and subject them to constant noise from pickleball play, which, in turn, will result in a significant drop in the property values.
4. OVA will expose itself to potentially expensive litigation. There have been a very high number of lawsuits filed in various retirement communities in connection with nuisance created by pickleball. Several Oakmont residents have already complained about pickleball noise and such complaints will grow exponentially if the new courts are constructed near the Central Activity Center.

By signing this petition we respectfully request the Board to stop any further expenditure on the Pickleball Project (also known as the "Central Park Project") and to abandon the project in its entirety.

Dear Board members,

We, the signatories to this petition, oppose construction of new pickleball courts behind the Central swimming pool. Below are the reasons for our opposition:

1. The cost of the proposed project is prohibitively high. Our community has limited resources which should be spent on higher priority projects, such as the remodel of the Berger Center.
2. The proposed location will greatly interfere with the enjoyment of the Central swimming pool by its users. The current beautiful views of the greenery and surrounding mountains will be replaced by the unsightly views of 10 foot fences. The peace and quiet of the pool will be shattered by the incessant pickleball noise and shouting of the players.
3. The proposed location will greatly interfere with the quiet enjoyment of their properties by the nearby residents. Construction of the pickleball courts will ruin the views currently enjoyed by such properties and subject them to constant noise from pickleball play, which, in turn, will result in a significant drop in the property values.
4. OVA will expose itself to potentially expensive litigation. There have been a very high number of lawsuits filed in various retirement communities in connection with nuisance created by pickleball. Several Oakmont residents have already complained about pickleball noise and such complaints will grow exponentially if the new courts are constructed near the Central Activity Center.

By signing this petition we respectfully request the Board to stop any further expenditure on the Pickleball Project (also known as the "Central Park Project") and to abandon the project in its entirety.

Dear Board members,

We, the signatories to this petition, oppose construction of new pickleball courts behind the Central swimming pool. Below are the reasons for our opposition:

1. The cost of the proposed project is prohibitively high. Our community has limited resources which should be spent on higher priority projects, such as the remodel of the Berger Center.
2. The proposed location will greatly interfere with the enjoyment of the Central swimming pool by its users. The current beautiful views of the greenery and surrounding mountains will be replaced by the unsightly views of 10 foot fences. The peace and quiet of the pool will be shattered by the incessant pickleball noise and shouting of the players.
3. The proposed location will greatly interfere with the quiet enjoyment of their properties by the nearby residents. Construction of the pickleball courts will ruin the views currently enjoyed by such properties and subject them to constant noise from pickleball play, which, in turn, will result in a significant drop in the property values.
4. OVA will expose itself to potentially expensive litigation. There have been a very high number of lawsuits filed in various retirement communities in connection with nuisance created by pickleball. Several Oakmont residents have already complained about pickleball noise and such complaints will grow exponentially if the new courts are constructed near the Central Activity Center.

By signing this petition we respectfully request the Board to stop any further expenditure on the Pickleball Project (also known as the "Central Park Project") and to abandon the project in its entirety.

Dear Board members,

We, the signatories to this petition, oppose construction of new pickleball courts behind the Central swimming pool. Below are the reasons for our opposition:

1. The cost of the proposed project is prohibitively high. Our community has limited resources which should be spent on higher priority projects, such as the remodel of the Berger Center.
2. The proposed location will greatly interfere with the enjoyment of the Central swimming pool by its users. The current beautiful views of the greenery and surrounding mountains will be replaced by the unsightly views of 10 foot fences. The peace and quiet of the pool will be shattered by the incessant pickleball noise and shouting of the players.
3. The proposed location will greatly interfere with the quiet enjoyment of their properties by the nearby residents. Construction of the pickleball courts will ruin the views currently enjoyed by such properties and subject them to constant noise from pickleball play, which, in turn, will result in a significant drop in the property values.
4. OVA will expose itself to potentially expensive litigation. There have been a very high number of lawsuits filed in various retirement communities in connection with nuisance created by pickleball. Several Oakmont residents have already complained about pickleball noise and such complaints will grow exponentially if the new courts are constructed near the Central Activity Center.

By signing this petition we respectfully request the Board to stop any further expenditure on the Pickleball Project (also known as the "Central Park Project") and to abandon the project in its entirety.

Dear Board members,

\$300K ?

We, the signatories to this petition, oppose construction of new pickleball courts behind the Central swimming pool. Below are the reasons for our opposition:

1. The cost of the proposed project is prohibitively high. Our community has limited resources which should be spent on higher priority projects, such as the remodel of the Berger Center.
2. The proposed location will greatly interfere with the enjoyment of the Central swimming pool by its users. The current beautiful views of the greenery and surrounding mountains will be replaced by the unsightly views of 10 foot fences. The peace and quiet of the pool will be shattered by the incessant pickleball noise and shouting of the players.
3. The proposed location will greatly interfere with the quiet enjoyment of their properties by the nearby residents. Construction of the pickleball courts will ruin the views currently enjoyed by such properties and subject them to constant noise from pickleball play, which, in turn, will result in a significant drop in the property values.
4. OVA will expose itself to potentially expensive litigation. There have been a very high number of lawsuits filed in various retirement communities in connection with nuisance created by pickleball. Several Oakmont residents have already complained about pickleball noise and such complaints will grow exponentially if the new courts are constructed near the Central Activity Center.

By signing this petition we respectfully request the Board to stop any further expenditure on the Pickleball Project (also known as the "Central Park Project") and to abandon the project in its entirety.
