Planning and Economic Development

Cannabis Retail Application Process

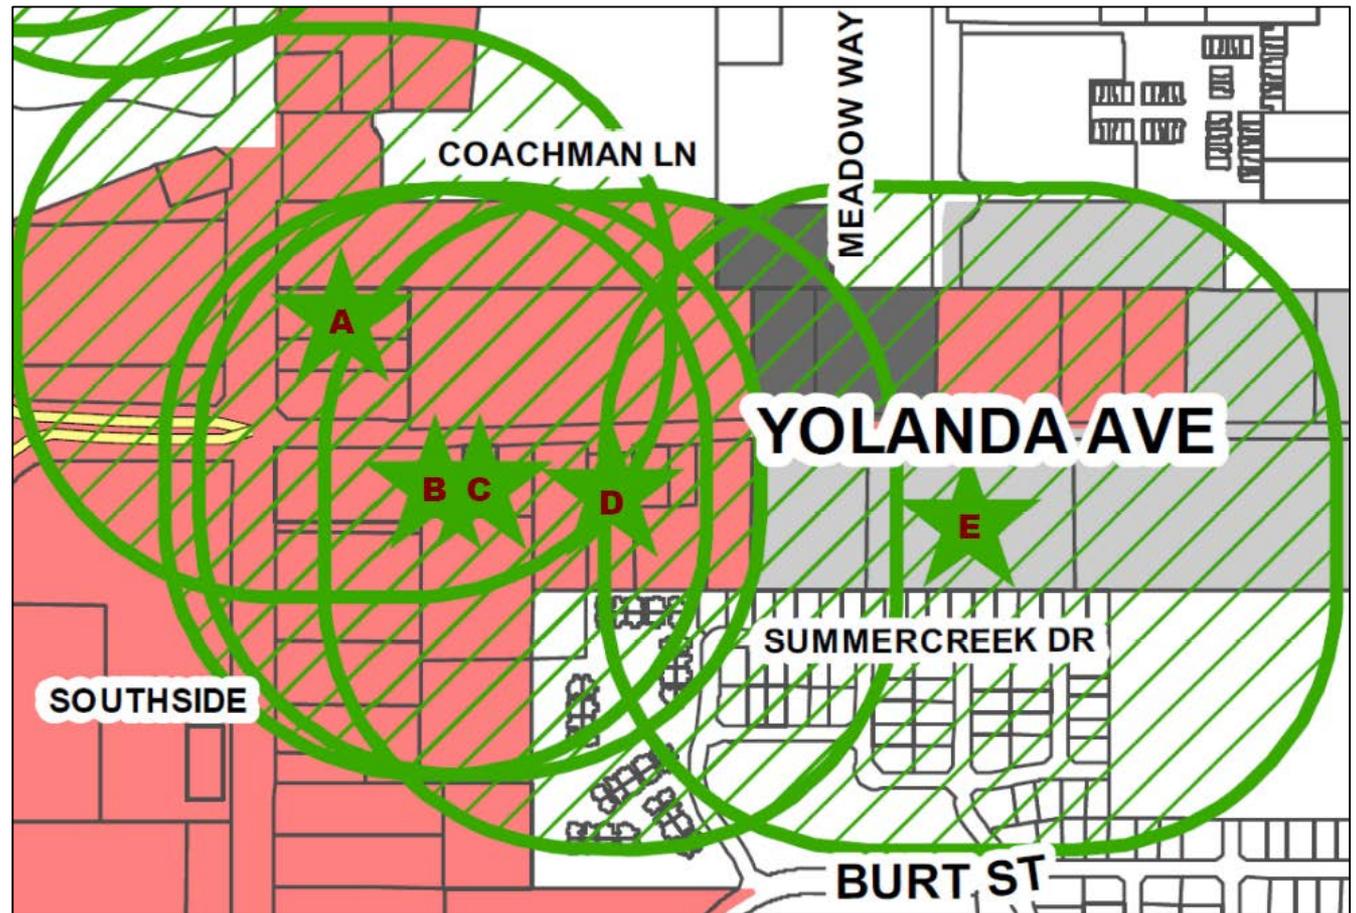

- If a proposed cannabis dispensary location is within 600 feet of another proposed or existing retail location, then the projects enter a competitive merit point based process.
- A total of 21 applications, representing 7 areas of potential overconcentration, were identified for this track.

- Staff evaluated each competitive application against the four criteria in the *City's Cannabis Use Application Retail Use Requirements*.
- During the merit-based review process, applications were evaluated against the merit-based review criteria, but not one another. Each score was based on the quality and extent that an application responded to or addressed the findings identified for each criterion.
- A total of 100 points may be awarded for all criteria.

- Once each individual application within an overconcentration area is scored, staff compares the scores to determine which application within the overconcentration responded best to the merit-based review criteria.
- Staff will recommend the higher scoring application to continue through the entitlement process, which will result in voiding the lower scoring applications in direct competition.
- Once the lower scoring applications are voided, this may result in one or more applications that are no longer within 600 feet of another proposed cannabis retail project. By default, the resulting noncompetitive project applications will move forward in the entitlement process.

Overconcentration Map

Merit Based Review Recommendation

2612 Santa Rosa Ave

Applicant A
CN Santa
Rosa

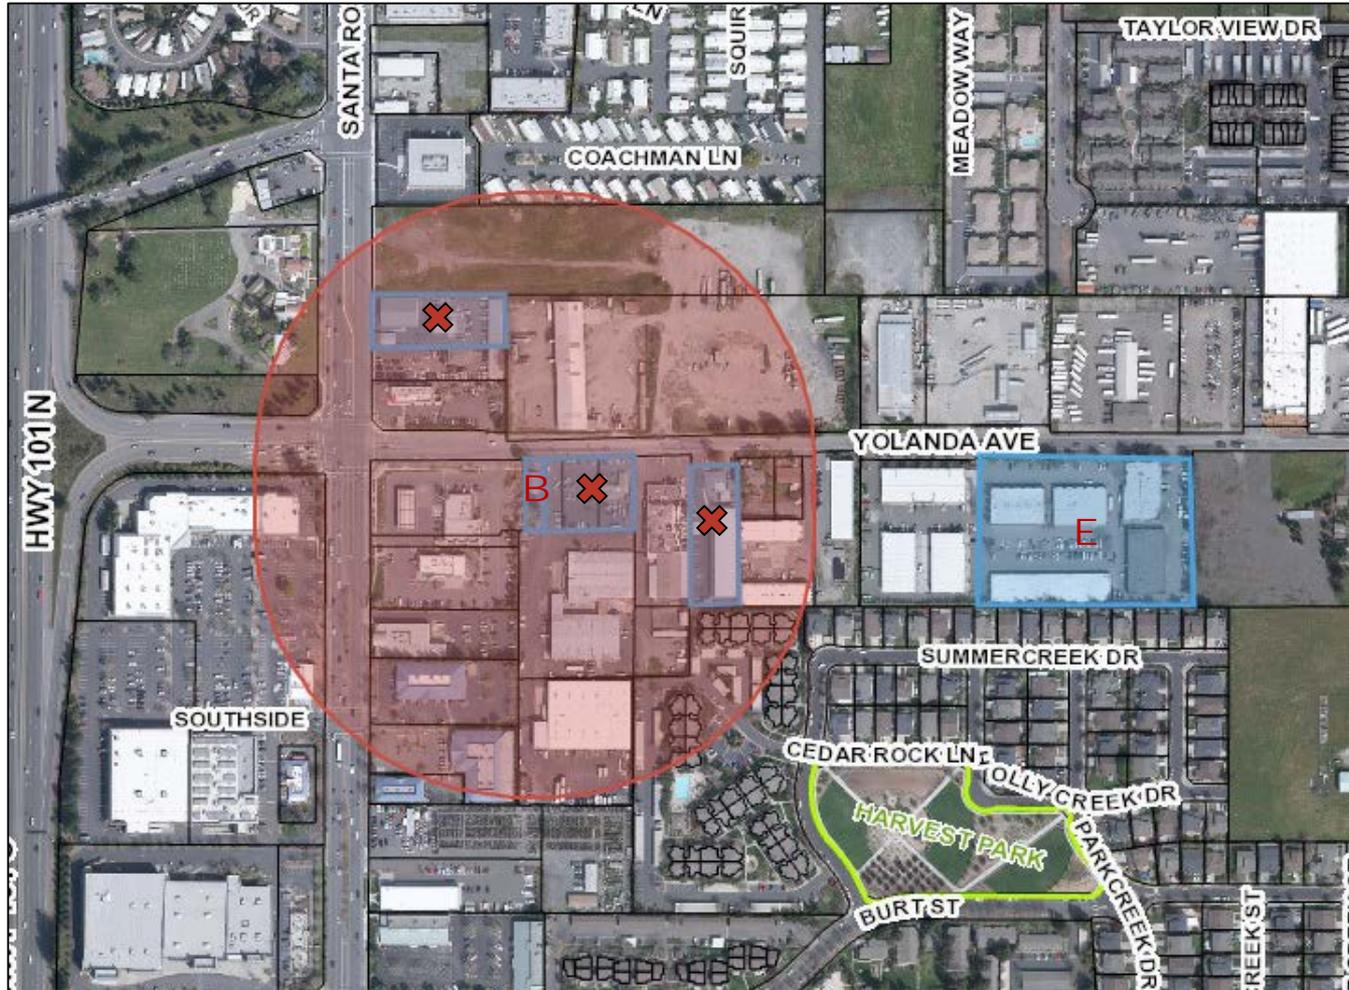

Applicant E
Santa Rosa
NKM

- Since applicant A achieved the highest score, the Department of Planning & Economic Development recommends that the Cannabis Subcommittee, by motion, select applicant A to move forward in the Conditional Use Permit entitlement process.
- As a result of selecting applicant A, applicant E will no longer be competitive, and can also move forward in the Conditional Use Permit entitlement process.
