PAD/FOUNDATION FOR SHED

City of Santa Rosa

JUL 17 2019

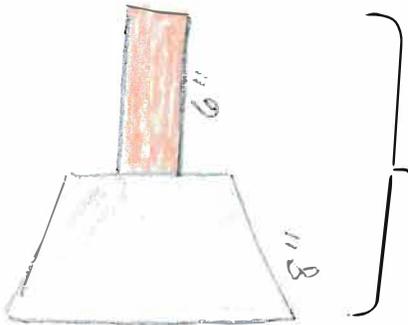

Planning & Economic
Development Department

Ground area underneath shed will have a layer of light gravel for proper settling & drainage.

A frame built from 6"x2" rails with cross supports & floor joists spaced 16" apart will rest on concrete pier blocks and be bolted down.

The walls for the shed will then be attached to this frame.

total height
of frame
& blocks: 14"
