

Agreement By and Between Sonoma County Water Agency and the City of Santa Rosa for Nutrient Offset Credits (Phosphorous)

This agreement ("Agreement") is by and between **Sonoma County Water Agency**, a body corporate and politic of the State of California ("Sonoma Water") and **City of Santa Rosa**, a municipal corporation ("City") (together, the "Parties"). The Effective Date of this Agreement is the date the Agreement is last signed by the parties to the Agreement.

RECITALS

- A. The North Coast Regional Water Quality Control Board (Regional Water Board) approved the Nutrient Offset Program in 2008 through its Resolution No. R1-2008-0061 (Exhibit A).
- B. The Nutrient Offset Program gives the City of Santa Rosa the option to offset the discharge of phosphorus contained in its treated wastewater effluent lawfully discharged during the winter season by conducting work that either prevents or removes equal or greater amounts of phosphorus from unregulated sources of discharge elsewhere in the Laguna de Santa Rosa watershed.
- C. The Regional Water Board subsequently adopted its Water Quality Trading Framework for the Laguna de Santa Rosa (WQTF) on July 11, 2018 by Resolution No. R1-2018-0025 (Exhibit B), which provides for a system of tradable phosphorous credits that can be used as offsets.
- D. At the City's request, Sonoma Water has submitted a Nutrient Offset Project Proposal (Exhibits C & D) (Proposal) to the Regional Water Board, for the purpose of obtaining Regional Water Board approval for nutrient offset credits for Phosphorous ("P Credits") from Sonoma Water's Streambed Maintenance Program operations. The Proposal is within the scope of Sonoma Water's existing CEQA entitlements for the Streambed Maintenance Program and requires no further regulatory entitlements.
- E. The Proposal has been reviewed by the Regional Water Board under the Nutrient Offset Program.
- F. The P Credits must be verified by an independent third party before they are released for use by the Regional Water Board. City intends to apply these P Credits toward its compliance with permitting requirements on annual discharges from the Subregional Facility to the Laguna de Santa Rosa [Order No. R1-2013-0001].
- G. After third-party verification, and after release of the credits for by the North Coast Regional Water Quality Control Board, Sonoma Water intends to sell, and City intends to purchase, up to 20,000 pounds of P Credits at a cost of \$50 per pound for a total amount of not to exceed one million dollars (\$1,000,000).

In consideration of the foregoing recitals and the mutual covenants contained herein, the Parties agree as follows:
