

CERTIFICATE OF ACHIEVEMENT

Park Landscape Maintenance

Park Landscape Maintenance has helped our community save water in the landscape sector for three generations. In 2021, they worked on five commercial turf replacement projects through Santa Rosa Water's Cash for Grass program as well as multiple residential sites to help remove over 30,000 sq ft of turf resulting in an estimated 930,000 gallons of water saved per year. In addition to these projects, they also work hard to manage their customer's properties by adhering to a landscape water budget while keeping the sites healthy. This includes performing routine irrigation system checks and responding quickly to reports of leaks and breaks.
