

AUTHORIZATION TO ISSUE A DESIGN-BUILD REQUEST FOR PROPOSALS FOR COURTHOUSE SQUARE BOLLARDS

City Council Meeting
September 4, 2018

Associate Civil Engineer, Transportation and Public Works

Grant Bailey

BACKGROUND

- This project will install crash-rated bollards in Courthouse Square.
- The project is proposed to be delivered utilizing the design build method.

ANALYSIS

- Crash-rated bollards are typically proprietary systems that are designed by the company that makes them.
- Because the design is specific to each manufacturer's proprietary system, a design-build process would be appropriate to deliver the project.

RECOMMENDATION

- It is recommended by the Transportation and Public Works Department that the Council, by motion, authorize issuance of a Request for Proposals for the design-build construction of crash-rated bollards at Courthouse Square.
- Questions?
