Hi Jason,

Hope you are doing well. I am contacting you on two items in City of Santa Rosa.

- 1) Intersection improvements at SR 12/Boas – Caltrans is preparing a project initiation report (PIR) for a safety project to install either a traffic signal or roundabout at this intersection due to the accident rates. I have attached the conceptual proposals and plan to proceed into environmental phase in the near future. I had a discussion with Rob Sprinkle yesterday and we can coordinate with him on this project. We have a preliminary draft of PIR and if you would like to see the document, we can share it with City.

- 2) College Ave & 3rd St relinquishment – I am following up on the letter of Intent to Relinquish sent to City on January 2016 (see attached letter and maps). Since there has been changes in the personnel from our end, we did not follow up on this on timely fashion. We used to work with Clay Thistle in the past, but I understand he is no longer with the City. Who should we coordinate with on this relinquishment?

I appreciate your help in this matter. If you need more information on these, please let me know.
