SECTION 1: INTRODUCTION

This booklet contains a list of all City fees that might be required of a new or expanding business or residential project in Santa Rosa. The purpose of these fees is to: (i) pay for the installation of public utilities and service facilities needed to serve the property being developed, (ii) collect charges for the use of certain facilities from those benefitting by those services, and (iii) help pay the costs borne by the City in providing preconstruction, construction, inspection, and public safety services.

Some fees change on an annual basis; others may be instituted at City Council discretion. Although the information provided here is as current and complete as possible, it is best to check with City staff to ensure that there are no other requirements that your project might need to meet.

1.01 GENERAL FEE INFORMATION

- **Actual Cost** – Actual Cost means the actual number of staff hours (calculated at the current staff hourly rate) incurred to review the project, plus any third-party consultant or contract costs. Staff
- **Hourly Rate** – Staff Hourly Rate means the average billable staff salary, plus an estimate of benefits and indirect costs.
- **Additional Charges** – If a fee has been paid and processing of that application requires more staff time than has been allocated by the fees charged per this schedule, the project will be assessed for the additional staff time at the staff hourly rate.
- **Double Fees** – Permits requested after work has been started or as a result of a City enforcement action shall be charged double fees.

1.02 ANNUAL FEE ADJUSTMENTS

Unless otherwise noted, fees will be adjusted annually based on the percentage change in the U.S. Bureau of Labor Statistics San Francisco/Oakland/San Jose Consumer Price Index – All Urban Consumers (CPI-U)

1.03 SURCHARGES

Surcharges were adopted as part of [RES-2024-033](#) and are applied to all building, planning, and engineering development fees unless otherwise noted.

1.03a TECHNOLOGY SURCHARGE

The fee is paid with the issuance of all building, planning, and engineering development fees. The fee is for the purpose of cost recovery for specialized license fees, maintenance of computer hardware, and computer software that are instrumental in the City's ability to provide efficient service and maintain accurate records.

- **5.69%** of the cost of the building, planning, and engineering fees

1.03b ADVANCE PLANNING SURCHARGE

This fee is paid with the issuance of the non-trade building, plan review, and planning fees. Fire development fees are excluded from this surcharge. The fee is for the purpose of recovering a portion of the planning agency cost of service associated with advance planning, preparing, and updating the general plan and zoning code, design guidelines and other related services attributable to standards for construction.

- **12.26%** of the cost of the non-trade building, plan review, and planning fees

1.04 FEE REDUCTIONS

Application fees for planning and entitlement permit services are collected at the time an application is submitted. These fees are payable at the Planning and Economic Development Department, City Hall Room 3, 100 Santa Rosa Avenue. Please make checks payable to “City of Santa Rosa.”

Where there is no fee specified, or if additional or enhanced services are required, the Director of Planning and Economic Development shall determine the fee. The determination will be based on the full cost recovery hourly rate for the staff involved ^[2] as well as for any hard costs associated with outside agency fees, public notices, advertisements, and postage.

In addition to the fees shown below, your project may require an Environmental Impact Report (EIR) pursuant to the California Environmental Quality Act (CEQA). These reports are funded by the applicant, managed by City staff and completed by a private professional consultant. The developer is financially responsible for any mitigation measures identified by the Environmental Impact Report.

SECTION 3: IMPACT FEES

This section contains information on various impact fees which are charged to pay for infrastructure or services which are needed to serve development. Development projects may be subject to more than one of these impact fees.

3.01 CAPITAL FACILITIES FEE

The Capital Facilities Fee (City Code Section [21.04](#)) was established to pay for certain public infrastructure facilities required to serve new development within the City. Infrastructure funded by the Capital Facilities Fee includes street widening, traffic signals, freeway interchanges, bike paths, and storm drains. This fee is typically paid prior to the issuance of a building permit, at the Planning and Economic Development Department, City Hall Room 3, 100 Santa Rosa Avenue.

Development Type	Fee (Effective July 1, 2024)
Residential, Very Low Density (0 to 1.99 units/acre)	\$11,315 / unit
Residential, Low Density (2 to 7.99 units/acre)	\$9,924 / unit
Residential, Medium-Low Density (8 to 12.99 units/acre)	\$9,084 / unit
Residential, Medium Density (13 to 17.99 units/acre)	\$8,084 / unit
Residential, Medium-High Density (18 to 30+ units/acre)	\$6,734 / unit
Accessory Dwelling Unit (Second Dwelling/Granny Unit)	\$6,734 / unit
Retail	\$17.56 / gross square foot
Commercial	\$11.33 / gross square foot
Office	\$7.91 / gross square foot
Industrial	\$4.81 / gross square foot

- "Other uses" are determined by the Director of Planning and Economic Development. Other uses include all uses not specified above, including, but not limited to, hospitals, rest homes, other care facilities, and day care centers.
- To determine a fee for service stations, an estimate of square footage is made utilizing the number of cars which can be served simultaneously. Multiply the number of cars which can be served by 250 square feet. The result of this calculation is added to any other retail square footage proposed to determine the fee paid.
- These fees will be adjusted annually each July based on the percentage change in the Bureau of Labor Statistics San Francisco/Oakland/San Jose Consumer Price Index – all Urban Consumers (CPI-U)

3.01a(i) APPLICATIONS SUBJECT TO CAPITAL FACILITIES FEE

- Applications for building permits to construct a residential or non-residential structure.
- Applications for conditional use permits or zoning clearances to change a building's use which does not require a building permit to initiate the use. The fee charged shall be the incremental difference between the current Capital Facilities Fee for the prior use and the current Capital Facilities Fee for the new use.

3.01a(ii) EXEMPTIONS

The following actions and uses are exempt from the requirement to pay the Capital Facilities Fee (CFF):

- Alteration, remodeling, or reconstruction of a nonresidential structure which does not increase the gross floor area above what was in existence and in use on the effective date of this chapter. (*Capital Facilities Fee (City Code Section [21-04](#)) was established with Ordinance [3322](#) and put into effect August 25, 1997.*)
- A development project which the developer establishes to the City's satisfaction will not generate any additional need for public facilities, services or amenities, or any other impact for which a mitigation and/or fee is otherwise required. The burden of establishing by satisfactory proof the applicability and elements of this subsection shall be on the developer. No exemption or limit shall be granted pursuant to this section unless a finding is made, based on satisfactory factual proof provided by the developer, that the requirements of this subsection have been satisfied.

- There are no other exemptions to the CFF.

NOTES:

- *Alteration, remodeling or reconstruction to an existing residential unit creating 400 square feet or more of additional living space is no longer subject to CFF as of July 21, 2018 (Ordinance No. [ORD-2018-013](#)).*

3.02a(ii) WATER DEMAND OFFSET FEES

On March 29, 2022, the Santa Rosa City Council adopted the Water Demand Offset (WDO) Policy ([RES-2022-062](#)). The WDO Policy allows new construction and development to continue during severe water shortages, provided each project offsets its demand for water to achieve a net zero impact. The policy is in effect as of May 30, 2022. Projects which have submitted a building permit application prior to that date are not subject to the policy.

To comply with the WDO Policy, new construction projects must submit a WDO application as part of the building permit application process. Applicants have two routes for compliance: paying a WDO fee (shown below) to fund City programs that will achieve the offsets or proposing an alternative compliance method (funded by the applicant) to achieve the required offsets. Alternative compliance must be pre-approved by the City to be eligible.

Payment of WDO fees (or completion of an approved alternative) would be due when the developer/applicant is seeking final inspection for the construction project, or occupancy of any type – **however, WDO fees would only be due if the City is experiencing a severe water shortage emergency that requires existing water customers to adhere to site-specific water allocations (water rations) at that time.** If the City is not rationing water at that time, the offset requirement would be waived.

Type of Demand Offset	Fee (as of January 1, 2025)
Single Family Unit, Lot over 1 acre	\$5,517
Single Family Unit, over 6,000 sq ft up to 1 acre	\$3,041
Single Family Unit, 6,000 square feet and under	\$2,146
(Multifamily Residential) Duplex & Triplex	\$1,802

3.02c WATER FEE SCENARIOS

WATER FEE SCENARIO #1: A Single-Family Dwelling on a 6,500 sq ft subdivision lot with sewer and water stubbed out to the property:

Fee Type	Fee Amount
Water Demand Fee	\$6,199.00
Water Processing Fee	\$510.00
1" water meter	\$360.00
Sewer Demand Fee	\$6,990.00
Sewer Processing Fee	\$510.00

Scenario 1 Total: \$14,569.00

WATER FEE SCENARIO 2: A 10,000 sq ft office building on a vacant lot. Estimated peak monthly irrigation use is 20,000 gallons per month.

For office use, the average monthly flow is 730 gallons per month per thousand square feet (see Table 15-1 of [ORD-2021-005](#)). $730 \times 10 = 7,300$ gallons per month. We round down to the nearest 1000 gallons, so for this example the amount to purchase would be 7,000 gallons. This is the minimum water & sewer demand purchase. If use is higher, additional demand must be purchased. Water is purchased at a rate of \$516 per thousand gallons per month. Sewer at a rate of \$2,046 per thousand gallons per month.

Fee Type	Calculation	Fee Amount
Water Processing Fee		\$510.00
Domestic Water Demand Fee	$7 \times \$533 =$	\$3,731.00
Irrigation Water Demand Fee	$20 \times \$533 =$	\$10,660.00
1" Water Meter Fee (Domestic)		\$360.00
1" Water Meter Fee (Irrigation)		\$360.00
Sewer Processing Fee		\$510.00
Sewer Demand Fee	$7 \times \$2,117.00 =$	\$14,819.00

Scenario 1 Total: \$30,950.00

In each of these scenarios additional fees may apply. For example, fire flow tests may be required, meter sizes may vary, backflow inspections may be necessary, or if fire sprinklers are required, additional meter and backflow fees will also apply.

Improvement Plan Check fees and Map Review fees are collected at plan submittal. Plan check fees paid will cover the initial plan review and two subsequent plan checks for a total of three.

The amount of the Plan Check fee is determined by City staff based on the estimated value of the public improvements and the applicable engineering fee schedule and rate. The amount due with the first plan check is 50% of the total fee, the amount due with the second plan check is 25% of the total fee, and the amount due with the third plan check is 25% of the total fee.

Additional required plan checks will be performed at the staff hourly billing rate. A deposit will be required to pay for the necessary staff work.

If additional fees are due, based on an updated engineer's estimate, this added amount shall be paid prior to final signing of improvement plan.

Plan Check Fees

- Plan check fees cover the costs of two City review cycles. After two review cycles a staff hourly rate is applied to all additional plan check cycles.
- If a permit is withdrawn prior to issuance, the application processing fee is non-reimbursable. However, plan check fees are reimbursable based upon the number of plan check cycles that have been initiated:

Permits Withdrawn <u>Prior</u> to Issuance	
Amount of work performed by City staff	% Plan Check Fee Reimbursable
No plan check cycle initiated	100%
First plan check cycle has been initiated	50%
Second plan check cycle has been initiated	0%

Definitions & Overview of Encroachment Permit Process Phases

Note: If the applicant is unable to submit electronic applications, submit fee online, e-sign their permit, etc. an accommodation can be requested by contacting Engineering.

- **Application Submittal** – The applicant shall submit a complete application package to the City's satisfaction within 30 calendar days from the date of initial submittal. Failure to provide a complete application package within 30 days results in withdrawal of the permit and forfeiture of fees paid.
- **Plan Check Cycle** – is the number of days allotted to review a project at each submittal. Plan check cycles begin within 2.5 business days of a complete submittal package.

City plan check - should be completed per the below cycles:

Major Encroachment:	Will vary with the public IP process
Minor Encroachment:	2-week plan check cycle
Minor Encroachment w/ Water Review:	3-week plan check cycle
Minor Encroachment – Parklet:	As determined by Code
Private Utility Company – Up to 3 parcels:	1-week plan check cycle
Private Utility Company – Linear Construction:	Will vary by complexity
Private Utility – Small Wireless Facilities:	As determined by Code

Permittee Resubmittal – If applicant receives plan check comments at the end of a City plan check cycle, the applicant must resubmit a revised plan within 30 calendar days from the date in which the plan check comments were delivered.

- **Permit Issuance** – Within 2.5 business days of plan approval, the permit will be ready for issuance. The permittee has 30 calendar days to pay all fees, sign and execute the permit. Once fees are paid, the permittee will receive an email for their e-signature. Signing the document via the e-signature process automatically provides the City with a receipt copy of the executed permit and it is then an issued/active permit. Failure to pay all fees, sign and execute the permit within 30 days results in withdrawal of the permit and forfeiture of fees paid.
- **Start of Work** – Unless otherwise stated in the permit, per City Code § [13-04.110](#) the permittee shall provide notice to the City prior to their start of work/use and shall begin work/use of the permit within 90 days of date of issuance and provide notice to the City prior to their start of work/use. Failure to begin work/use and provide notice as stipulated shall result in the closure of the permit and loss of fees paid.

SECTION 6: BUILDING FEES

6.01 OVERVIEW OF BUILDING PLAN CHECK AND PERMIT FEES

Building plan check and permit fees are established by City ordinance to recover the estimated operating costs of the Building Division. These fees are reviewed on an annual basis. On March 5, 2024, the Santa Rosa City Council approved a fee resolution to modify building permit and plan check fees to be cost based. The valuation calculation will still be used in determining some of the auxiliary fees. Valuation is the total value of the construction work covered by the permit including materials, labor, profit and overhead.

Fees are paid at the Planning and Economic Development Department, City Hall Room 3, 100 Santa Rosa Avenue.

6.02 PLAN REVIEW FEES:

- **Plan Review Fee Schedule**
 - When a plan or other data is required to be reviewed, a plan review fee shall be paid at the time of submitting plans and specifications for review. Said plan review fee shall be based upon the type of occupancy and size of the proposed project (see table in section 6.08). The plan review fees specified in this subsection are separate fees from the permit fees and are in addition to the permit fees. Plan Review fees are applicable to the initial plan review and two additional reviews. After third review the Building Official may assess a new plan check fee or charge hourly rates established by this fee schedule to complete the plan review process.

- **Plan Reviews with no fee indicated**
 - All plan reviews for items not specifically indicated on this schedule will be charged on an hourly basis at staff hourly rates established in this fee schedule with a one hour minimum. The fee will be paid by the project applicant or his/her representative prior to the issuance of the permit.

6.03 PERMIT FEES

The construction plan check and/or inspection (permit) fees for the City of Santa Rosa are calculated based upon the square footage of the construction and the designated occupancy. The table starting at Page 34 identifies the fees for based on size (square feet) for each occupancy classification. Both plan check and inspection fees for new construction include mechanical, plumbing, and electrical items associated with the construction. The plan check fee includes the initial plan check and two submittals. The inspection (permit) fee includes initial inspections as well as one re-inspection.

- **Investigation Fee**
 - Investigation fees for work done without a permit shall be charged per the California Building Code; Equal to the amount of the permit fee required by this code.
