 REVISION:

PROJECT NARRATIVE

The subject property is a contributor to the McDonald Addition Preservation District. It was surveyed in the 1991 Bloomberg Survey with a single photograph 109/08 in a ¼ front elevation view. The garage is not noted or mentioned in the survey.

The proposed project is the demolition of the existing garage and the unremarkable utility porch additions to the rear of the residence. These were added some time after the late 1950's. A sympathetic but distinct addition to the rear of the historic structure will provide an enlarged master bedroom and bath, gallery space and utility room.

According to the N.P.S. Standards of Rehabilitation: "The property will be used as it was historically. The historic character of the property will be retained and preserved. The new addition will not destroy the historic materials, features and spatial relationships characterized in the property. The new work will be differentiated from the old and will be compatible with the historic materials, features, scale and proportions to protect the integrity of the property and its environment."

In order to achieve these objectives the addition will be slightly off set from the side elevation to clearly separate it from the historic structure. A traditional but contemporary style will clearly differentiate it from the old, yet it will be compatible with and reflect the historic materials, features, size, scale, proportions, massing.

A new garage with an Accessory Dwelling Unit above is proposed to replace the existing garage of substandard construction. This structure will be separated as was the previous garage by a covered breezeway reminiscing of the old. The new garage will be in approximately the same location and maintain similar finish materials.

AREA SUMMARY: EXISTING

Residence First Floor	1,516 SF
Residence Second Floor	1,313 SF
Garage	563 SF
Total	3,393 SF

AREA SUMMARY: PROPOSED

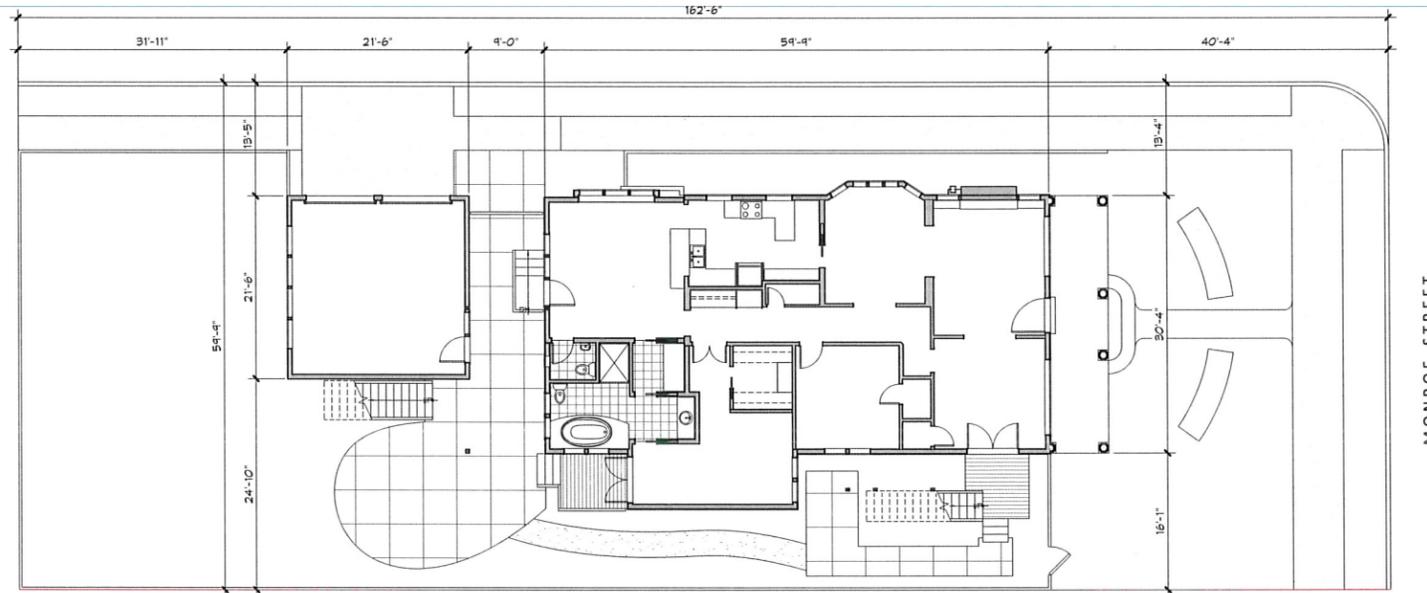

Residence First Floor	1,952 SF
Residence Second Floor	1,313 SF
Guest Unit	462 SF
Garage	462 SF
Total	4,190 SF
