The screenshot shows the City of Santa Rosa Open Data Portal website. The header includes the City of Santa Rosa logo, navigation links for "City of Santa Rosa Portal", "Catalog", and "Developers", and a search bar. The main content area features a large banner with the text "City of Santa Rosa Open Data Portal" and the subtitle "Access to public information to facilitate transparency and knowledge". Below the banner is a grid of teal-colored tiles, each representing a different data category: City Government, Recreation and Parks, Businesses and Economy, Housing and Community, City Finances, Permitting and Development, Fire Services, and Police Services. At the bottom, there are four data visualization tiles: "Current City Budget" (a bubble chart), "Police Calls for Service" (a map with red dots), "MySantaRosa" (a dashboard with various charts and graphs), and "Fire Calls for Service" (a map with red dots). Each tile includes a brief description of the data.

# Data Fuels the 21<sup>st</sup> Century Digital Government

By becoming data-driven, governments transform themselves

The key to progress for digital government maturity is a singular focus on the exclusive use of data in designing and delivering government policies and services.”

- Gartner, 2015
