

# CERTIFICATE OF ACHIEVEMENT

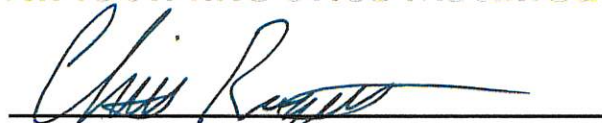

## **Ann Baker Landscape Architecture**

Your efforts as the lead design firm for the Sonoma Marin Saving Water Partnership's Landscape Design Template Project has helped hundreds of residents rebuild from the 2017 fires. Principle Ann Baker led a multidisciplinary team to develop beautiful front yard landscape designs that emphasize low water use and fire safer plants that meet all City requirements. Over 40% of all rebuilds have utilized these free templates!

Ann also gave generously of her time to help the City create realistic architectural renderings to show homeowners what each Template design will look like once installed.
