RE: Review of 34 6<sup>th</sup> Street, Santa Rosa, Sonoma County, California – APN 010-166-00

Dear Mr. Stanley:

Per your June 15, 2021 request, I performed brief background research and conducted a field visit to the above-referenced property.

## **Summary**

The June 18, 2021, site visit determined that the parcel contains no buildings, structures, or above-ground features, including landscapes. The property is, in essence, scraped land.

## **Brief Site Overview**

The site connects historically with the development of the Northwestern Pacific Railroad railyard complex. The 1908 Sanborn Fire Insurance map shows the western half of the parcel occupied by the Santa Rosa Woolen Mills (Figure 2). Established in 1897 by W. B. Humbert, the woolen mills were an important contributor to Santa Rosa's railroad economy.

A fire destroyed the mills in July 1909. After that, the parcel held (as captured in a 1950 Sanborn map) a track-side warehouse (Figure 3). Based on aerial photographs, the warehouse remained on the site through at least the late 1980s (Figures 4 & 5).

By 2001, the lot had been cleared of all fixed structures (Figure 6).

The parcel was then used as a staging area for the Sonoma-Marín Area Rail Transit (SMART) project.

### **Previous Documentation**

A 2007 DPR 523a form for the site provides NRHP Status Codes 1D (Listed in the National Register as a contributor to a district) and 5D1 (Contributor to a district that is listed or designated locally). The form's accompanying photograph shows a tractor-trailer, railroad passenger, and box car. There are no standing structures present.

Its status codes likely reference the warehouse discussed above and identified as Building/Site #5 in the 1979 National Register of Historic Places nomination for the Railroad Square District (NRHP# 79000561)(Figure 7). From a review of aerial photographs, this structure was removed from the site at some point between 1987 and 2001.

There is a clear discrepancy between the 2007 site recordation and the parcel's current condition. As discussed below, there are no buildings, structures, or above-ground features, including designed landscapes.

### **Field Procedures**

The parcel, containing roughly 2.02 acres, is situated in the Station Mixed Use planning area. The SMART right-of-way bounds the level lot at the east, West 6th Street at the north, the parcel holding the former California Fruit Cannery Association Building (6th Street Playhouse) to the west, and an adjoining undeveloped lot at the south.

A site visit was conducted at the parcel on June 18, 2021, on a clear, sunny day. It was determined that the parcel was located in the local Railroad Square Preservation District and the National Register-listed Railroad Square District. The fieldwork consisted of viewing and photographing the parcel from each of its four corners and the Santa Rosa SMART station platform (Figures 9 through 14). Direct access onto the property was not possible due to a 6' chain-link fence.

The area was covered with gravel, train-track ballast, and small sections of broken asphalt. One piece of above-ground concrete may correspond to the foundation or footing of an earlier structure. No standing structures were observed.

The only observed feature was a few utility poles of unknown vintage, carrying lines near the east edge of the property.

### **Findings and Conclusions**

The finding is that the parcel does not contain resources that qualify for listing on the California Register of Historical Resources. There were no visible age-eligible buildings, structures, or landscapes. Correspondingly, no features were observed that meet the criteria for designation on the National Register of Historic Places. Therefore, there are no above-ground elements on the property that meet the CEQA's definition of a historical resource, as per the CEQA Guidelines 15064.5.

Please contact me if you have any questions or comments.

Sincerely,

A handwritten signature in blue ink that reads "John W. Murphey". The signature is stylized with a large, sweeping initial "J" and a long, horizontal flourish at the end.
