

CITY OF SANTA ROSA  
BICYCLE AND PEDESTRIAN ADVISORY BOARD  
STAFF REPORT  
December 15, 2022

**SUBJECT**

North Dutton Avenue Striping Design Proposals

**ISSUE**

Staff will introduce and seek feedback on final design concepts for North Dutton Avenue between West Third Street and West College Avenue.

**STAFF PRESENTER**

Rob Sprinkle, Deputy Director – Traffic Engineering

**RECOMMENDATION**

This item is for Board discussion and input on the proposed design concepts.

**BACKGROUND**

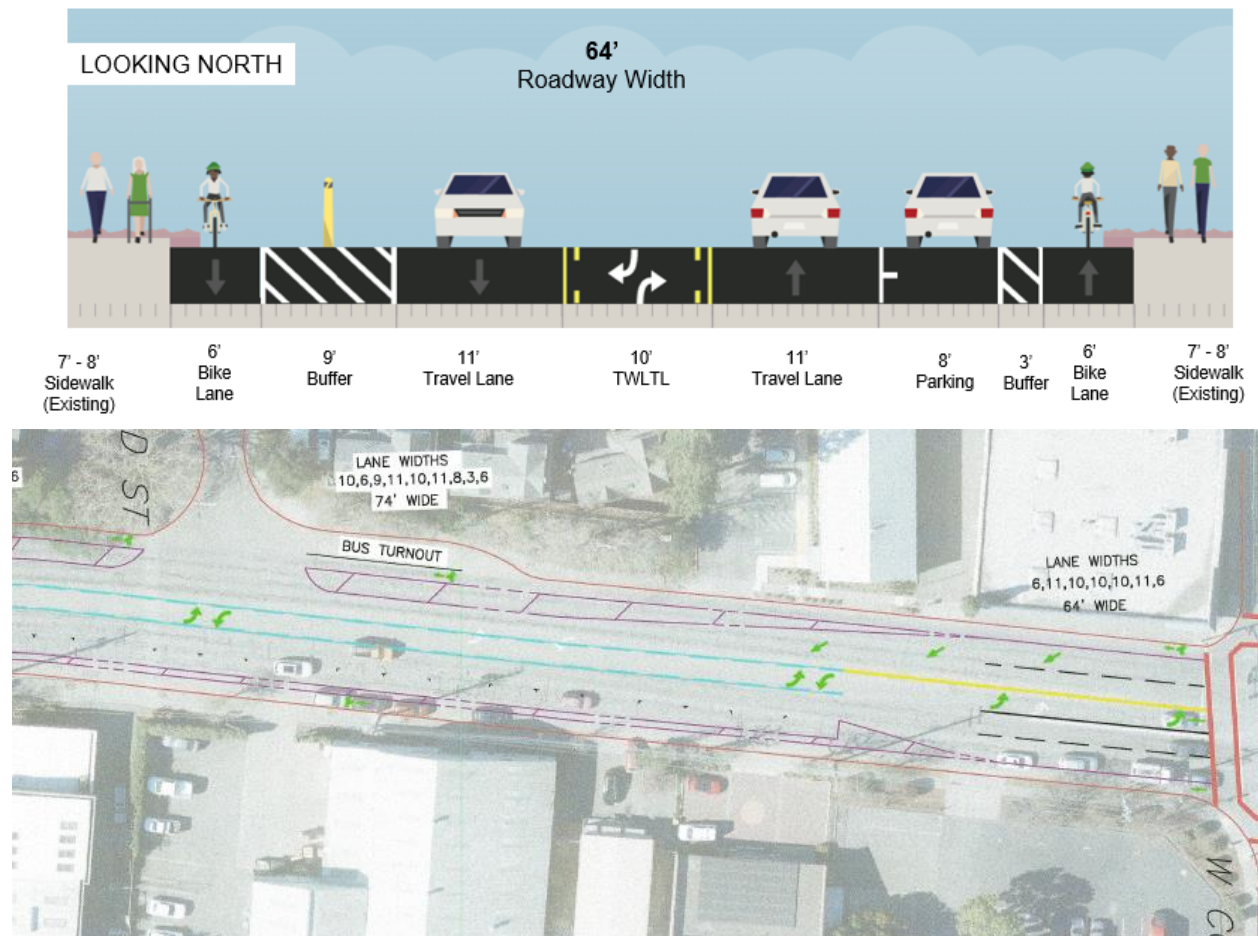

The City of Santa Rosa worked with a consultant to develop a Local Road Safety Plan for several corridors throughout the City. This process included stakeholder and community meetings that provided input as to what was important to include in the restriping project. The Local Road Safety Plan was approved by City Council in July 2022.

**ANALYSIS**

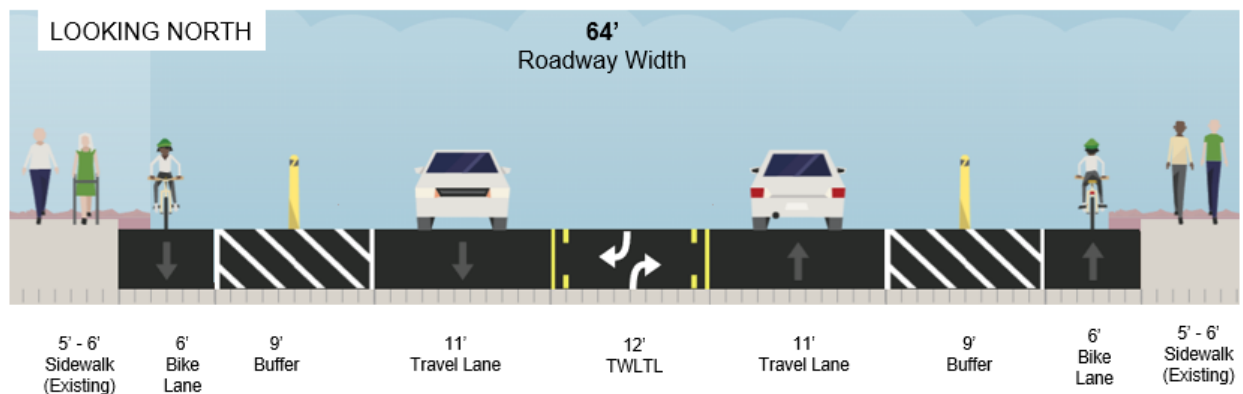

Community meetings for North Dutton Avenue were held in March and November of 2022 with over 20 participants in the March meeting and 12 participants in the November meeting. Additionally, immediately following the March meeting, an online survey was opened, and the City received 17 responses regarding the North Dutton Avenue proposed design.

Taking combined information from the two community meetings and an online survey, the Traffic Engineering Division developed the following cross-sections that are proposed for implementation.

From West College Avenue to Saracen Road:

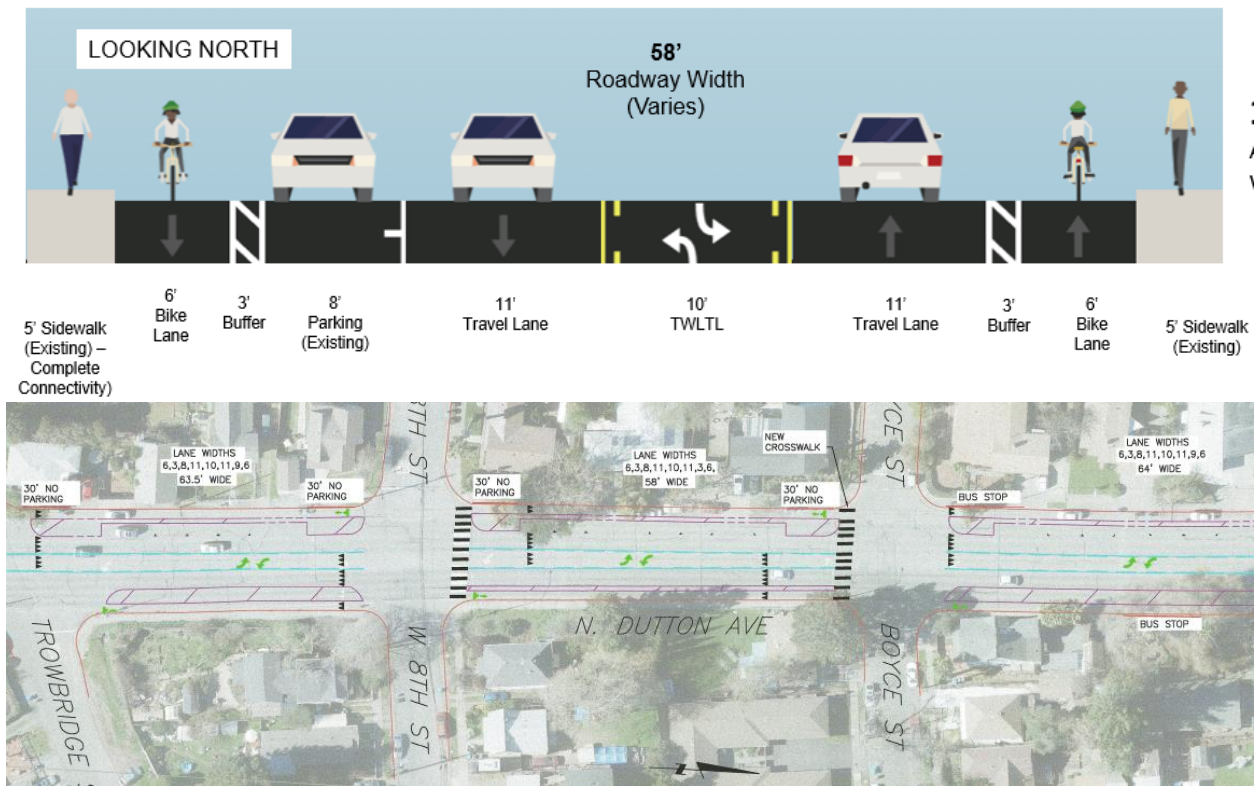

From Saracen Road to West Ninth Street:

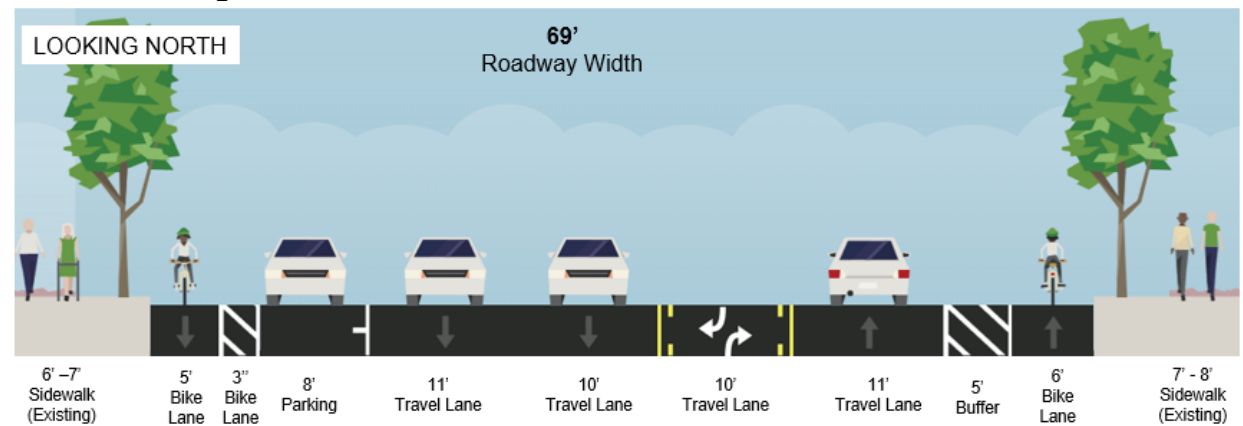

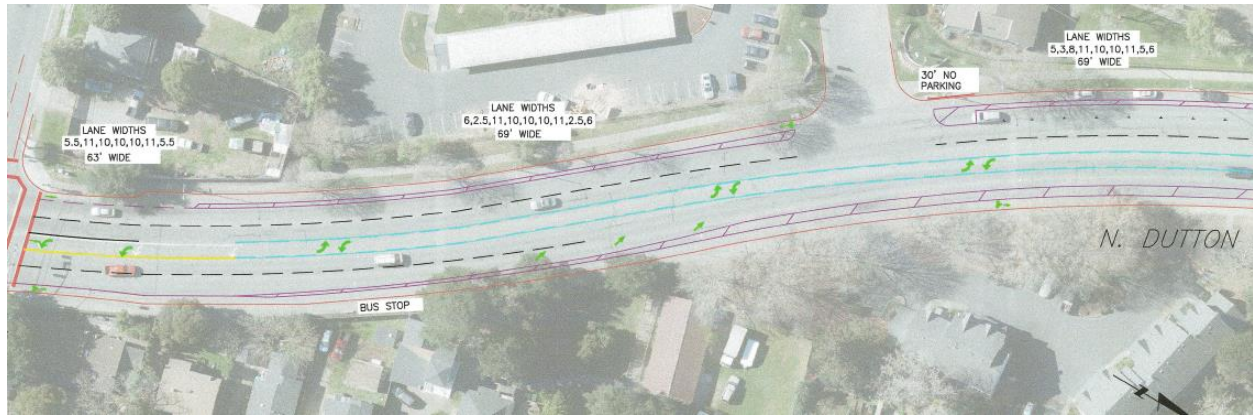

From West Ninth Street to Trowbridge Street:

From Trowbridge Street to West Third Street:

## **RECOMMENDATION**

This item is for Board discussion and input on the proposed design concepts.
