WILDLAND URBAN INTERFACE (WUI) PRODUCTS

Published by CAL-FIRE FIRE ENGINEERING DIVISION BUILDING MATERIALS LISTING PROGRAM

Revised 08/10/09

http://osfm.fire.ca.gov/strucfireengineer/pdf/bml/wuiproducts.pdf

235

Phase 1 - Effective December 1, 2005:

- Roof coverings
- Attic vents

Gutter protection - provided to prevent leave and debris accumulation.

Roof covering requirements -

underlayment must meet specific criteria and covers shall be a designated Class for the WUI areas.

Vent requirements – there shall be modifications to structural vent openings as to resist building ignition through the intrusion of burning embers and flames through the ventilation openings. There are specific criteria that must be met for compliance with these requirements.

Phase 2 – Effective July 1, 2008:

- Exterior siding
- Exterior wall vents
- Exterior doors
- Windows
- Decking surfaces
- Floor projections

NOTE: The delay in implementation for Phase 2 components was to allow for manufacturers to test and modify (if necessary) their products, and to move these products to market. Chapter 7A applies to new buildings either residential or non-residential (commercial).

Exterior Covering – Materials and material assemblies shall be tested in accordance with specific qualifications and standards or meet SFM approval or listing.

Window Requirements – Exterior glazing and tempered requirements.

Skylights – New language added to the express terms for specific requirements for skylights. Effective 7/1/2018

Doors – must be non-combustible, solid core wood that complies with specific requirements, have a 20 minute rating in accordance with testing to NFPA 252 or meet the performance requirements of SFM Standard 12-7A-1.

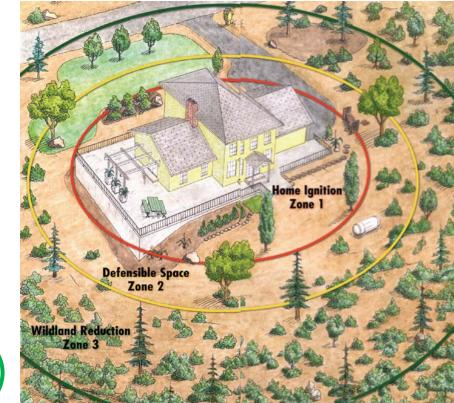

Decking Material and Floor Projection requirements – when located within 10 feet of the building the materials shall meet specific testing criteria as outlined in Chapter 7A or the SFM Standards 12-7A-4A.

Vegetation Management

DEFENSIBLE SPACE ZONE (100 feet + away from home or to the property line)

> WILDFIRE FUEL REDUCTION ZONE (*The outlying area beyond the required defensible space)
