Subject: Keysight Support for the Round Barn Village Project

To: Planning Commissioners

Reference the Round Barn Village project

On behalf of Keysight Technologies, I am writing to express our strong support for the Round Barn Village project.

Exacerbated by the October 2017 wildfire, the housing crisis in Sonoma County continues to be one of the biggest challenges facing Keysight Technologies in our ability to retain 1,500+ strong workforce and to recruit additional talent to Sonoma County.

Keysight strongly encourages the local city government to make it a high priority to streamline the approval process of residential developments throughout the city, including the Round Barn Village.

There should be no higher priority than relieving the housing crisis we are facing.

Respectfully,

Hamish Gray
Senior Vice President
