

Kincade Fire's Impacts to Regional Water Reuse Operations and Conservation Campaign

SubTAC Meeting

December 19, 2019

Joe Schwall
Deputy Director
Regional Water Reuse Operations

Claire Nordlie
Sustainability Coordinator

OUR FUTURE IN EVERY DRÖP

Geysers' pipeline beneficially reuses recycled water

- Recycled water is delivered via a 41-mile-long pipeline to Calpine's geothermal steamfields.
- The steamfields produce clean and renewable energy for 100,000 households in the North Bay.
- Approximately 15 million gallons of recycled water is delivered to the steamfield each day.

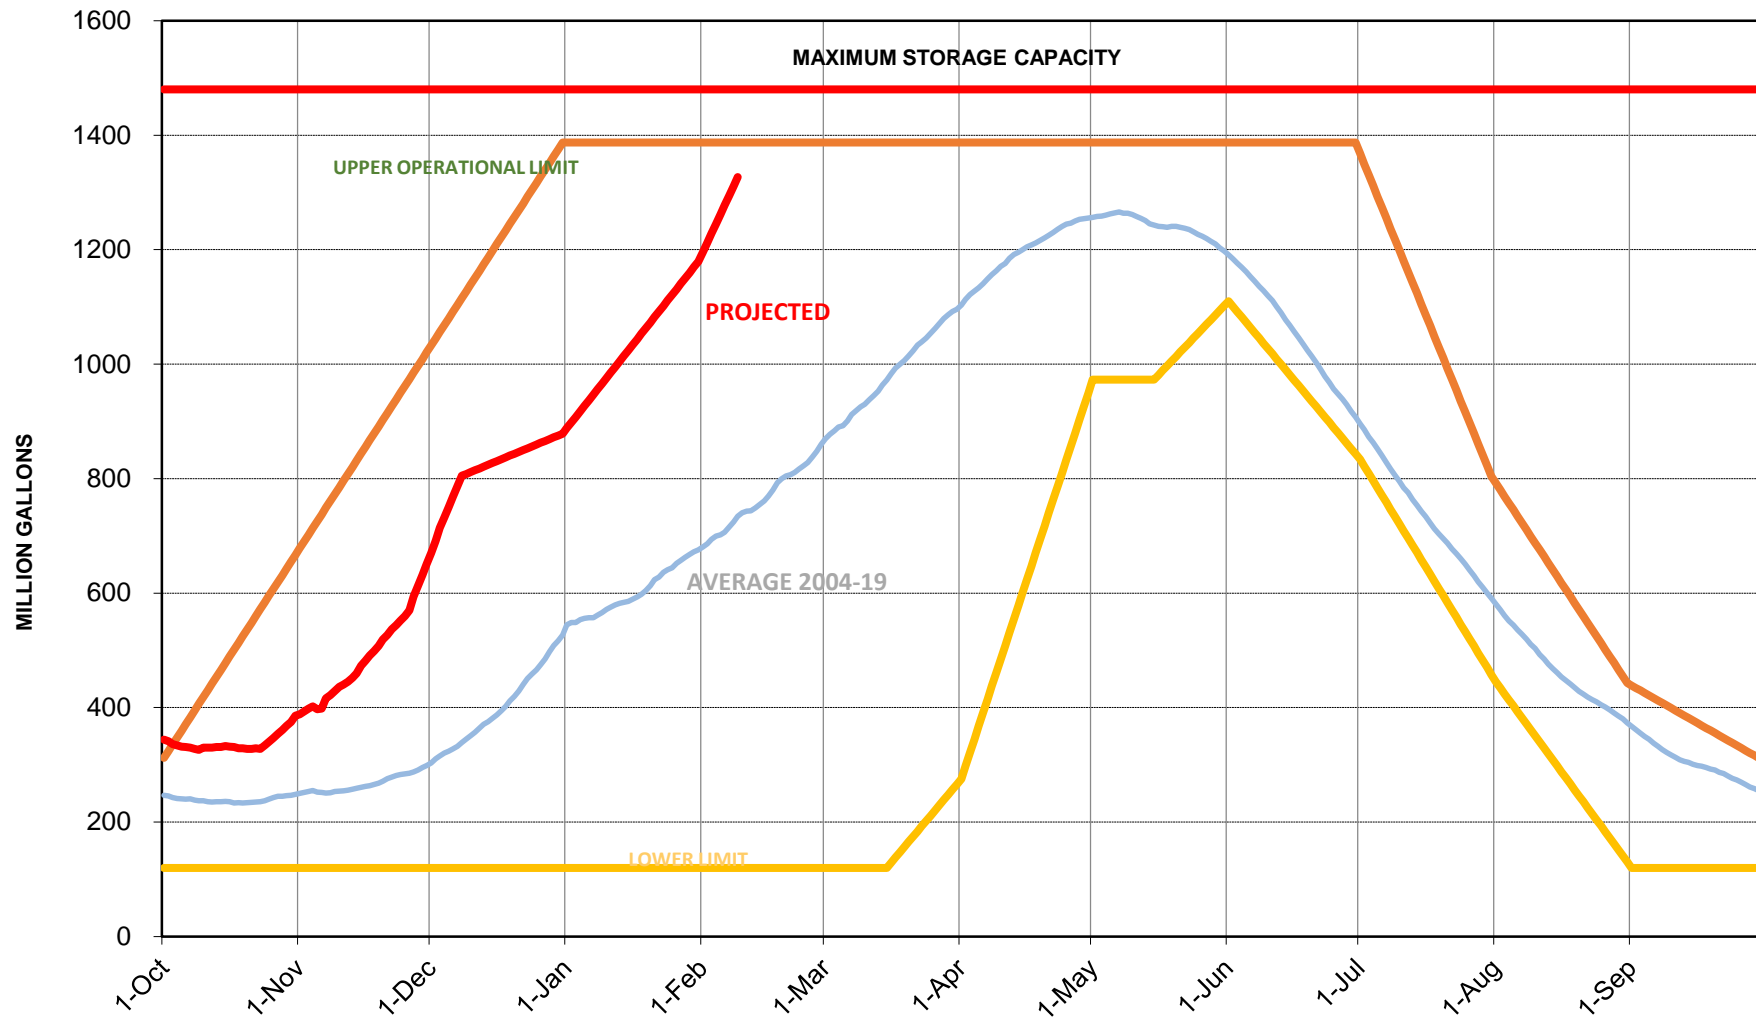

Kincade Fire Damaged Power Poles and Electrical Infrastructure

- Eight power poles were destroyed.
- Power could not be delivered to Geysers pump stations.
- Calpine worked diligently to restore power to the Geysers.

Recycled Water Storage Assuming Average Monthly Flows

Managing Recycled Water Supply and Demand

Indoor Winter
WaterSmart
Campaign Launch

Winter WaterSmart Campaign

Winter conservation campaign to reduce indoor use

- December 2019 through March 2020

Target Audience

- Santa Rosa Water residential customers
- Regional Partners – Cotati, Rohnert Park, Sebastopol, and Sonoma County
- English & Spanish language

Key Messages

1. Schedule a WaterSmart Check-up
2. Find & fix leaks
3. Replace inefficient fixtures

Outreach

- srcity.org/WaterSmart
- Social media
- Bill messaging
- Radio
- Newsletters
- Press release
- Workshop
