Thanks Susie,

Transit services for this property are provide by the bus stops on Mission Blvd., which is about ¼ mile from this site. The [CityBus Route 4/4B provide 30-minute frequency](#) from/to the two cover bus stops on Mission. Currently the only other service that CityBus provides in this area is to the intersection of Highway 12 @ Streamside Drive/ Village Pkwy, served by [Route 16](#), which provides trip to shopping or Oakmont on Tuesdays and Thursday (yes- we are missing a bus stop sign on the northside of Highway 12 as it was hit by a car – we do plan to replace it). Starting in 2017 [CityBus](#) removed all service from the section of Highway 12 west of Mission, all of our service as well as the [Sonoma County Transit](#) service operate on Mission east on Highway 12. The City doesn't currently have any long term plans to return service to this portion of Highway 12 beyond the current Route 16 as noted above, thus no addition bus-stop amenities would be requested on this property frontage.

But sidewalk improvements would be critical along Highway in order to provide a safe and ADA accessible path to the nearest public transit stop on Mission.

I hope this is helpful and let me know if you have clarifying questions.

Tony,

The amount of additional traffic generated by this project wouldn't warrant requiring the applicant to add the transit stops. By way of this email, however, I've forwarded your comments to Yuri Koslen in our Transit division. Yuri, could you respond to Tony as to what the future transit plans are for this section of Sonoma Highway?
