File #: 23-0531 **Version:** 1 **Name:** Water Supply Assessment for the Santa Rosa General Plan 2050
Type: CC- Report **Status:** Agenda Ready
File created: 6/27/2023 **In control:** City Council
On agenda: 7/25/2023 **Final action:**
Title: REPORT - WATER SUPPLY ASSESSMENT FOR THE SANTA ROSA GENERAL PLAN 2050

BACKGROUND: State Senate Bill 610 (SB 610), chaptered in 2001 and codified as California Water Code Section 10910 et seq (California Water Code), requires water suppliers to provide a Water Supply Assessment (WSA) to land use planning agencies for any proposed projects which are subject to the California Environmental Quality Act (CEQA) and would demand an amount of water equivalent to or greater than the amount of water required by 500 dwelling units. The proposed Santa Rosa General Plan 2050 (Project) prepared by the City of Santa Rosa (City) Planning & Economic Development Department (PED) is subject to CEQA, fits the definition of a "project" under California Water Code (CWC) 10912(a)(7), and is subject to California Water Code requirements. As requested by PED, Santa Rosa Water prepared a WSA for the Project. The WSA concludes that the City's existing and projected water supplies are sufficient to meet the projected new water demand associated with the Project in addition to current and future uses for a 20-year horizon through 2043, with implementation of demand management measures in dry years as needed. After approval, the WSA will be included as an attachment to the Environmental Impact Report for the Project.

RECOMMENDATION: It is recommended by Santa Rosa Water that the Council, by resolution, approve the Water Supply Assessment for the Santa Rosa General Plan 2050.

Sponsors: Water

Indexes: Exempt Project
