File #: 19-0433 **Version:** 1 **Name:** WAC Composition
Type: CC- Report **Status:** Agenda Ready
File created: 5/20/2019 **In control:** City Council
On agenda: 6/4/2019 **Final action:**
Title: REPORT - WATERWAYS ADVISORY COMMITTEE COMPOSITION

BACKGROUND: The Waterways Advisory Committee (WAC) is tasked with reviewing and providing advisory comments on development projects, both public and private, that are located adjacent to creeks and waterways for consistency with the Santa Rosa General Plan, Zoning Code, Design Guidelines and Citywide Creek Master Plan. The WAC, which is a Council appointed committee and therefore subject to the Brown Act and quorum requirements, is comprised of nine members: two City Council members, four at-large citizen members, and one member each from the Planning Commission, Design Review Board and Board of Community Services. In recent years, obtaining a quorum of WAC members for meetings has proven difficult, and has resulted in meetings being continued, which impacts project timelines. Revising the composition of the WAC from nine members to seven would reduce the quorum requirement to four, minimizing scheduling conflicts, while maintaining a seven-member Committee consisting of one member each from the Planning Commission, Design Review Board and Board of Community Services, and four at-large citizen members, all of whom are appointed either directly or indirectly by the Council.

RECOMMENDATION: It is recommended by the Planning and Economic Development Department that the City Council, by resolution, revise the composition of the Waterways Advisory Committee to a seven-member committee comprising of one member each from the Planning Commission, Design Review Board and Board of Community Services, and four at-large citizen members.
