Title: LAGUNA ENVIRONMENTAL LABORATORY UPDATE

The Laguna Environmental Laboratory provides water quality and soil chemistry analysis for the City of Santa Rosa. Most of this work is for Santa Rosa Water, ensuring that we have high quality drinking water and that our waste water treatment process is in regulatory compliance. The lab also supports other clients in the City including Environmental Crimes and the Fire Department. Staff will provide an overview of the work the lab does, including information on increased throughput in response to the 2017 fires. The Board may discuss this item and give direction to staff.
