<b>On agenda:</b>	2/27/2020	<b>Final action:</b>			
<b>Title:</b>	AGREEMENT WITH LYTEK INTERNATIONAL LIMITED TO PROVIDE BIOSOLIDS PROCESSING - RECOMMENDATION FOR APPROVAL				

The City's Laguna Treatment Plant produces approximately 32,000 tons of biosolids each year. While much of these biosolids are beneficially re-used as fertilizer on agricultural lands during dry months, this option is not available year-round and biosolids are currently composted at the City-owned biosolids compost facility during the wet season. This compost facility is aging and expensive to operate, and the City wishes to procure a better alternative to beneficially re-use biosolids that meets the City's biosolids program goals. A Request for Proposals was issued, two qualified responses were received, and a selection panel chose Lystek International Limited of Fairfield, California as providing the best value to the City's biosolids program. City staff recommends entering into a five-year agreement with Lystek International Limited to provide biosolids services for a total amount not to exceed \$6,405,770.
