

Recycled Water Update

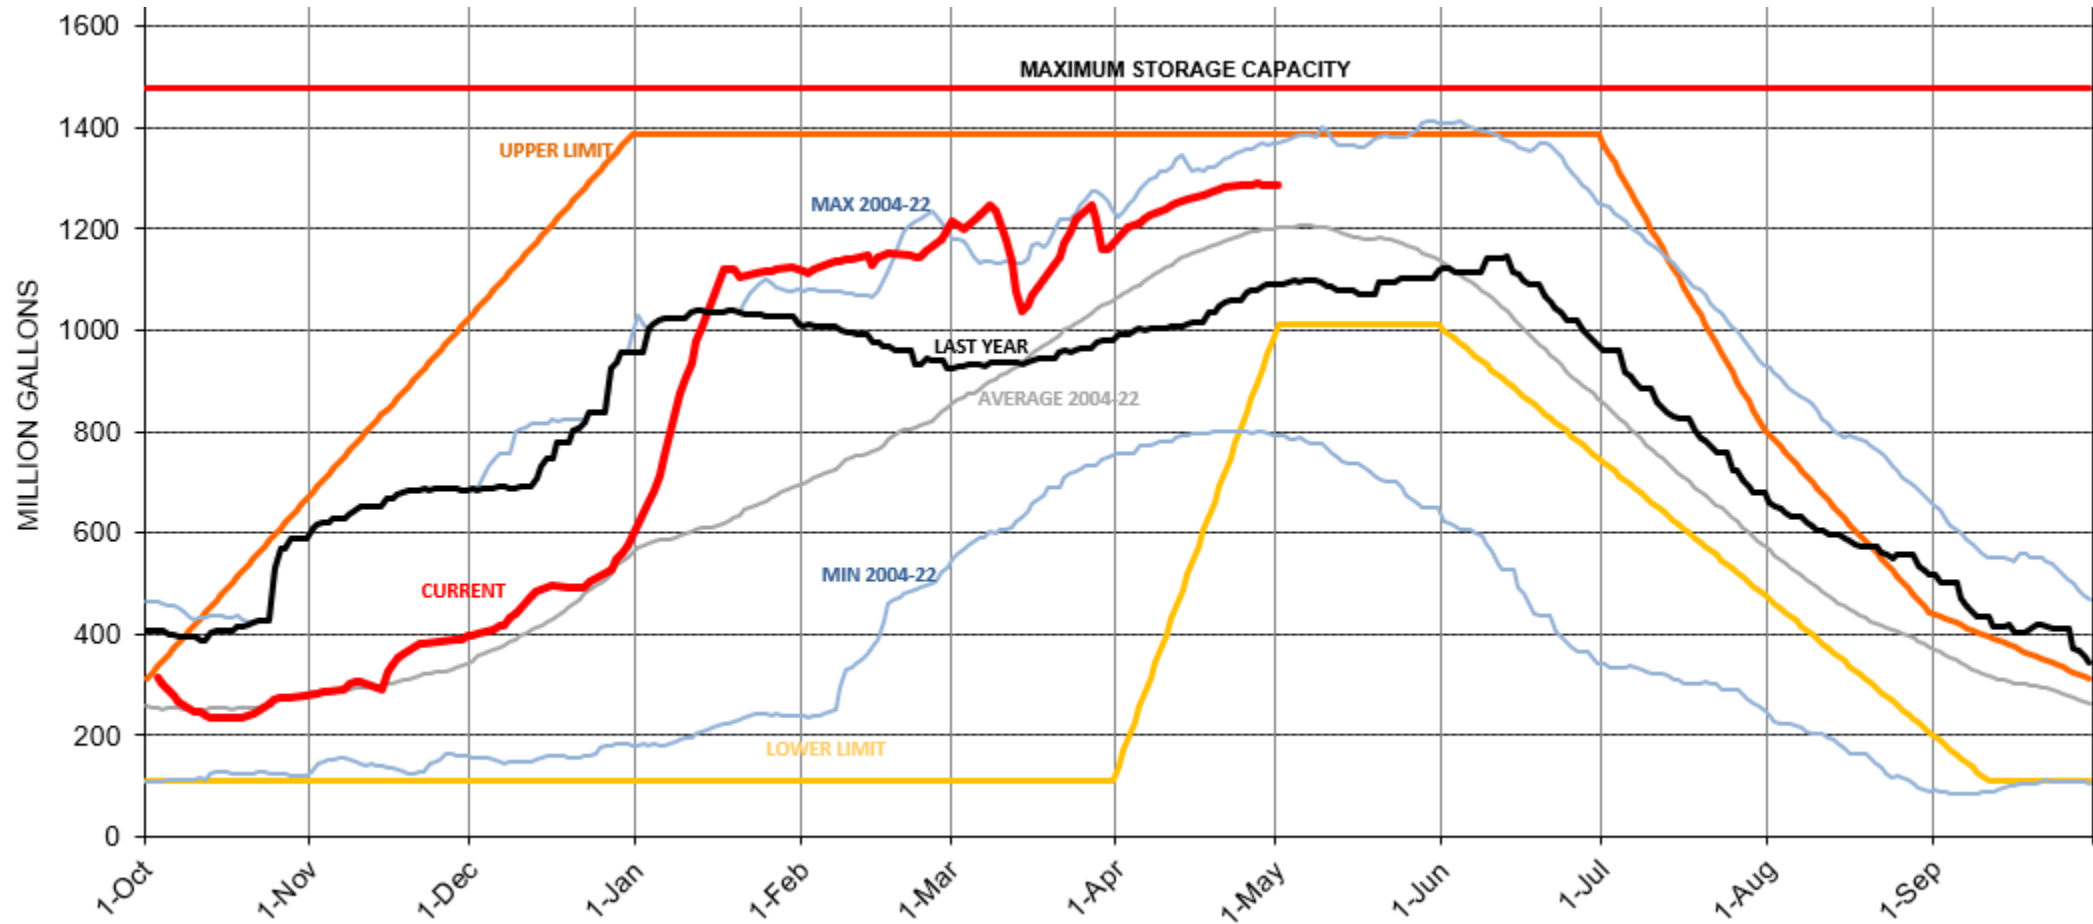

Board of Public Utilities Meeting

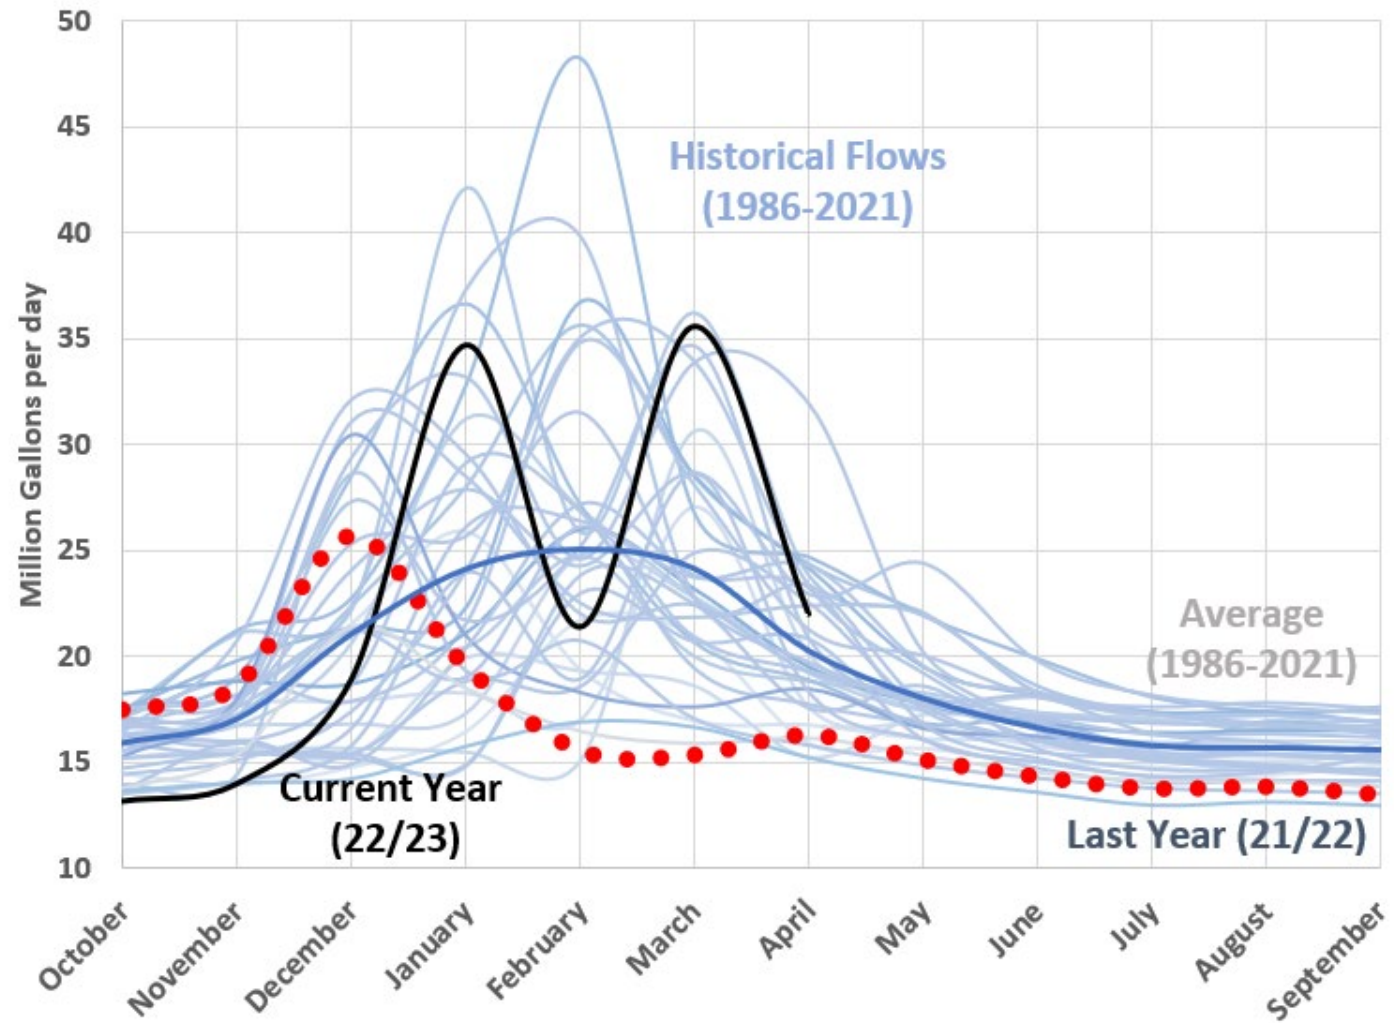

May 4, 2023

Mike Prinz – Deputy Director Water Reuse

Current Recycled Water Storage

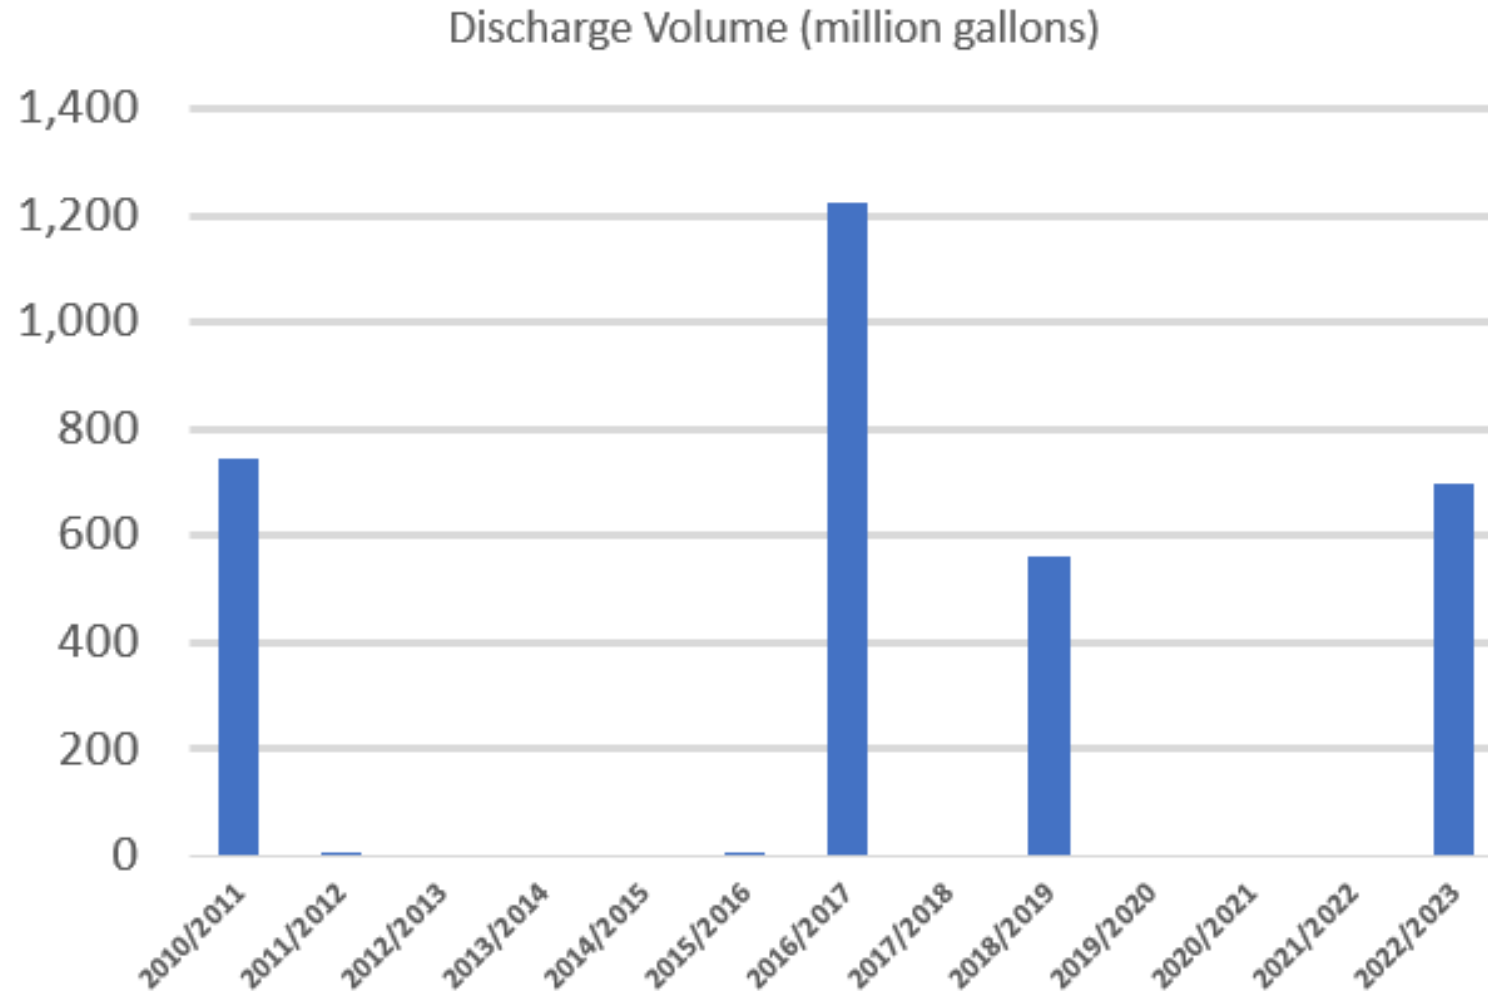

Recycled Water Production

2023 Discharge To Date

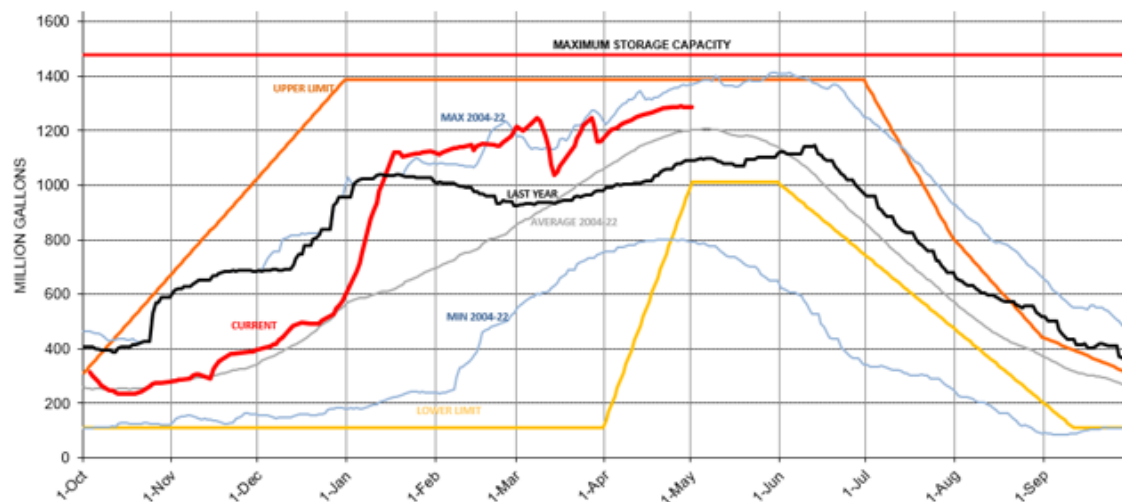

- Discharged 697 million gallons, approximate
- Equates to 10,273 pounds of Phosphorus, which equals 10,273 credits used for discharge
- SR Water has 5,357 Phosphorus credits remaining (after recent discharge events)

Recent Historical Discharge Trend

2023 Agricultural Allotments

- Currently planning on 1.45 BG – 28% higher than 2022 use (1.13 BG)
- Allotments are guaranteed through **September 30, 2023**
- Transfer of allotments will be permitted, but written request is required by July 1, 2023
- City Farms will be irrigated
