I am concerned with construction debris such as nails and screws being left in the roadway during construction. Could you please share with us the procedure the contractor would like neighbors to use to request reimbursement for vet bills due to construction debris such as nails and screws causing harm to animal paws, animal digestion? Also, for damaged car tires? Do we submit the bills to the contractor or his insurance company directly? Also, what precautions will the contractor be taking to prevent nails and screws from entering the surrounding roadway to include, but not limited to Kelsey Knolls?

Also what are the allowed hours and days of the week for noise pollution from this project and what is the allowable decibel level during those times?

Thank you,
Jacob Reed

I would like to request a formal hearing regarding construction at this property. I would like to know the steps the contractor will take to clean area of construction debris (nails,ect) to avoid damage to peoples' pets and vehicles. My son drives up there regularly to walk my dog and help with landscaping, and I have dealt with the nightmare of repeated flat tires before due to substandard end of day construction cleanup. Thank you for your attention to this matter
