Project Notes

SCALE: 1" = 15"

Structure: The existing structure is a pre-engineered steel frame building manufactured by General Steel Corporation. The expansion building is a pre-engineered steel frame also manufactured by General Steel Corporation.

Exterior: The exterior of the existing building is clad with vertical prefinished steel panels. The exterior of the expansion building will be clad in identical vertical steel panels.

Overhead Doors: The existing building has various overhead doors. The overhead door on the west wall is 16' x 16'. The extension is added to the west side of the existing building. The west wall of the extension will have an overhead door 16' x 16' placed in the same position as the existing overhead door.

Exterior Colors: The color of the exterior of the existing building facing its south front is brown with a CMYK formula of 19, 38, 37, 0. The exterior of the expansion will also have this color. The color of the overhead doors of the existing building is cream with a CMYK formula of 9, 11, 15, 0. The overhead door on the expansion will also have this color.

Access Doors: The expansion will have walk in access doors on each of the three exterior walls.

Outside lighting: Outside flood lighting will be installed by each walk in door and along the exterior wall according to code.

Landscaping: The existing approved landscaping has been professionally maintained and will be not changed or impinged by the expansion.
